

Unsettled with probably local thunderstorms this afternoon or tonight. Fair Thursday.

COUNCIL ACTS TO IMPROVE CITY PROPERTY

Orders Curb and Gutter in 11th Street, Park Bandstand and More Work on City Building

FRONT WILL BE REMODELED

With Rear of Building Enlarged, Modern Fire Doors Will be Installed, it is Decided

OTHER PARK IMPROVEMENTS

No Definite Action Taken on Engineer's Recommendations Regarding Enclosure of Branch

JUNIOR HIGH TROOP FORMED

Indiana State Library

Fred Casady Will Take Charge of New Group of Scouts

A junior high school Boy Scout troop was organized by the local Scout committee Tuesday evening at the Graham high school building and Fred Casady of the Princess and Castle theatres, who has had experience in Scout work, will take charge as scoutmaster.

This will make the third Scout troop in the city. The other two are meeting regularly with D. R. Merrill and Cecil Packett as scoutmasters.

Mr. Casady announced that he would lead a hike for all boys 12 years or more of age, regardless of whether they are Scouts, Saturday morning. Boys who want to go are requested to be at the Graham high school playgrounds promptly at 8 o'clock. They will return by noon.

GAIN IN PERSONAL PROPERTY SHOWN

Assessments Increased, Complete Report Reveals, But Real Estate Will Be Lower

ONLY PARTIAL REPORTS IN

In Nine Townships Land and Improvements are Assessed at \$11.60 Less Per Acre

Although personal property is assessed higher this year, according to final reports from township assessors compiled by the county assessor, Earl F. Priest, real estate will show a loss, based on returns from nine townships which have met in regular session.

Mr. Dill's report showed that the bridges of the railroads were not large enough to permit storm water, and that a new bridge should be constructed 400 feet east of the present bridge on the C. I. & W. railroad and a new channel made for the ditch for 500 feet. The enclosed sewer should start at Ninth street, and run to a point about 200 feet south of the Seventh street bridge, which would then empty into the open ditch about half way between Seventh street and the Big Four bridge.

He recommended that the open ditch be dredged from 14 to 16 feet in width and to a depth of about eight feet. The construction of the concrete sewer was recommended to be 5 by 8½ feet, in a double section, which would provide two sewers parallel, each being 5 by 8½ feet. This would do away with bridges over streets.

The cost of the proposed improvement, as estimated by Mr. Dill at \$15,000, would be assessed against the lots affected by the water shed, roughly estimated at 1,800 lots, with those more directly benefitted paying the largest assessments.

The railroads will be notified at once to enlarge their bridges, and steps will be taken to figure on a smaller sewer of about five feet in circumference, which the councilmen believe will be large enough to take

"STOP AND GO" SIGNAL TO BE INSTALLED HERE

Automatic Light Arrangements to be Placed at Main and Second Streets on Trial

SAME BASE WILL BE USED

An automatic "go and stop" signal to regulate traffic will be installed at Main and Second streets on a 30 days trial, and work will start at once putting it in operation.

The same concrete base will be used, which now holds the large traffic post in position, and the new automatic post will be erected on the base, standing 8 feet high. On account of different wiring, it will be necessary to bring the wires in from the top while it is being tried out, but if found to be satisfactory and placed here permanently, the wiring will be placed in the cable as it is now done beneath the street.

The post to be erected is similar to the one in use in Indianapolis. The green light flashes when traffic is to move. The white light flashes for the chance, and red light flashes for traffic to stop.

A switch is attached to the post which will enable a police officer to cut off the "go and stop" arrangement at nights and when traffic is light, and when the switch is regulated there is a red light at the top which burns to serve in the capacity as the one now in use. If the experiment proves satisfactory during the 30 day trial, the council will probably purchase it, and have it installed permanent.

Fifty-nine hundred and sixty-three head of sheep were assessed at \$61,520, making the average valuation \$10.32. The 1924 average was \$9.75.

The difference between the hog market March 1 this year and at the same period last year is reflected in the big increase in values placed on hogs for assessment purposes.

This year assessors listed 11,488

THESE ARE HARD DAYS FOR SLAPSTICK ARTISTS

9 COMMANDERIES MAY PARTICIPATE

Five Outside Knightstown Group Invited to Join in Celebrating Ascension Day

TO BE HELD HERE SUNDAY

First and Probably Last Time Commanderies Will Have Chance to Entertain Grand Master

At least four Knights Templar commanderies, and possibly five others from this part of Indiana, will join in celebrating Ascension Day here Sunday. Knightstown, New Castle, Greenfield and Rushville are certain to take part, as this is their annual custom, being joined together from the fact that three of them are offsprings from the Knightstown commandery.

Invitations have been extended to the commanderies at Richmond, Connersville, Greenburg, Shelbyville and Franklin to attend and participate, and although no definite word has been received, assurance was given local Knights by members of each of these commanderies that they would be represented here Sunday.

The principal address will be delivered by the Rev. J. J. Rea, pastor of the Richmond Presbyterian church, at the Main Street Christian church and L. P. Newby, grand master of the Knights Templar of the United States, will be an honor guest.

This will be the first time, as well as probably the last, when the commanderies which observe Ascension Day together, will have the opportunity to entertain a man holding the high office which Mr. Newby holds, and for that reason a large attendance of Knights is anticipated.

Conservative estimates on the number to be here in uniform is four hundred.

The day will not be without its spectacular features. If the attendance warrants it, the commanderies will attempt the famous mass formation as they march down the Main street hill after the services.

The police have been asked to keep Main street cleared from Third to Seventh streets so that this formation may be attempted, and older Boy Scouts have consented to cooperate and prevent the parking of automobiles in this section during the time that the services are in session.

The Knights will parade before the services. They will form at Perkins and Third streets and march south

12 HOOSIERS AT MARQUETTE

Albert Schricke and John W. Kelly Among Indianaans at University

Milwaukee, Wis., May 20—The Hoosier delegation at Marquette university here is growing, and whereas but one or two students represented Indiana here three or four years ago, there are now almost a dozen.

Albert S. Schricke of Rushville, Ind., is a junior in the Marquette College of Dentistry, and is secretary of the local chapter of Psi Omega, national dental fraternity. John W. Kelly, also of Rushville, is a senior in the Marquette College of Business Administration, and is a member of Delta Sigma Pi, commerce fraternity.

CROWE AROUSED BY DISAPPEARANCE

State's Attorney Calls Grand Jury To Investigate New Angle of Shepherd Trial

MAIN WITNESS MISSING

Reports Reach Prosecution That Robert A. White Had Been Bought for \$25,000

(By United Press)

Chicago, May 20—Aroused by the disappearance of Robert A. White, extremely important state witness in the Shepherd "germ murder" trial, State's Attorney Robert E. Crowe today ordered the grand jury to meet this afternoon to take action.

Reports to Crowe were that White had been "bought for \$25,000."

Crowe said he would seek indictments but refused to indicate who would be named.

Defense attorneys today denied knowledge about White's disappearance.

Unless White is apprehended the state's case against William D. Shepherd, charged with killing his wealthy ward, Billy McClintock, will be materially weakened, Crowe said.

It was reported that White was being held in a Loop hotel by agents for the defense. Attorneys of the defense could not be reached to verify the report.

The witness, Robert White, was considered important to the state's case against the man who is accused of murdering Billy McClintock.

IS APPOINTED SPECIAL JUDGE

John W. Craig Selected to Try Billings Foreclosure Suit

John W. Craig, of Greensburg, judge of the Decatur circuit court, has been elected to act as special judge in the case pending of Walter E. Smith against George F. Billings and others, in which Carlton Chaney, one of the defendants, filed the motion for a change of judge. The action is a complaint to foreclose a mortgage and on notes.

In the case pending of Carlos H. Mansfield against Walter S. Mansfield and Miles S. Cox as administrator of the estate of Zelma F. Mansfield, the partition of real estate was granted and a farm order ed sold in order to make a settlement.

PRIMARY COST 42 CENTS A VOTE

Claims Allowed by Council Show Expenses to be \$727.75—Average \$65.50 a Precinct

TOTAL OF 1760 VOTES CAST

June 4 is Last Day for Candidates to File Expense Account Under Corrupt Practices Act

It cost the taxpayers of the city of Rushville 42 cents for each vote in the city primary election, May 5, according to a detailed report of election expenses made Tuesday night by Earl Osborne, city clerk, to the council.

The total cost for the election figured \$727.75 and the various bills were passed and paid. Each precinct being \$65.50 and he is to pay his election officials, meals and other incidentals. In addition there were bills for booths, ballots and advertising.

Figuring on the basis of 1,760 votes cast in the election by both parties for the four candidates for mayor, the election cost about 42 cents a vote.

The council last fall appropriated \$1,700 for city elections for this year, which still leaves about \$900 for the November election. According to the costs of conducting the election here, it is about the average for most cities. In Connersville the per capita cost was more than 60 cents, while in Lebanon the cost was only 15 cents a vote.

So far candidates have neglected to file their expense accounts for the primary election, and Earl Osborne, city clerk, today called attention to the fact that all candidates are required under the corrupt practices act, to file with him a statement showing their expenditures in the campaign. The last day for filing is Thursday, June 4. If the candidates had no expense, they must so state in their statement to be filed with the clerk.

The statements of campaign expenses and all promises which were made during the campaign must be filed with the city clerk not later than thirty days after date of the primary. The statements must be sworn to before a notary public or other proper official.

Candidates who fail to file their statements with the clerks as they are required to do are subject to a fine of not less than \$300 and not more than \$1,600. In addition they may be imprisoned for a period of not more than one year.

REGISTERED NURSE TO SPEAK

Miss L. E. Renwick, registered nurse, working in this city and Rush county under the auspices of the Indiana State Board of Health, will give an address at the First United Presbyterian prayer meeting Thursday evening, May 21. She is to tell about her work among the Jews in the Chicago Jewish quarters, where she has been for several years as a nurse and a community worker. The 10:47 passenger and the 7:30 o'clock and as many as can do so are invited to this meeting.

TAKEN TO LONG HOSPITAL

Peter Connelly was taken to Robert Long hospital in Indianapolis today where he will undergo an operation.

PRESBYTERIANS TO RENEW OLD BATTLE

Dispute Between Fundamentalists and Modernists Expected When 137th General Assembly Meets

MORE TALK OF CHURCH UNION

Demand Will be Made That Presbytery of New York be Expelled From Church at This Time

(By United Press)

Columbus, O., May 20—Renewal of the battle between fundamentalists and modernists is expected when the 137th general assembly of the Presbyterian Church in the U. S. A., meets here tomorrow.

The first shot will probably be fired when Dr. Clarence Edward Macartney of Philadelphia, retiring moderator, opens the assembly with his moderatorial sermon, "Reconciliation Through Christ." Dr. Macartney was elected by the General Assembly of 1924 as the leader of the conservatives on the direct issue based on the preaching of Dr. Emerson Fosdick in the First Presbyterian Church of New York City.

Dr. Fosdick is a Baptist but for years served as a special preacher in that church. Dr. Macartney and others took exception to some of his pulpit utterances as heretical. The General Assembly of 1924 decreed that Dr. Fosdick's occupancy of the Presbyterian pulpit was irregular and invited him to either accept the Presbyterian creed or cease his preaching in the Presbyterian Church. Dr. Fosdick refused to bind himself to the Presbyterian creed, but continued to occupy the First Presbyterian pulpit in New York for many months. A complaint against the Presbytery of New York will therefore be presented to the General Assembly by 12 ministers and four elders of the Presbytery of New York, headed by Dr. Walter D. Buchanan. The New York Presbytery is charged with "dishonest action" and "error" in ten specific counts.

The Presbytery of Chester, Pennsylvania, will present at the General Assembly an overture demanding that the Presbytery of New York be excommunicated, its property taken over, and a "new loyal" Presbytery set up in its place.

Among the charges brought against the New York Presbytery in addition to the Fosdick case is the accusation that the New York Presbytery has licensed to preach young ministers who did not accept such Presbyterian fundamentals as belief in the Virgin Birth and the Miracles of Jesus.

So bitter is the feeling in Baltimore Presbytery against Philadelphia Presbytery for having started the controversy that Baltimore Presbytery will ask the General Assembly to separate it from the Presbytery of Philadelphia in the voting.

TRAINS DETOUR DUE TO WRECK ON C. I. & W.

Freight Car Loaded With Coal Jumps Track Near Liberty, Detaining Traffic All Day

NO. 35 BACKS TO RUSHVILLE

A slight wreck on the C. I. & W. railroad near Liberty this morning, caused a delay in traffic of three passenger trains which were forced to detour in this city.

A freight car loaded with coal jumped the track and the heavily loaded car was thrown crosswise of the tracks, making it an all day job getting it back.

The early morning mail train, due here at seven o'clock went as far as the wreck, and then backed to this city and was detoured over the Pennsylvania to Richmond, and then to Cottage Grove, which is east of the wreck. The 10:47 passenger to Cincinnati, also detoured in this manner, and the train from Cincinnati to Chicago, due here at 10:47, came over the Pennsylvania via Richmond, and went from here to Indianapolis and Chicago.

The wreckage was expected to be cleared so that evening trains could resume their schedule.

CHICAGO LIVESTOCK

Cattle receipts 11,000; market, fed steers generally steady; uneven, light and handweights lower; more active than heavies; latter fairly liberal supply; best matured steers \$11.40; averaging around 1200 pounds, heavies \$11.00; fat cows dull, tending lower bulls; weak; vealers fully steady at \$9.50; to \$10.50; to packers; outsiders \$11.00 and better.

Sheep receipts 12,000; market spring lambs strong; clip lambs 25¢ up; sheep fully steady; few early sales native springers \$12.50; good to choice California \$15.50; several loads clip lambs \$12.75; California yearlings \$11.00 to \$11.50; strictly choice California ewes \$8.25

Answer To Yesterday's
Cross Word Puzzle

HOG MANGE IS SCARCE HERE

Small Mites May do Serious Damage
if They Appear in Herd

There are not a great number of hogs in Rush county infected with mange mites. However, where one animal in the herd is noticed, one can usually find 8 or 10 more, according to H. D. VanMatre, county agent.

Mange mites cause what some farmers call elephant-hide. The tiny, whitish mites suck blood. Bloody serum exudes from the wounds eventually matting together and forming scabs. This produces rough, dry, wrinkled skin, and this reduces gains and vitality. Crude oil is effective. However, lime and sulphur at the rate of one gallon of the concentrated liquid to 15 gallons of water is favored by many for quick results.

SHORAGTE OF FARM ANIMALS

Rush County Farmers Anticipated
This And Are Raising More

In a publication sent out by the U. S. department of agriculture to county agents a warning of an acute shortage of horses and mules is foretold within the next five years. It reads as follows:

"Unless more horse and mule colts are raised during each of the next five years than were raised in 1924, the number of horses on farms five years from now will be only 66 per cent of the present number, and of mules 74 per cent.

It is believed that Rush county farmers realized this shortage to a certain extent a year ago. It is the general belief of those that are acquainted with conditions in the county that there are more spring colts this year than any previous year since 1918.

MOM'N POP

CROSS WORD PUZZLE

Motorists should be especially interested in this puzzle. It's dedicated to them and at the same time tests their knowledge and ingenuity.

HORIZONTAL

1 What rich man, poor man, beggar man, thief possesses, see picture. (pl.) 10 What every car is supposed to do. 11 Neither's affinity. 13 Gold finger band. 15 To surround. 17 Fairy. 19 Measure of area 20 Alternate to and fro motions peculiar to some cars causing seasickness. 21 Morindine dye. 22 Unused. 24 To mimic. 25 Exclamation of joy. 27 Variation of "a". 28 Evening. 29 Writing fluid. 31 Half an em. 32 Melancholy note. 34 Aged. 36 Constellation. 38 Second note in scale. 39 Makes the car go (pl.). 44 Sun god. 45 Granted facts. 47 Unit. 48 Those defenseless organs that listen to a motorist's cursing. 50 A dolt. 52 To nick (a mudguard). 53 What young folks never look at and old people habitually glance at (see picture).

VERTICAL

2 Pitcher used for cremation. 3. Pulls. 4 Preposition. 5 Is in debt (for car). Puzzle: find some one who isn't. 6 Within. 7 Cuts off. 8 Before. 9 Arm of car used to start motor of the driver. 12. 5280 ft. (pl.). 11 Wrath. 15 Masculine pronoun. 16 Last member of the family to get a car. 18 To knock. 23 Signaled. 24. Record of a single event. 26 Married chicken. 27 To be sick. 30 Popular make of car (pl.). 33 To drive down hill without gas. 35 Meadow. 37 To sin. 39 To relieve. 40 To depart or to run. 41 Within. 42 Point of compass. 43 Upholstered portion of the car. 46 To rap lightly. 49 Part of verb to be. 51 Point of compass. 52 Myself.

ORANGE

Mrs. B. F. Armstrong of Ben Davis spent Saturday and Sunday here with Mrs. Ida McKee and Mrs. A. B. George.

Paul Reed Henry and Miss Nellie Henry are ill with the mumps.

Mrs. Nora Kaler is ill with bronchitis.

Mr. and Mrs. W. H. Law and children William and Marian have gone to Hamilton, Ohio, to spend two weeks with relatives.

Mrs. Hey, who has been seriously ill with pneumonia at the home of her daughter, Mrs. W. R. Phillips, is improving.

James K. Mason and Oliver Manlove of Posey township were business visitors here Monday.

The last of the series of health lectures will be given in the Christian church Friday afternoon of this week at two o'clock. The subject will be illustrated with motion pictures.

Lowell May has joined the boys' chicken club and has received his consignment of chicks from the Chamber's hatchery at Springerville. Frank Reed is club leader for Orange township.

Emmett Carpenter and Thomas Stevens have each purchased an automobile.

A Free Fair business meeting was held Friday evening in conjunction with that of the Farm Bureau. The new officers are president, Gus Bowen; vice president, J. E. Dawson; secretary treasurer, Clyde Williams.

Mrs. Garret Ricketts was here from New Salem Friday visiting her parents, Mr. and Mrs. W. P. Sipe.

Mrs. Hattie Moor of Shelbyville is the house guest of Mrs. Wilson Stewart.

Irvin Armstrong of Indianapolis was the guest of Herbert George Sunday.

Miss Augusta Welker of the faculty of the Falmouth high school was the guest of Miss Marian Titsworth, the last of the week.

The meeting of the Farm Bureau Friday night was well attended. The business session was conducted by the president, J. K. Fielding. Films were shown by county agent, M. F. Detrick, and there was a lunch served consisting of sandwiches, pie and coffee.

Mr. and Mrs. Emeric Clifford and daughter Valeta Ellen were the guests of Mrs. Clifford's parents, Mr. and Mrs. C. Phillips in Rushville Sunday.

Irvin Long, who is employed with the Chevrolet Company at Indianapolis spent Sunday here with his mother, Mrs. Bertha Long.

James K. Mason and Oliver Manlove of Posey township were business visitors here Monday.

GUNN HAYDON

ARLINGTON

Mr. and Mrs. Fred Woods and son Jesse and Mr. and Mrs. Leonard Blank spent Sunday in Muncie.

Miss Mary Baldridge, who was operated on for appendicitis at the M. E. hospital at Indianapolis, returned home Saturday.

Mr. and Mrs. Ora Adams and son Carl spent Saturday in Indianapolis.

Miss Dorcas Proctor, former teacher of Arlington, will be at Muncie next year.

Will Hufford and son Ralph attended a sale at Greenfield Saturday.

Mrs. Zula Houston attended the Postmasters' convention at Indianapolis this week.

Mr. and Mrs. Russell Six are the parents of a baby girl born Saturday, May 16.

James Dunn and family have returned to their home at Niagara Falls after a short visit here.

Mr. and Mrs. Frank Downey and grandchildren visited Glen Downey at Cincinnati Ohio last week.

Prof. Logan of Newcastle was a guest at the home of John Conway Sunday.

A reunion of the cousins of Pressnell Folger was held Sunday at the home of Mr. and Mrs. H. F. Pressnell. The following persons attended: Mr. and Mrs. D. M. Pressnell and E. C. Macy of Arlington, L. H. Macy and daughters of near Arlington, Mr. and Mrs. Mrs. Oscar Folger and two children of Lapel, Mr. and Mrs. Earl Folger and family of Shirley, Mrs. Estella Branson and adopted daughter and husband, Mr. and Mrs. Marshall Moore of Indianapolis, W. O. Folger and daughter of Indianapolis, Mr. and Mrs. Ottie Folger and daughter of Richmond, Mrs. Bessie Conner and two of her children of Anderson. A two course dinner was served at the noon hour. The afternoon guests were Mr. and Mrs. Charlie Vanzandt and family and Mr. and Mrs. Walter Vanzandt and family. The day was spent socially with music, both instrumental and vocal.

Mrs. Tom Newhouse fell off a step ladder Tuesday and she was taken to Shelbyville to the Inlow Brothers' hospital where she underwent an X-ray examination. No bones were found to be broken but the ligaments were torn loose on her shoulder.

BIRTHDAY CELEBRATED

Prof. and Mrs. J. E. Bean, 604 E. 7th street, entertained at a party Monday evening in honor of the sixteenth birthday of their daughter Mae Etta. The evening was spent with music and games and a two course luncheon was served. Guests from out of the city were Miss Beatrice Dixon of North Vernon, Miss Harriett Walker of Anderson, Miss Jessie Etta Garrett of Dayton, O., and Miss Laura Belle Evans of Frankfort, Ind.

VETERAN INJURED

Dallas, Tex., May 20—E. M. Collins, 79, of Little Switzerland, N. C., attending the Confederate reunion here, was slightly injured when an airplane sideslipped and wrecked at the start of a flight today. The fall marked the veteran's first attempt at the flying game, Collis said.

BIBLE THOUGHT
—FOR TODAY—

Bible Thoughts memorial will prove a
priceless heritage in after years.

FIFTEEN YEARS
AGO TODAY

From Daily Republican

Friday, May 20, 1910

Enthusiasm and original ideas of the betterment of Rushville overflowed, bubbled over and overspread all of the business men who attended the regular bi-monthly meeting of the Retail Merchants' association in the court house last night. About thirty-five business men were present and formed a nucleus for greater things later.

Once more the time of the year rolls around when the high school graduate holds the center of the state. The commencement exercises will be held in the Main Street Christian church next Friday evening. The speaker for the occasion will be S. A. Long of Dayton, Ohio. The baccalaureate sermon will be preached by the Rev. J. W. Turner, pastor of the St. Paul M. E. church next Sunday evening at the Main Street Christian church. There are twenty-two students who will get a diploma from the high school.

The new bank safe has arrived. It took a four horse team to haul it and weighed three tons. (Falmouth correspondent.)

Mrs. Ollie McDonald and son Raymond visited her parents, Mr. and Mrs. Harrison Brookbank this week. (Orange township correspondent.)

Rev. Carl Berry, Mrs. Frank Redick, Mrs. J. A. Sipe, Mrs. R. L. Hamilton and Mrs. James Anderson attended the Christian Sunday school convention at Anderson this week. (Carthage correspondent.)

Ben Himes left this morning for Bloomington, where he will be the guest of friends in Indiana University and will attend a dance.

Miss Hollie Mock left today for Decatur, Ill., where she will spend a week's vacation. She will also visit in St. Louis, Mo.

Chris Bloomingdale of Cincinnati will spend the week end with his wife who is visiting her parents, Mr. and Mrs. Lewis Cline in North Harrison street.

The meeting of the D. A. R. Thursday afternoon was one of unusual interest, it being the first one held since the rooms for the library and rest room were decided upon. The members discussed plans for the furnishing of the library and rest room and great enthusiasm and interest was shown.

Miss Arleigh Offutt has resumed her studies at the I. & C. traction offices after a two weeks' vacation.

Oliver Willard Pierce of the Indiana Conservatory of Music, who was advertised to give a recital here last Monday night, will give the entertainment in the corridors of the court house next Tuesday evening. Mr. Pierce will be assisted by Miss Jessie Kitchen, a pianist of ability, who studied under Mr. Pierce.

SAFETY SAM

June Stars

June, the month of brides, is the one in which to look for the Big Dipper high in the western sky, with the end of the handle nearly due north.

Whether the dipper has any significance, appearing as it does in June, the accepted time for romance and marriage, is not known, but it must be acknowledged that a dipper might be considered in the light of household equipment.

However, the star gazers tell us that dipper as used in this connection is not related in any sense with the well known kitchen implement, but that it gets its name from the fact that it is shaped like a dipper.

The central star in this constellation is Bootes, which is generally known as The Herdsman and is also known as the Oxdriver, who is supposed to be driving the seven plough oxen, as the seven stars of the Big Dipper were also known, around the north pole of the heavens.

June nights are splendid nights for communing with the stars. The Big Dipper will form an interesting study for those who are interested in the starry heavens and like to gaze at them and let their imagination roam at will in trying to fathom the intriguing mysteries which they conceal.

Who Shall Enter:—Not every one that saith unto me, Lord, Lord, shall enter into the Kingdom of heaven, but he that doeth the will of my Father which is in heaven. Matthew 7: 21.

Prayer:—Blessed Lord, Thou art the Teacher, and Thou hast taught us that we are accepted only when we come to Thee with our whole heart.

Home Ownership

The Daily Republican today publishes a Better Homes Section as an incentive to home ownership, with the thought that a home owner makes a good citizen.

Home ownership is a principal factor in the making of citizenship. The community that is largely composed of home owners is always progressive and is a desirable place to live, making its prospects for growth much better than the community that is made up mostly of renters.

Rushville is noted for the beauty of its homes, expressing the pride which their owners have in keeping them attractive and pleasing to the eye. In the vast majority of cases, the most beautiful homes are those whose occupants are the owners.

The renter as a rule takes little pride in the surroundings of his home, its upkeep or its furnishings. He is always dreaming of that home of his own and he saves all of his energy and ingenuity until that time when he can spend it on his own possessions.

Thus the home owner is more dependable, more stable and more desirable, because he feels that he is a part of the community. He takes more interest in community activities, knowing that it is his permanent home and he is more likely to be a force for good government, than if he is unsettled and in doubt about the term of his residence.

The home owner pays taxes and is concerned about how the money is spent, which makes him a desirable citizen. He demands good laws and their enforcement for the protection of his family and his property.

The man who owns his home has a high respect for property and is anxious to keep it looking its best. He is thrifty and eager to save so that he may add the latest conveniences and enjoy the best furnishings, with the knowledge that it will not be damaged by frequent moving.

The home owner invariably has strong family ties and a pardonable community pride that makes him the most desirable citizen.

Rushville wants all of the citizens of this type that it can get and any influence that will cause a man to build a home in Rushville is eminently worth while.

Thought 3 Little
Children Needed
Mother's Care

"My stomach suffering was so severe that I could not have lasted much longer. I did not care so much for myself but did not want to leave my three little children who needed a mother's love and care. A cousin in California wrote me about Mayr's Wonderful Remedy and I took a course of it. I have since been entirely well." It is a simple, harmless preparation that removes the catarrhal mucus from the intestinal tract and allays the inflammation which causes practically all stomach, liver and intestinal ailments, including appendicitis. One dose will convince or money refunded. For sale by all druggists.

Stewart, Washington Letter.

BY CHARLES P. STEWART
NEA Service Writer

WASHINGTON — Suicide, for generations, has been a recognized method in China of insisting on needed reforms. A reformer works and toils. No good. He's ignored. Finally, "I'll go the limit," he decides. Writing a letter, urging the reform he's dying for, he bumps himself off. "I wonder why," observes the coroner.

The letter is opened and read. Pretty soon, all over town, "Wuxtry! Wuxtry! Wuxtry!" the news kids are hollering. "The Hon. So-and-So kills himself for such-and-such a reform!" Public attention is focussed forcibly on the reform. Everybody gets to talking.

It's about it. If it's any good, often it's adopted promptly, whereas it might have lagged for years otherwise.

ACCIDENTALIZED, this was General (now Colonel) Billy Mitchell's system. He sacrificed his job to concentrate attention on his fight for aviation reform. But the Oriental way is better.

How much more emphatic General Billy would have been if he'd gone up in an airplane and crashed, on purpose, from a three-mile altitude!—having served notice previously what he was doing it for.

ON the same principle, President Coolidge missed a chance to do a great work in behalf of safety from automobiles when he dodged one of them the other day. It wouldn't be fair to say he did this from deliberate indifference to the National Safety Council's cause. Probably he dodged thoughtlessly.

But what a roar would have gone up about drivers' recklessness if one of them had hit the president! It would have meant a widespread tightening up of

The Hodge - Podge
By a Paragrapher with a Soul

It may be all right to sympathize with the under dog, but it is the part of wisdom to place your money on the top one.

Some family trees are not of such generous proportions that one can hide behind them.

The man who believes himself always right is more likely to be wrong than the man who is not always so certain.

People have all sorts of convictions, but the greatest of these is when the judge says "for life."

Very soon Henry Ford will be making Fords as rapidly as children are born. Then perhaps he can solve this perplexing race suicide problem.

Intuition may be peculiar to women, but how are some men able to pick a winner?

Initiation isn't something that makes you try to beat the train to the crossing; it gets you across long before the train is due.

Sexton and Vicinity

Jim Bohannon spent several days last week visiting relatives in Rushville.

Miss Mary Pennington visited her brother, J. W. Pennington near Mays last week.

Miss Eva Bradburn visited her cousin, Miss Lavone Short one day last week.

Mrs. Carroll Clifton of Ging was here the latter part of last week helping to care for her father, Elsworth Kiser, who is seriously ill with the flu. He shows very little improvement.

Orville Porter, who has been very ill with pneumonia, remains about the same.

Mrs. M. L. Pratt and son Richard spent Friday afternoon with Mrs. John W. Pratt and children in Spiceland. Wilma Pratt returned home with them for an extended visit.

Marion McBride and Raymond Whitton attended a Haymakers convention at Madison Friday.

Mrs. Vester Casey and children called on Mrs. Ora Blackburn in Rushville Saturday afternoon.

Mr. and Mrs. Fred Myers, William Utler and Charles Myers were in Richmond Saturday.

H. C. Morgan and son J. S. Teague and three sons N. B. Schell and J. M. Morgan spent the evening with Mr. and Mrs. E. L. Pennington and children Saturday.

Myron Addison visited Marion McBride Saturday night and Sunday.

Mr. and Mrs. Carroll Clifton and daughter of Ging spent the day Sunday with Mr. and Mrs. Elsworth Kiser. Mr. and Mrs. William Kiser and daughter spent the afternoon with them.

N. B. Schell was a dinner guest of Mr. and Mrs. E. L. Pennington. Fay Whitton, Mr. Scott, Charles Elford, Jim Bohannon and Delbert Hobbs were afternoon callers.

Miss Gladys Casey spent the day Sunday with Miss Thelma McConnell, daughter of Mr. and Mrs. Albert McConnell.

Mr. and Mrs. Ernest Burton and son of Connersville Mr. and Mrs. Fred Myers, William Utler, Mrs. William Myers, Mr. and Mrs. Walter Martin and son, and Charles Myers visited Mr. and Mrs. John Myers and daughter Sunday.

Mr. and Mrs. Harley Beeraft and children spent the day Sunday with Mr. and Mrs. Charles McCorkle.

Mr. and Mrs. William Lucas of Newcastle called on Mr. and Mrs. O. C. Thompson Sunday afternoon.

Mr. and Mrs. John Cleavance and daughter Mossie spent the day Sunday at the home of Mr. and Mrs. Harve Bradburn.

Mr. and Mrs. Bert Hobbs and daughter of Rushville visited relatives here Sunday.

Mr. and Mrs. Harry Becher entertained Sunday Mr. and Mrs. Howard Becher and daughter of Greensburg and Charles Becker of Rushville.

Mr. and Mrs. Charles F. Culbertson had for Sunday dinner guests Mr. and Mrs. Caleb Francher and daughter Lucy of Ging, Mr. and Mrs. Will Sheral, Charles Marshall and Vernon Culbertson. Mrs. John Kirk and daughter Margaret were guests during the afternoon.

Mr. and Mrs. John W. Pratt and little daughter Marjorie of Spiceland spent Sunday with Mr. and Mrs. M. L. Pratt.

Fred Blessinger was in Newcastle on business Monday.

Miss Marie Hayes of Indianapolis spent the week-end with Mr. and Mrs. Dock Kirkpatrick.

Orville Porter, who has been seriously ill, is improving.

Mr. and Mrs. John Graves and family spent Sunday with Mr. and Mrs. William Joyce and family.

Mr. and Mrs. Will Wright and family entertained Sunday for dinner their son Carl of Cincinnati and Forrest Marshall, Elvin Fowl, Miss Alta Fowl, and Laura Maple of Rushville and Margaret Warfield of Indianapolis.

Wilbur Winkler, Herschel Hankins, Howard Aldridge, Carl Aldridge, Russel Hamons, Reginald Sweet, the Misses Dorothy Ellerman, May Aldridge, Virginia Davis and Helen Winkler spent Sunday evening with Frances and Byron Smith.

Mrs. Paul Norris and children spent Thursday with her parents, Mr. and Mrs. Hal Green and family.

Miss Frances Baker of Indianapolis spent the week-end with Mr. and Mrs. Ross McBride and family.

Mrs. George Hay spent Friday with her son, Mr. Snoddy of near Glenwood.

Mr. and Mrs. Soden Lee and Mary Avis Hankins of Richland spent Sunday with Mr. and Mrs. Everett Lee. Mr. and Mrs. Frank Lee and family were visitors in the afternoon.

Mrs. Dale Fisher and Miss Dora Winkler visited Mrs. Ray Sample Sunday afternoon.

Another good town to erase from your touring list for this summer is Sofia.

MAYREJOIN TEAM BY LAST OF MONTH

Babe Ruth Will be Able to do Bench Duty When Yankees Return East May 28

RECOVERY HAS BEEN RAPID

Giants Lose Only Two Games to Western Clubs—Robins Doing Almost As Well

By HENRY L. FARRELL
(U. P. Staff Correspondent)
New York, May 20—Babe Ruth will be able to join the floundering New York Yankees when they return home after the first western invasion of the year. The team will be back in the east May 28 and the Babe should be ready to do some bench duty.

His recovery from the operation he underwent was more rapid than expected, but he is weak and soft from being in bed for more than five weeks. He is to be permitted to work out every day at the Yankee stadium but the doctors have warned him not to do too much.

"I think I've learned by this experience to take care of myself," the Babe said. "I was never sick before and I never want to be sick again."

Ruth's return to the game is almost certain to improve the Yankees, who have been in a very low state of mind. It isn't the actual batting or fielding of the Babe that is needed. It is the Ruth threat and the morale effect of the Babe upon the opposition. Ball players say that even the best of pitchers are worried when Ruth is in the game and that the threat affects their pitching against the other batters. When Ruth is not in the game opposition clubs considered the Yankees merely as a baseball team and they have been treated as such this season.

The Yankees have not been going right at all. When the pitching is good they can't get runs. When the team is batting the pitching goes bad and when the batting and pitching is ordinary the fielding falls off.

The Yankees are the only eastern team that is failing to hold up its end through the first intersectional struggles over the season.

The Giants have lost only two games to western clubs—one to Chicago and one to St. Louis. The Brooklyn Robins are doing almost as well, having lost only three games—to Pittsburgh, St. Louis and Chicago. The furious Phillies have lost four games to the west—two to the Pirates and one each to the Cardinals and the Cubs.

The Cincinnati Reds took a bad tumble when they hit the east—losing four games in New York, three in Brooklyn and one in Boston.

The Philadelphia Athletics, setting the pace in the American League have lost only two games since they have been in the west and they were both dropped to the Chicago White Sox. The Washington Senators lost four games—two in Chicago, one in Cleveland and one in St. Louis.

The Yankees left a trail behind them all over the west. They lost three in Chicago, one in St. Louis, and two in Detroit. The Red Sox dropped four in Cleveland, three in St. Louis and two in Detroit.

SPORT CHATTER

Boston—Harvard athletic officials expect the big stadium to be filled Friday when Paavo Nurmi, Finnish running star, makes an attempt to establish a new world record for a mile. Admission is to be free and the athletic commission said more tickets had been applied for than for a Yale football game.

New York—Louis B. Daily Jr., of East Orange N. J., has been added to the team of young players that is to be sent to Wimbledon next month by the United States Lawn Tennis Association to play in the British national championships. Ray Casey and Johnny Hennessey were appointed some time ago.

Michigan City, Ind.—Wayne "Big" Munn is training for his Decoration Day bout with Ed Strangler Lewis by climbing trees. Lou Talaber, former middleweight champion who is training him, convinced Munn that it was a good conditioner and now has a hard time pulling him away to grapple with his sparring mates.

Chicago—The national A. A. U. women's track meet is to be held at Pasadena, July 11. Fred Steers, president of the Central A. A. U., and chairman of the event announced today. It will be sponsored by the Pasadena Athletic and Country Club.

WHEN SANDE AND FLYING EBONY TRIUMPHED

Under the skillful handling of Earl Sande, jockey, who recently left a hospital cot, Flying Ebony raced to victory in the Kentucky Derby. It was the first time in the history of the great racing classic that a field horse finished first. In the top picture Sande is shown near the rail leaving Flying Ebony out for the home stretch. Below, Sande is shown leading for the wire.

Dundee Through

By HENRY L. FARRELL
(United Press Sports Editor)

New York, May 20—"Get him back for fifteen rounds and I'll knock him out," Johnny Dundee, veteran of sixteen hard years in the ring told his manager, Jimmy Johnston, after he had lost a twelve round decision to young Sid Terris.

Everyone at the ringside at that last boxing show in historic old Madison Square Garden left the arena convinced that Dundee was through as a first class fighter.

"It's a shame to see that fellow try to keep on going. He's only the shell of the old Dundee and he's bound to get it sooner or later," a friend remarked to Johnston after the fight.

"He doesn't think so. He thinks he won the fight and I think that the worst they could have given him was a draw," Johnston replied.

No manager wants to admit that his fighter has been licked and for all his loyalty it took no great power of observation to see that Johnston was badly worried all during the fight and that he was greatly relieved when the final gong found the great little man off his feet.

Johnston sharply rebuked Dundee after the first round for working too fast and for jumping around the

FIGHTS AND FIGHTERS

Chicago—Charley Phil Rosenberg, bantamweight champion and Harold Smith, the Chicago stoicks-wallopers, wound up their training today for their title bout at East Chicago, Ind., Friday night.

Kansas City, Kans.—"Young" Stribling and Hughie Walker, light heavyweights, fought a 10 round no decision bout here last night. Walker failed to land a clean blow until the 8th round and the Georgia school boy had things all his own throughout.

New York—Sammy Mandell, Rockford lightweight, and Sid Terris, New York, probably will be matched for one of the first fights in the new Madison Square Garden. Eddie Kane, manager of Mandell said.

Several promoters wanting this match this summer were turned down because he preferred to wait and take a date in the Garden.

New York—Tommy Gibbons, St. Paul heavyweight, returned to At-

RECOVERY EXPECTED

Mrs. John W. Lindale of Nolte Township returned to her home Saturday after being in Memorial hospital at Connersville for five weeks. Mrs. Lindale underwent two operations. She is improving slowly but her ultimate recovery is expected.

NORTHWESTERN WILL

PLAY I. U. SATURDAY

Crimson Batsmen Will Have Chance
To Increase Percentage in Base-
ball Game

OHIO STATE IS SLIPPING

Bloomington, Ind., May 20—Indiana University will remain in second place in the conference baseball race until Saturday when the Crimson batsmen will have a chance to increase their percentage at the expense of Northwestern. Ohio State seems to be slipping from the first place position which it had undeniably for several weeks, losing to Illinois last week and facing hard games within the next few days. A return game with the Illini this week will precede a three-day series next week, when Wisconsin is played at Madison on Thursday and the Minnesota nine is met at Minneapolis on both Friday and Saturday.

Indiana on the other hand has a comparatively easy schedule for the remainder of the season. All of its games are with teams which it has beaten before in the season, including Northwestern and Purdue, the conference tail-enders. The Chicago game at Bloomington should be the hardest of the remainders of the season as the Maroons have been playing superior baseball during the last few weeks. Iowa, the team which is tied with Indiana for second place has three hard games left, one with Minnesota and two with Michigan.

Indiana on the other hand has a comparatively easy schedule for the remainder of the season. All of its games are with teams which it has beaten before in the season, including Northwestern and Purdue, the conference tail-enders. The Chicago game at

The Glenwood Embroidery Club afre, to an audience of fifteen hundred people.

CROWE IS AROUSED BY DISAPPEARANCE

Continued from Page One
took in order to get the \$1,000,000 McTinto estate.

White was the only person able to corroborate the testimony of "Dr." C. C. Faiman to the effect that Shepherd came to Faiman's diploma mill correspondence school in search of germs.

"We'll take drastic action against any one found tampering with witnesses," Crowe announced. "We'll carry the case to the grand jury if we get evidence that White was spirited away."

White's disappearance was discovered yesterday.

Crowe's investigators found that he had quit his position and moved away from his South Side residence.

White's wife left a note with a neighbor telling her that she and her husband were leaving and asking the neighbors to take care of their household goods.

"We had to leave there; our lives were in danger," the note stated. "We are living in a hotel until after the trial."

While Crowe was investigating the insinuation that White had been

warned of violence another "tip" came to his attention. A blind newsboy in the neighborhood declared White had told him he was going to Florida—that \$25,000 and a furnished cottage was waiting for him if he left Chicago.

"Whether it was by bribe or fear of violence this man has been tampered with," Crowe said. "We'll prosecute anyone guilty of tampering."

William Scott Stewart, and W. W. O'Brien, attorneys for Shepherd, denied any knowledge of a plot to have White disappear. They issued a statement, declaring they had obtained from White an affidavit in which he denied his previous statements.

"We didn't have anything to do with White's disappearance," the statement declared. "We were counting on him as one of the defense's best witnesses because he admitted Faiman's charges against Shepherd were untrue."

Selection of the jury which is to try the Shepherd case was held up meanwhile until 2 p. m. Judge Thomas J. Lynch holding no morning session of court. He wanted to attend the funeral of a former Chicago politician.

POSTMASTERS ELECT
Indianapolis, Ind., May 20—Leslie Konkle, Versailles, was chosen by postmasters of Indiana as head of the state association at the close of their annual meetings here late yesterday. Other officers: John Clapp, Beach Grove, vice president; Charles Noble, Rolling Prairie, secretary-treasurer.

LIONS CLUBS MEET

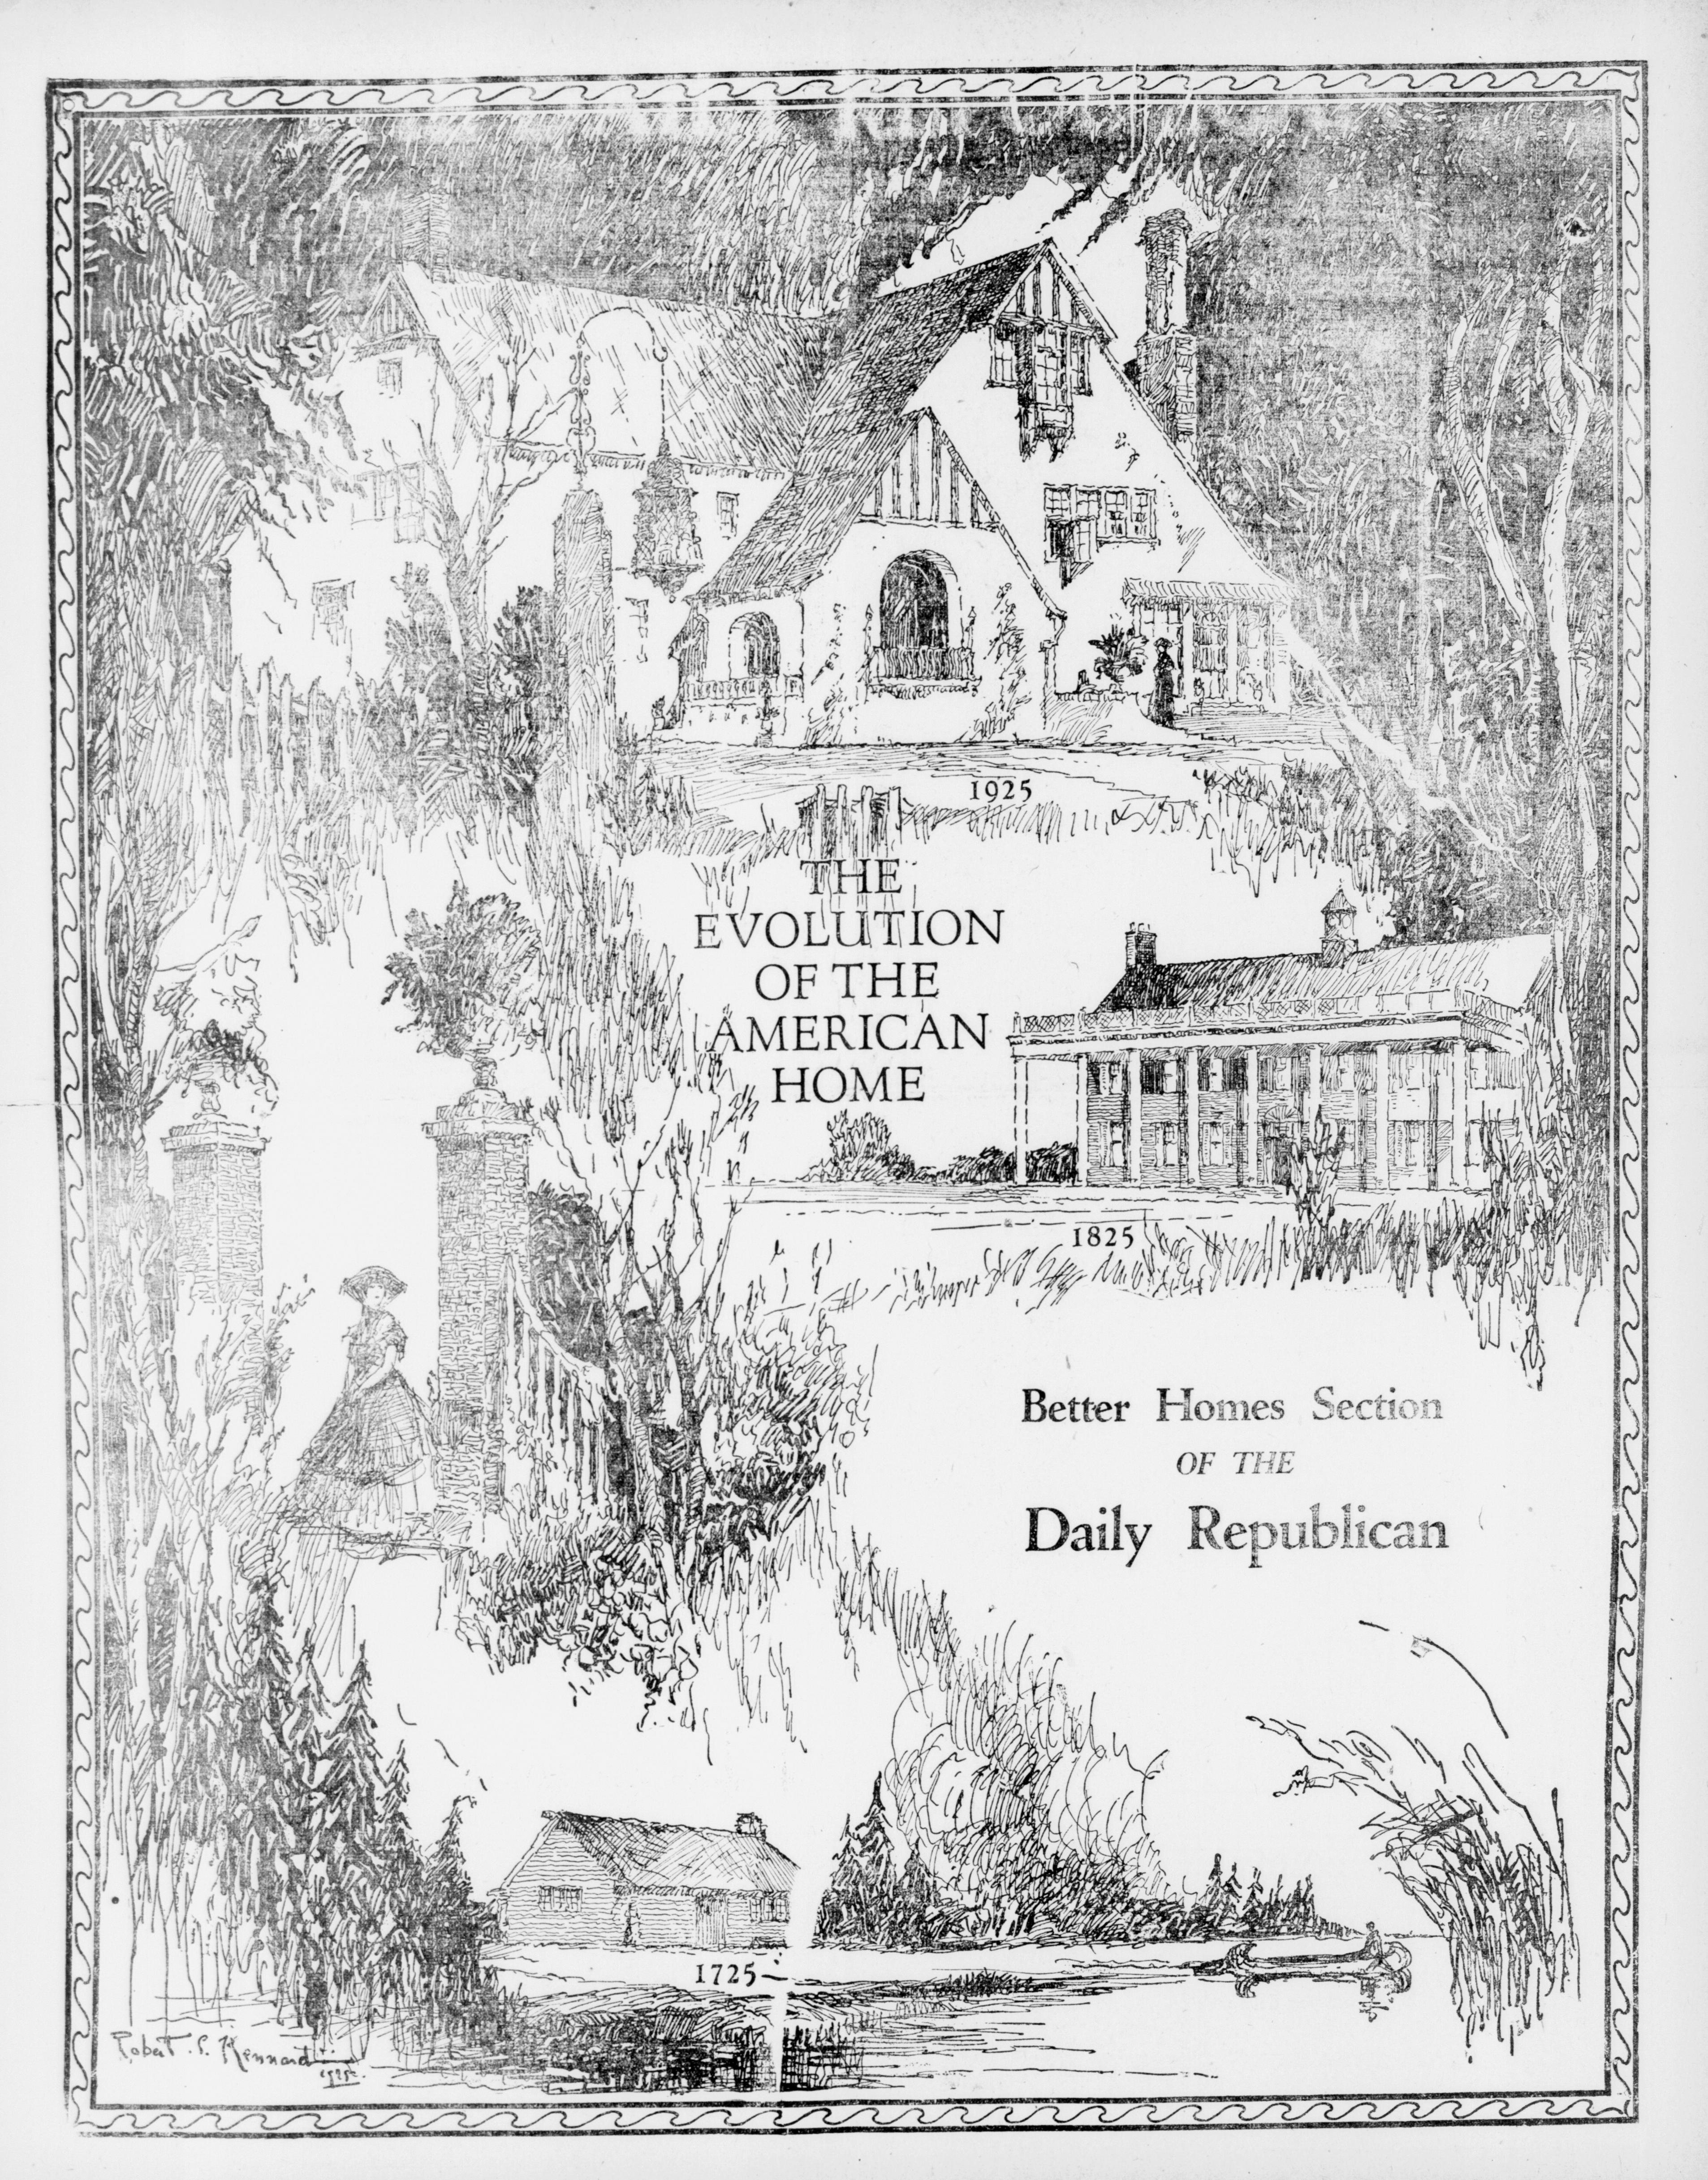

Kokomo, Ind., May 20—Indianapolis and Fort Wayne were both in the race for the 1926 Lions convention in session here today. Fifteen clubs are represented with 400 delegates. Officers will be named late today.

DEMAND COMFORT AND CONVENIENCE

COOKING PROBLEM SOLVED BY RANGE

People Think of House as Home Making and Character Building Environment

DIFFICULT TO SELL NUMBER

Demonstrated That it is More Profitable if Not Easier to Sell Home Than to Sell Material

Ability to sell is the first step toward success in any business, and in modern merchandising the desirability of the goods is stressed more than the price asked. Perfection in manufacture and satisfaction in use cut more figure than cost, because they are the real elements of value and because goods sold on that basis are well sold.

Nowadays quality is a more comprehensive term than formerly. In times past, when clothing was not cast off with each change in style, resistance to wear was the first consideration; but now style, fit and appearance take precedence. In the old days the home builder's first consideration was shelter, and the home of those days defied all the canons of comfort and convenience. Now nobody is content with what formerly was beyond the reach of the wealthy. Folks want comfort and convenience in their homes and they expect them to be attractive and up-to-date. They no longer think of a house as of so many boards, but rather as an agency for providing a home-making and character-building environment, a place of contentment and happiness.

Lumbermen who still try to sell boards by the thousand feet are having increasing difficulty in meeting the competition of those who sell complete houses embodying every thing that home signifies to the modern family. Well manufactured lumber, properly graded and suited to the purpose, is presumed. What the buyer has in mind and what the seller ought to keep in his mind is a home, and the fact is being daily demonstrated that it is more profitable if it is not easier to sell a home than to sell the material to build it. The lumber cost is a small part of the whole cost, and nobody can have a home without spending more for other things than for lumber. To talk about the lumber instead of the home is to miss the strongest appeal and to stress cost where satisfaction is sought.

Righteous prices should be charged for lumber as a matter of common honesty and sound policy, but the thing to visualize is the complete structure and the satisfaction it will bring to the buyer and to his family. He must be made to want a home enough to deny himself nonessentials in order to get it. Selling lumber, therefore, ought to be selling the home-owning, home-improving idea, the comforts conveniences and advantages of home-ownership, rather than the dispensing of the materials from which a house is built. To sell lumber in this modern way is merely to apply in the lumber yard methods that are in the vogue everywhere else. It means that homes shall be bought as clothing, furniture, automobiles and everything else, except lumber, is bought.

By any method hitherto employed, cooking has involved a tremendous waste of fuel—a costly waste in the case of the average family. Only a small proportion of the heat generated by the ordinary gas range is actually used in the cooking. The rest passes away as waste—worse than waste, for it spends itself in overheating the kitchen to temperatures at least ten degree higher than the rest of the house.

Shrinkage of food is another costly item. Careful tests prove that the average dish cooked in customary ways will lose from ten to forty per cent of its substance during the cooked process. And the same is true of the rich juices and delicious flavors which pass off as steam or vapor and only smell up the house.

Domestic science experts long since evolved the convenient kitchen, and better general arrangements. But their efforts to improve

cooking methods have passed through many stages. After the old coal stove came, the gas range with shortcomings that were bound to be realized.

Then came a big step forward—the fireless cooker, but this cluttered up the kitchen with one extra space-taking device and had other disadvantages. Next came the effort for automatic control by harnessing thermostatic principles. But it kept on burning gas and its slight savings could be applied only to the oven, where but a small part of the cooking is done.

"But an efficient solution has been found at last in the Chambers Fire-

less Gas Range. It cuts gas bills in half, saves more than two-thirds of the time and effort devoted to cooking, and keep all the rich juices and delicious flavors in the food."

The principle on which the Chambers Range operates is that of retained heat. Both the so-called Thermodome, under which boiling and stewing are done, and the specially insulated Chambers Oven, for roasting and baking, are so constructed that they seal the heat for hours. Just a few minutes gas is required, then the housewife can go away while the food cooks with the gas turned off.

The following women have pur-

chased and are now using the Chambers Fireless Gas Range:

Mrs. Robert L. Tompkins, Mrs. A. L. Riggs, Mrs. Guy Abercrombie, Mrs. Walter Hubbard, Mrs. Will Norris, the Methodist church, Mrs. L. M. Green, Mrs. Charles Green, Mrs. Ambrose Gohring, Mrs. Fred Beale, Mrs. William Meredith, Mrs. William Brann, Mrs. Marion Finney, Mrs. Harry Euler, Mrs. Charles Worland, Mrs. Albert Stevens, William Ruhman, Mrs. F. R. McClanahan, Mrs. Morris Howell, Mrs. L. M. Clark, the Sleeth Sisters, Mrs. Glen Foster, Mrs. Harry Petty, Mrs. Fred Osborne, Mrs. William Carter, Mrs. Sallie Henley, Mrs. Eliza Billings,

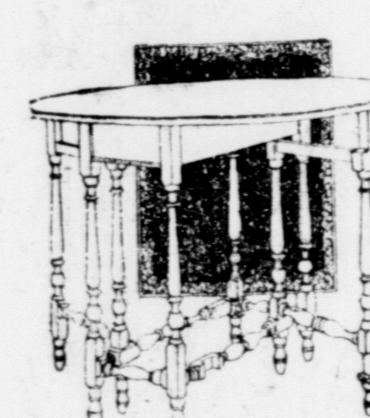

Mrs. Paul Boehm, Mrs. Austin Frazeze.

Mrs. O. L. Carr, Mrs. John Wallace, Mrs. Tom Arneke, Mrs. Glen Gregor, Mrs. Roy E. Harold, Mrs. Bert O. Simpson, Mrs. Ollie Brown, Mrs. C. G. Clark, Miss Bertha Schantz, Mrs. Harry Randall, Mrs. Link Gulin, Mrs. Ray Compton, Mrs. Ed Carter, Mrs. John Frazee, Jr., Mrs. Inlow, Mrs. Ella Osborne, Mrs. William Knecht, Mrs. Clarence Cross, Mrs. Clen Miller, Mrs. Lee Endres, Mrs. Kinsinger, Mrs. Albert Allen.

Mrs. Vorhees Cavitt, Mrs. George Looney, Mrs. Tom Kelley, Mrs. D. H. Dean and Mrs. Dan Matlock.

GREAT INCREASE MADE IN USE OF ASBESTOS

That there has been a great increase in the use of asbestos in building materials in the last two years is shown by a report just issued by the Department of Commerce. In 1921 the total value of these products was \$5,167,733, while in 1923, according to the biennial census of manufacturers, it was \$8,252,110. Throughout the industry covering the entire country there was an increase of 109.4 per cent in the manufacture of asbestos products, not including textiles.

For the Extra Table Choose a Gateleg

One who has made an extensive study of the progress of cooking efficiency has this to say on the subject: "We are all used to accustomed ways of doing things that often we fail to realize the gross inefficiency and waste in many of our methods. Perhaps the most outstanding example of this is cooking.

Cooking probably entails more different kinds of waste today than any other important task performed in the whole civilized world by either man or woman.

First of all is the waste of effort. Cooking means drudgery to thousand of women bending over ranges, "pot-watching," basting—tied to the dinner-urn."

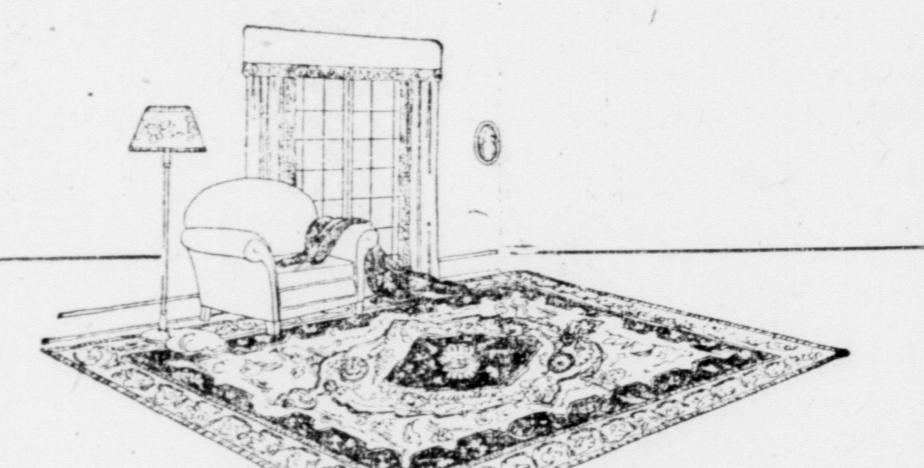

It means the use of hours every day that are needed for other things, for sewing, for readings, for entertaining guests, for calling, for shopping, for cleaning, for attention to the children, for the thousand-and-one things that demand a woman's time. If she leaves her kitchen while dinner is cooking with the gas turned on she worries about danger and the possibility of burned or dried-up dishes, especially if she should return later than she expected.

By any method hitherto employed, cooking has involved a tremendous waste of fuel—a costly waste in the case of the average family. Only a small proportion of the heat generated by the ordinary gas range is actually used in the cooking. The rest passes away as waste—worse than waste, for it spends itself in overheating the kitchen to temperatures at least ten degree higher than the rest of the house.

The pleasure of buying the thing you want at the price you know is right is further enhanced by the spirit of co-operation you will always find here when you do not wish to invest the total price immediately. Time payments that fit in with your plans may be conveniently and readily arranged.

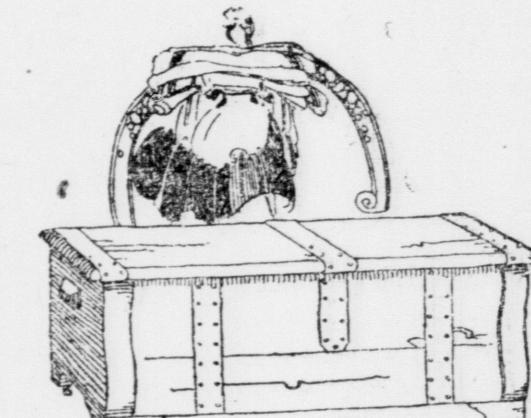

Shrinkage of food is another costly item. Careful tests prove that the average dish cooked in customary ways will lose from ten to forty per cent of its substance during the cooked process. And the same is true of the rich juices and delicious flavors which pass off as steam or vapor and only smell up the house.

Domestic science experts long since evolved the convenient kitchen, and better general arrangements. But their efforts to improve

Inviting Values in Rugs

Through very cautious buying, we are able to offer you Rug values of the most attractive character. Rugs that will give you excellent satisfaction and wear. Come and see them.

Store Your Furs at Home

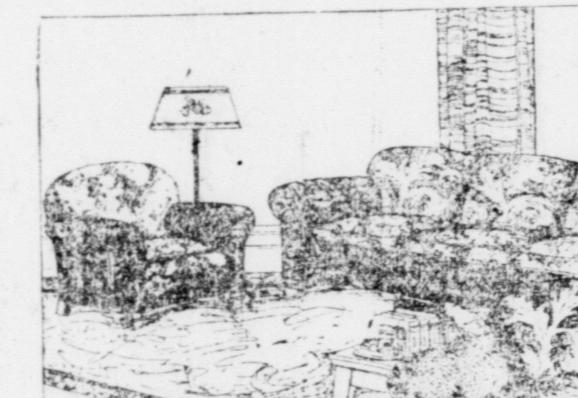

It won't be very long now when you will be shedding your fur coats and heavy blankets. These big Cedar Chests will hold them all and keep them free from moths and dirt till you need them again. Specially priced

HOME OWNERSHIP GOOD INVESTMENT

Relatively Low Price of Property in Rushville is Additional Argument Locally

HOME OWNERS PROSPEROUS

Payments Can be Arranged so That Most Anyone May Buy One—Rushville's Advantage

Owning one's home in Rushville has taken on the qualities of a safe and profitable investment.

To every argument advanced anywhere to home ownership, one additional reason for purchase exists in Rushville. The relatively low price of property here, due to the fact the ground upon which houses are built in Rushville costs less than in any other city of this size. Lot prices elsewhere are two or three times what they are here.

There exists only so much land for nice homes and its tendency is to advance in value. In Rushville there is a wider margin for advancement in well located residential ground than in any city anywhere. Rushville is increasingly known as a city of attractive homes.

Payments can be so arranged that today almost anyone can buy a home. One's own experience supports the statistics which indicate that those who have exercised the privilege of home ownership have prospered beyond those that have paid rent. The home purchaser should be protected by a city plan commission and the zoning law against the encroachment of undesirable intrusion. Then, blighted residence areas will be of the past. Owning a home, therefore, becomes not only more desirable, from the view of happier home surroundings, but it becomes a safe investment.

The desirability of such an investment in Rushville has been greatly enhanced within the last six months owing to the locating here of several new factories. Statistics show that populations increase four or five times as much as the increase in the number of men employed. Such an increase in population naturally increases the value of all city property and clearly stimulates building. Since the older portions of Rushville are already thickly built upon, the new building activities will be concentrated in the newer sections of the city.

Care, however, must be taken not to mar the beauty of this city of homes by indiscriminate building. A great step to eliminate such an undesirable condition has been taken by the forethought of the present council in providing a large new park and school site in the north end. The necessity for public parks is increasingly apparent to municipal government as the trend of population continues toward the cities. The importance of park use of woods and forest is becoming impressed upon the people not only from the viewpoint of natural beauty but also from the saving of large expenditures for the inclosing of such water areas. This is now in particular evidence owing to the agitation to inclose, at an enormous expense, that portion of

GOOD PAINT KEEPS HOUSES IN REPAIR

When you consider the painting of your property, be sure to look at the matter from the standpoint of economy and conservation. Any piece of property not painted at least once in four years depreciates in value and costs from five to ten times as much in repairs as the paint and varnish required to keep it permanently in good condition. For example, a well painted house will last from five to ten times as long as an unpainted structure. In other words, a house that is protected with paint at regular intervals will be in perfect condition after five or ten unpainted houses have in turn become uninhabitable. This applies to painting and varnishing inside as well as outside. While outside surfaces have to resist weather, inside surfaces have to resist wear—the touch of hands, the grinding of feet, the contact of furniture—and a thin film of paint or varnish 1/400th of an inch thick will give ten times better protection than a sheet of steel of equal thickness.

Hodges Branch that is already built upon. An expenditure of this kind will never be required north of Ninth street because it is surrounded on both sides by beautiful park lands.

The objection is sometimes offered that parks and playgrounds decrease real estate values but experience has shown that where properly planned the value of property adjoining parks and play areas has increased rather than decreased. The provision of play grounds and recreation centers attracts buyers. People are increasingly anxious to have homes in sections which can offer safe places for their children to play and tennis and other forms of recreation for themselves. Property adjacent to park lands has been known to increase ten or fifteen times more than it ordinarily would. For these reasons Rushville is particularly fortunate in having acquired this wood land and stream for park purposes.

It has at the same time had provided for it a new addition known as Memorial Park addition which adjoins this park and the fine residential district at the north end of the city. The primary object of the owners of the addition is to make it the best residential district of the town and since the better residences can go only to the north, this is assured. Its closeness to the new park is also an added attraction and will influence prospective home builders from the man of modest means to the man of highest means to locate in it.

Care and discrimination should, of course, be used at all times in investing in city property but the individual who is alert will readily see the possibilities which are offered him not only from the standpoint of financial gain but from the standpoint of desirable residence sites in investing in city property at this time. The new factories have not yet reached the stage of employment and naturally prices have not yet been raised. However, as soon as employment does start, prices will naturally go up and the man who invests now will be the gainer.

I FAVOR the policy of economy, not because I wish to save money, but because I wish to save people. The men and women of this country who toil are the ones who bear the cost of the Government. Every dollar that we carelessly waste means that their life will be so much the more meager. Every dollar that we prudently save means that their life will be so much the more abundant. Economy is idealism in its most practical form.

Calvin Coolidge.

Complete Stock of Well Paper Designs is Necessary for Retail Trade in Small Cities

PEOPLE EXPECT GOOD SERVICE

Walter Hubbard of Johnson's Relates Experience With Mail Order Competition in Wall Paper

"The retail wall paper dealer must carry a stock of the season's latest creations in decorative wall paper coverings as well as a complete stock of the regular wall paper which he is compelled to carry, so that he may at all times be able to supply his trade with all of the different grades," declared Walter Hubbard of F. B. Johnson and company, in commenting on the services which the local interior decorator gives his customers, as compared with outside competitors.

"Your retail dealer carries this stock for the benefit of his customers in the city and in the surrounding country. You are at liberty to go to his show room and have him show you everything that is new and up to date in his line. He does not ask you to send him a money order in advance to cover the cost of the paper that you select, and you are at liberty to return for credit any unused rolls; in fact, he is really giving you more in quality and in his service to you than any mail order house in the country.

"He not only gives you this ser-

SAND AND OIL ARE GOOD TO KEEP TOOLS CLEAN

Speaking of tools prompts a practical suggestion for scouring them. For large tools, such as hoes, spades, shovels, etc., fill a small box with sand and over this pour a quart or two of old cylinder oil.

Push the blade back and forth through this sand whenever any rust occurs and you will never be bothered with rusty tools. The sand removes rust already formed, the oil coats the surface and checks the tendency for it to occur again.

For smaller tools use fine sand and coal oil in a small tin pail.

are just as essential to their business success, consequently they are coming to understand each other better and the result is bound to be greater success for both.

The business man in the country or the business man in town who thinks he can live by himself, is fooling nobody but himself.

Referring back to the mail order buying, I want to relate an actual experience which happened in Johnson's decorating department. Mrs. X came in carrying a postage money order in her hand, made payable to one of the large mail order houses, and sat down in our show room. She expressed desire to see some of our bedroom papers, stating that she had four rooms to paper and wanted to see what we had, after getting all of the data necessary to show her intelligently, size of the rooms, location etc., I began showing her what I thought would be suitable for her rooms. After she had selected the papers, she asked me what the four rooms would cost. I figured them up for her and told her the figure and this is what she said to me:

"Did you figure the border too?" When I told her that I had figured everything necessary to do the four rooms, she asked me if the postoffice would take back money orders and I told her that they certainly would. She told me to tie up the four rooms for her and informed me that I had saved her two dollars and ninety-three cents in the transaction for the money order which she carried was to pay for four rooms of bedroom paper which she had selected from a little sample book which showed only a part of the pattern and for which she was compelled to send the money in advance and pay the parcel post in addition. When she came back for her paper, she told me that she would certainly tell her friends who considered buying from the mail order houses to shop at Johnson's first and I guess she must have told several by the amount of wall paper that we have been selling.

My opinion is that the small town merchant who stocks quality merchandise and styles that the people demand, will have no cause to complain about poor business.

Nine out of ten merchants whom you hear complaining about the other fellow buying merchandise outside of his home town—if you will watch him closely and also watch his family, you will find that he is doing that very thing himself and is trying to shield himself by criticizing the other fellow. If every business man in the country and every business man in town would make up his mind to buy merchandise in Rush county instead of outside of the county, what a wonderful county we would have.

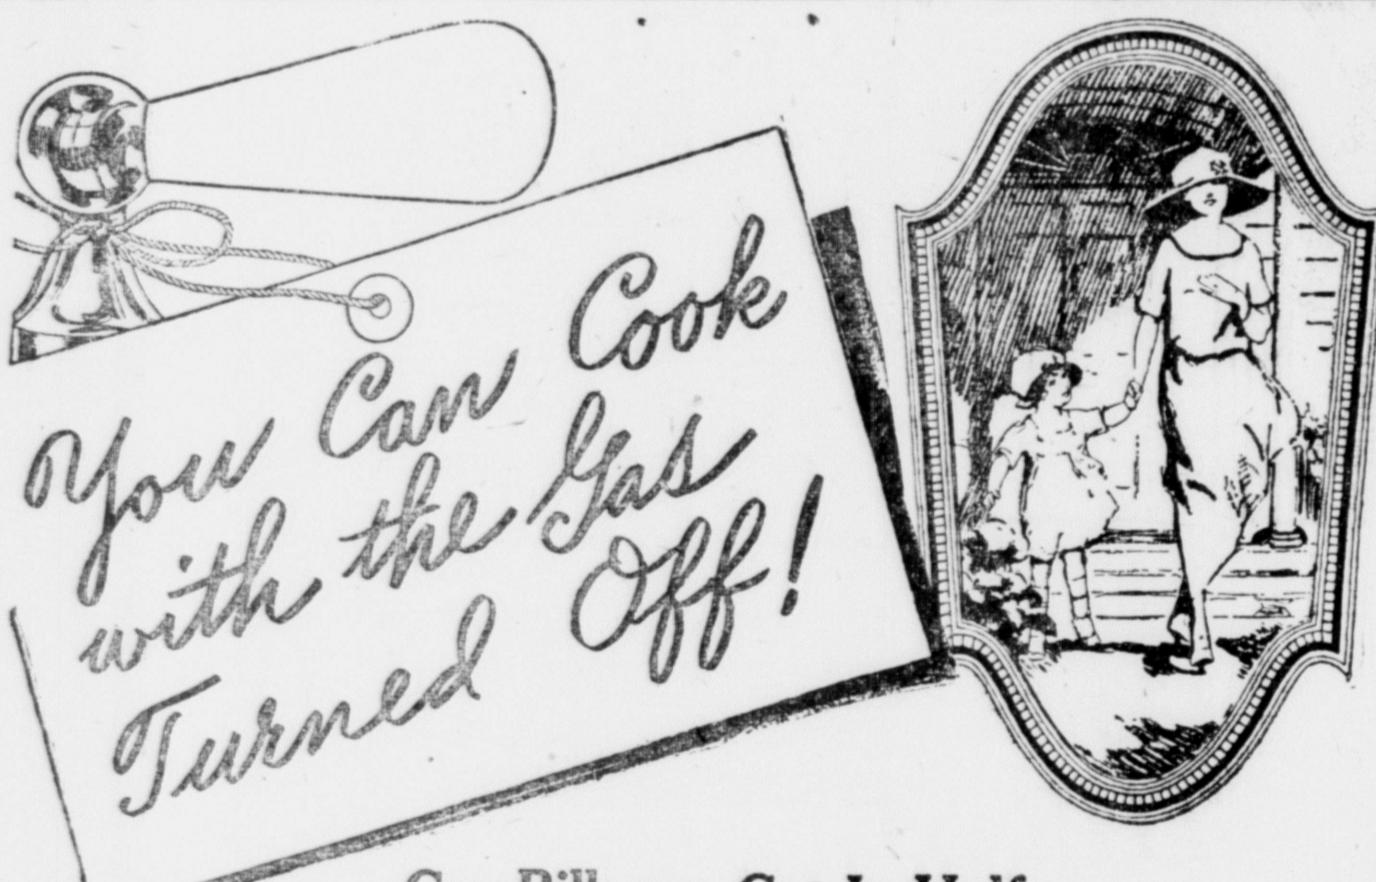

Lets all pull together and make Great Rush County greater still.

BETTER HOMES For Rushville and Rush County

To insure real economy in your home decorations, first select Floor Coverings, Draperies and Window Shades of sound, artistic value, then be sure their construction is as sound as their art.

Quaker Curtains and Nets, Whittall Rugs and Brenlin Window Shades are Famous for Their Lasting Beauty

THE NAME QUAKER, WHITTALL OR BRENLIN IS A QUALITY INDEX LIKE THE KARAT MARK ON SOLID GOLD.

**WHITTALL RUGS
RADIATE BEAUTY
IN ANY SURROUNDINGS**

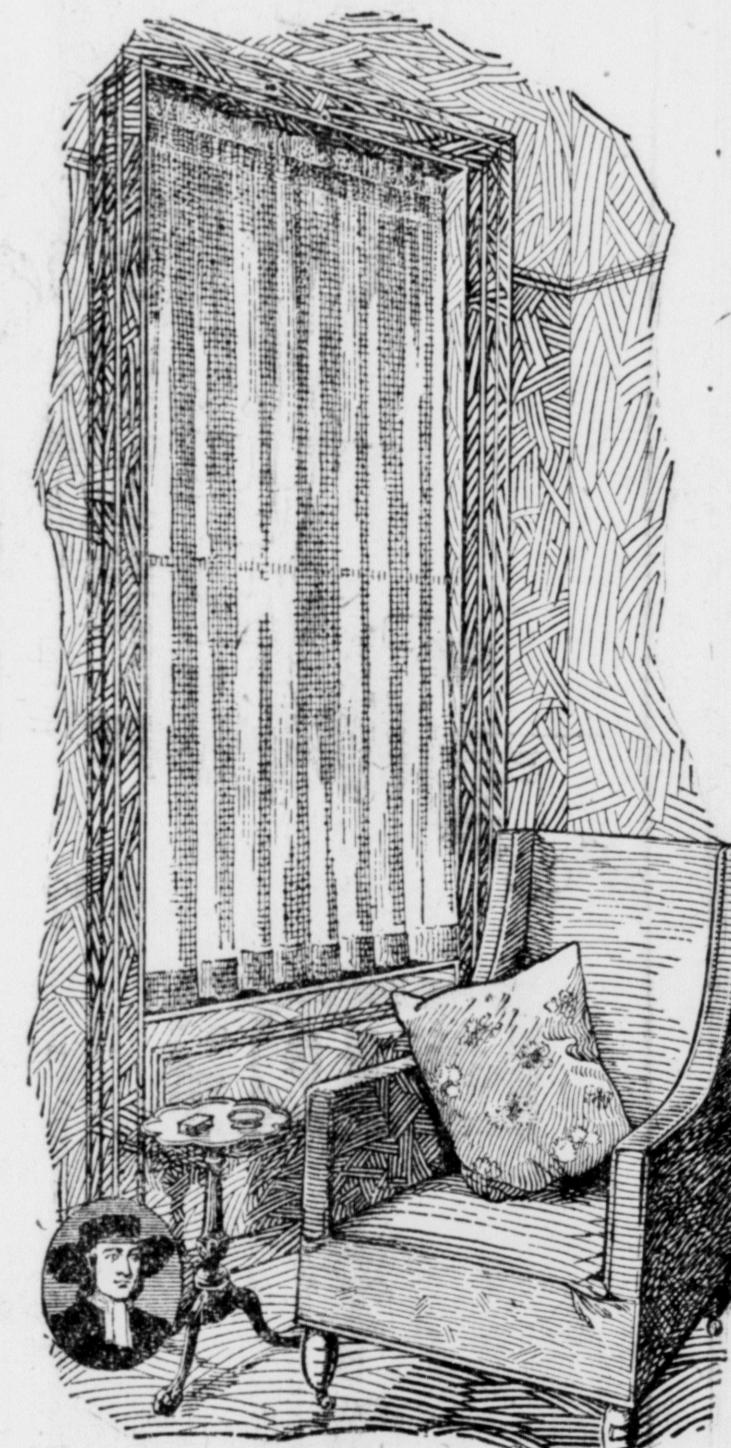

Whenever a Manufacturer or Retailer earns a reputation for producing or selling the finest things in their line, some people assume that their prices must necessarily be high. Often they are referred to as "High Priced" lines. That's the penalty many Manufacturers and Retailers pay for leadership.

And so—because Whittalls have earned an enviable reputation for making the very finest of American Rugs some people imagine they must pay more for them—Yet

**THERE ARE NO RUGS IN AMERICA
OF SUCH HIGH QUALITY THAT
CAN BE BOUGHT SO REASONABLE.**

Another point which will appeal to you is the fact that the price on every rug in our store is marked in plain figures. That is the price to everyone, and no one buys for less. So—
A PERSON WHO KNOWS NOTHING AT ALL ABOUT RUG VALUES CAN BUY OF US AS ADVANTAGEOUSLY AS AN EXPERT

The next time you are in need of rugs, Carpets or Draperies — Look around, go into any worth-while store in Indiana — See what they offer in qualities and prices, then compare those values with ours. We know you will never again leave Rushville to make your purchases. And we are confident you will follow the example of hundreds of people who buy all of their Floor Coverings at Casady's.

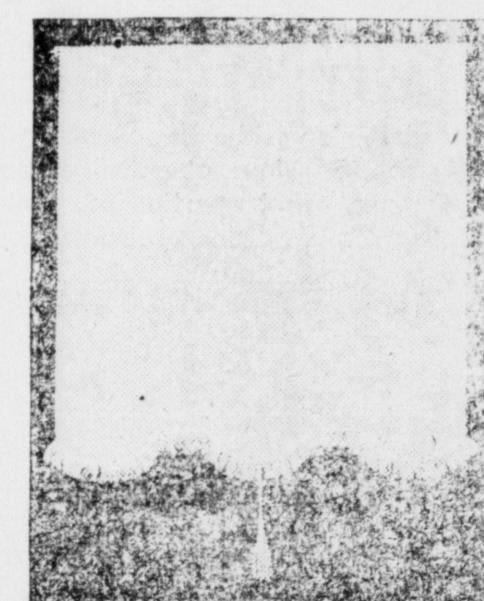

**Quaker Curtains and Nets for the Better Homes
An Extensive Array of Lovely Designs At Most Attractive Prices**

We have featured Quaker Craft Laces for a period of 15 years, and as might be expected, this merchandise has continually improved in both texture and design. TODAY QUAKER CRAFT LACES STAND AT THE VERY TOP OF ALL LACE LINES — AS NONE ARE MADE BETTER.

Shadow Lace Curtains
Well named are these curtains, one of Quaker's favorite designs, with just the right amount of transparency. Their laundering qualities are quite an added feature of their popularity.
45c to 85c Yard

For Odd - Shaped Windows
For the window which cannot be readily fitted with a made curtain we have appropriate Quaker Nets and Laces—in many cases in patterns to match the Quaker Curtains at 35c. to 75c. yard.

Quaker Filet Always in Style
Curtain styles come and go but a neat filet net curtain is always in good taste. Quaker Filet Curtains are not only attractive and appropriate but give years of satisfactory service. At 35c to 59c yard.

Casement Lace
In Casement Lace a delightfully shadowy design seems to be insinuated rather than woven into the net ground. It is never obtrusive, yet it is there, giving personality to your window decorations. The right choice for any room in which dignity is the decorative note at 65c and 85c a yard.

Brenlin "AVONDALE"

The durability and beauty of the Brenlin window shade combined with the artistic lines of scallop and fringe, assure the last touch of distinctive charm and attractiveness to the home.

We invite your inspection.

Our records disclose the names of hundreds of people who have purchased Rugs, Carpets, Linoleums, Window Shades and Draperies here. Many of them purchased everything in that line from us. And every day people who have looked in every surrounding city come back here to buy.

This proves that people have confidence in our Floor Coverings and in our Prices. And it proves that Casady's values are not exceeded.

BUILDING TRADES ARE IN ANNUAL COMMENCEMENT

Unusual Exercises Held When 200 Apprentices Receive Diplomas at Cleveland, Following Courses

OHIO HAS A SPECIAL ACT

Probably the most unusual commencement ever held by any school took place in Cleveland, Ohio, on April 10, when some 200 students, apprentices graduating from the building trades schools of that city, made their bow to the business world. Conspicuous among the graduates were young, full-fledged carpenters, and a nice balance of representatives in the other building crafts stepped off. The feature that makes this commencement unique is the fact that each graduate received a diploma, this for the first time in the history of any similar enterprise.

Growth of the building trades apprentice schools in this country has been significantly fast and strong, finding its inception in Cleveland. They are supported in part by appropriation provided by the Smith, Hughes act.

The action unfolded at the graduation exercises in Cleveland is of still greater significance than the mere entry of young men into important life work. It proves conclusively that without cooperation, without associated effort, without a recognition that each individual is as important to every other individual as he is to himself, dead center may follow.

The lads who enter the building industry equipped to do their bit of life's work have obtained their equipment through recognition by building industry organizations that the industry will be just that much better off for their support. The members of these associations know that they have helped themselves when they have helped these craftsmen.

PROTECT PAINTED FLOOR

When painting mop boards or wainscoting or walls in general, lay a strip of paper on the floor, tight against the mop board to catch the drops of paint. The paper can be moved along as the work progresses and, with reasonable care, no paint will reach the floor.

BRICK, BEING FIRE MADE, IS BEST FOR THE FIRE PLACE

There is no one material thing in the home that has so many varied aspects or so much meaning for us as the hearthstone. Sidney Smith used to say: "The fire is a live thing in a dead room." And, indeed, it does seem to respond to and express every human mood. It crawls and runs, or leaps up and dances to the stately rhythm of the minut or to wild, unbridled, bacchanic measures; it rejoices and laughs with us and, although it can not be said to weep, it at any rate darkens, cowards and sinks into seeming accord with out sad memories or melancholy reflections.

We never tire of watching its elfin flames in mad pursuit of one another, playing tag over the burning logs, or sedately tripping along like timid maidens up the church aisle. We love to hear them purr and hum as they lull us to a delightful mood of indolent reverie, or crackle and roar as if sounding drums and trumpets to heroic action.

But aside from idle fancies, nothing equals the fireplace in making the room cozy and homelike. Modern heating systems may adequately solve the problem of regular and even temperatures, but there is nothing especially genial or inviting about them.

But around your genial fireplace, reminiscent as it is of human fellowship from before the days when history began, your friends find an inviting kindness that unlocks the heart and incites the fancy to all manner of happy thoughts, intimate confidences and friendly converse. And what can be more delightful than to see the happy children crowding around the glowing embers to toast marshmallows, pop corn, or roast chestnuts!

On the strictly practical side while the fireplace, except in very moderate climates, will make little effect on the winter's cold, it will be exceedingly welcome in the early days of spring and the late days of autumn. From every point of view, aesthetic, sentimental and practical, every house, no matter what it is built of, should have at least one good fireplace where family and friends may foregather in happy converse.

And what other material is there which is so good or appropriate for the construction of the fireplace as brick? Having stood the test of

PROTECT PAINTED FLOOR

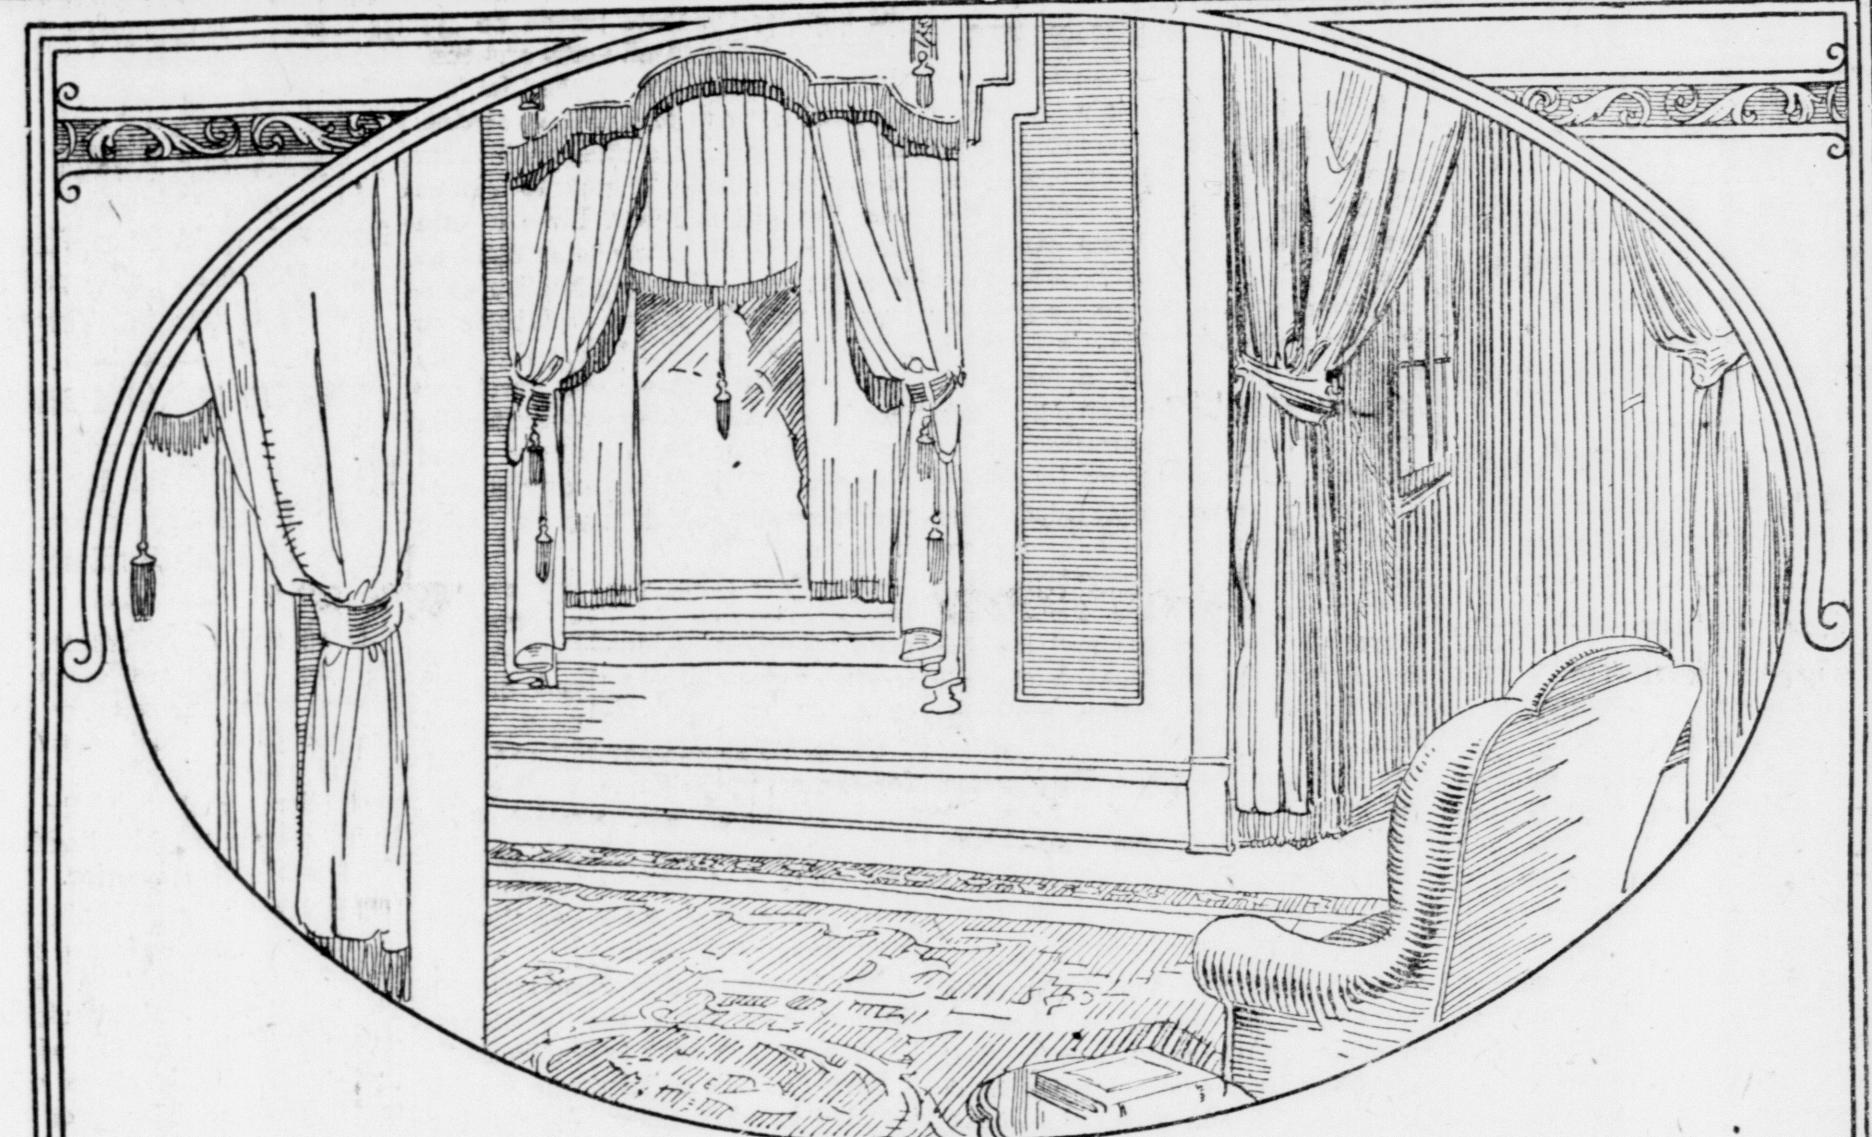

When painting mop boards or wainscoting or walls in general, lay a strip of paper on the floor, tight against the mop board to catch the drops of paint. The paper can be moved along as the work progresses and, with reasonable care, no paint will reach the floor.

Electric Installation

Providing proper and adequate electric lighting for the living room is one of the most important phases of residence lighting. But, just to have proper lighting is not enough if one desires to enjoy all the comfort and convenience that is inherent in present-day electric service.

In addition to lighting provided by ceiling and side-wall luminaries the living room of all rooms of the house should be so equipped that portable electric lamp may be used when and where wanted. Properly placed, electric convenience outlets will enable the whole family to enjoy the soft, localized light of such lamps, be it for reading, sewing, playing games or chatting. Further, these same convenient outlets can just as readily be used to serve the modern small electric cooking appliances such as the waffle iron, tea samovar, coffee percolator, toaster, grill and the like whenever whim dictates that an informal supper or Sunday night tea is to be served in the living room. This, by the way, is a most charming and delightful way of breaking the ordinary routine of life of which more people should avail themselves.

That you may make the greater use of portable lamps in the living room an adequate number of convenience outlets ought to be installed. From such a room of fair size there should be at least one such duplex outlet on each side of the room where you cannot place and connect a portable lamp.

CLEANING PLANT IS A BUSY PLACE

It is an Industry That is Not Generally Understood, But is Based on Scientific Discoveries

RENOVATES AND KILLS GERMS

Great Progress is Being Made in the Business, Due to Demands of Patronage by the Women

The cleaning industry in Rushville, as well as in this country, has grown with wonderful rapidity. It is a business, according to C. L. Bebout of the Twentieth Century Cleaners and Pressers, that is very little understood by the public, and to a great extent, misunderstood.

The modern cleaning plant is a very substantial institution, which requires a considerable investment, and its operation demands care and skill. Yet, people still speak of sending their garments to a cleaner, as if the cleaning of garments was an individual matter. You don't speak of depositing your money with a banker, you deposit it in a bank. You don't speak of taking your linens to a laundress, but you send them to a laundry. Just so, when you send your outer garments to a cleaner, they don't go to a cleaner, but they go to a cleaning plant. This cleaning plant should have a name. Some day it will have a name. For the want of a better name, those who operate a power cleaning plant are called modern, scientific cleaners.

A woman of Hutchinson, Kan., said the other day, that she did-

USE FORCED AIR TO WARM HOMES

Automatic forced air warming and ventilating systems have been brought to high state of perfection, eliminating the trouble of heating remote parts of the home caused by climatic changes, and impossible to overcome with ordinary warm air heating systems. This is accomplished by the use of a fan "air forcer," which operates only when necessary, ceases operating when the required temperature is obtained. This is accomplished by the use of a thermostat with clock attachment. When the temperature in a given room falls below the desired degree the draft opens and the fan that forces the air through the air duct is set in operation, and uniform heat is circulated throughout every part of the home. This system has been found very effective in heating large hall and other edifices that are difficult to heat in any other manner.

One other thing you may remember when spring cleaning comes to mind. Moths do millions of dollars worth of damage and breed principally in soiled garments.

Garments should not be hung away for the season without a thorough cleaning, which will protect them for several months. If they are not cleaned they should be brushed every thirty days and hung in the sun for three or four hours.

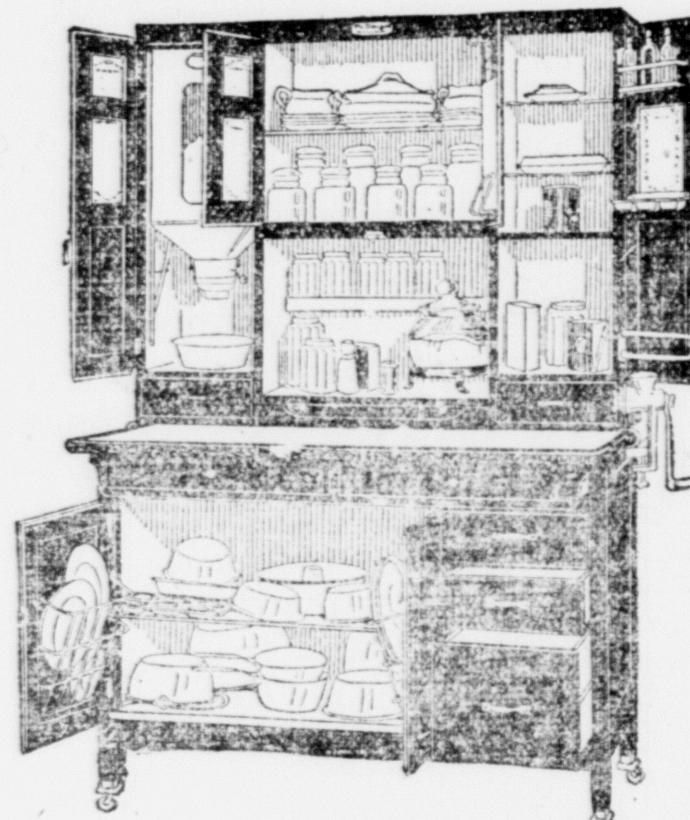

The moral of this dissertation is this—it is as old as the Scriptures: "Cleanliness is next to Godliness."

People of this vicinity who are interested in what takes place when their garments are cleaned, should visit the Twentieth Century Cleaners and Pressers, and have either Mr. Bebout, or Merrill S. Ball, members of the firm, show them through, and explain the machinery.

ENLARGING METAL HOLES

If you require a hole through metal of a certain size and do not have a drill of the right size, drill first with the largest drill available, then slip a small rat-tail file in the drill chuck. By turning the crank rapidly and moving the work in a circular fashion with the file in the hole, it can be enlarged to any desired size.

Nor is it just a far for people to keep their outer clothing as clean as they insist their under clothing must be. It is the outer clothes that are

The New 1925 McDougall's the finest kitchen cabinets in the world

McDOUGALL means the FIRST and FINEST of Kitchen Cabinets. Yet they cost no more. For this reason those buyers who investigate carefully — who seek the best value—always decide on the McDougall.

The reasons are:

Construction: McDougall Kitchen Cabinets have always been famous for their rigidity — a sturdiness that comes only from honest materials honestly put together. Many records of McDougall being thirty years in service, and still in use, have come to our attention.

The Samson steel corner brace is one reason for McDougall's longer wear. 8 of these braces in the base make it strain or shock proof. Equal care is exercised in building the upper cupboard, or top section. You never hear of a McDougall becoming wobbly, or loose at the joints. They are made with the same care as fine furniture — which, indeed, they are!

GOOD HARDWARE IMPORTANT ITEM

Good and at the Same Time Attractive Hardware Locks and Hinges Are Essential Things

SHOULD ALSO BE ARTISTIC

Pick Out Hardware for New Home That Harmonizes in Design and of Right Combination

Good and at the same time attractive hardware, locks, hinges, drawer pulls and window fasteners, are one of the most essential things in the new home—good locks for protection and artfully selected hardware for the blending beauty of the finish of the interior.

What equipment should you have in the way of hardware for your home? There should be fastenings at all doors and windows, and casement adjusters for windows of that type, and the doors will have to be hung on hinges, or as they are more properly known, butts. Of course you will have a cylinder lock at the front door. Now, as a matter of fact, you need a good lock more at the back door than at the front. It will be a great convenience and a real protection to have such a lock on the back door. If you can order your hardware in advance, the contractor will get back and front door lock sets so that they can be operated by the same key.

Pick out the hardware for the front door, and elsewhere for that matter, that harmonizes in design with your home. Do not be carried away by a set of hardware that is attractive for itself alone. It is the right combination that counts. Get the carpenter to place the hardware on the various doors, drawers and windows where it will harmonize with the design of these things. He must realize that this must be done without cutting into the tenons that hold the parts of the door together. It takes a real workman to do a good job of hardware setting.

For the front door and perhaps for the communicating doors on the first floor, it will be desirable to have the hinges or butts of the ball

bearing type. For closet and bedroom doors and other doors which will have light usage, the ordinary friction butt will serve very well. It is very important to have three butts on every communicating door. For the slightly increased expense the doors will swing much more true. The closet doors can get along very well with one pair of butts.

It has long been a question with architects why people should have doors throughout the house so completely equipped with locks. Why, for example, should all the closet and bedroom doors have locks? Did you ever lock your bedroom door? Probably not. It may be more desirable to put locks on closet doors.

Do not put a lock on the door just because it is a door. Perhaps after all you will never lock it. In any event, a bolt or a thumb turn will

serve all the purposes of a lock and you will not have a key to look after. However, it should be said that a mortised latch will usually cost more than a bit key lock. Of course if you have a small boy in the house you will want a lock on the pantry door. Some people have thought it desirable to have one closet in the house equipped with a good cylinder lock. Such a closet may come in very handy at certain times, perhaps, if for nothing else, as a place in which to store the family skeleton.

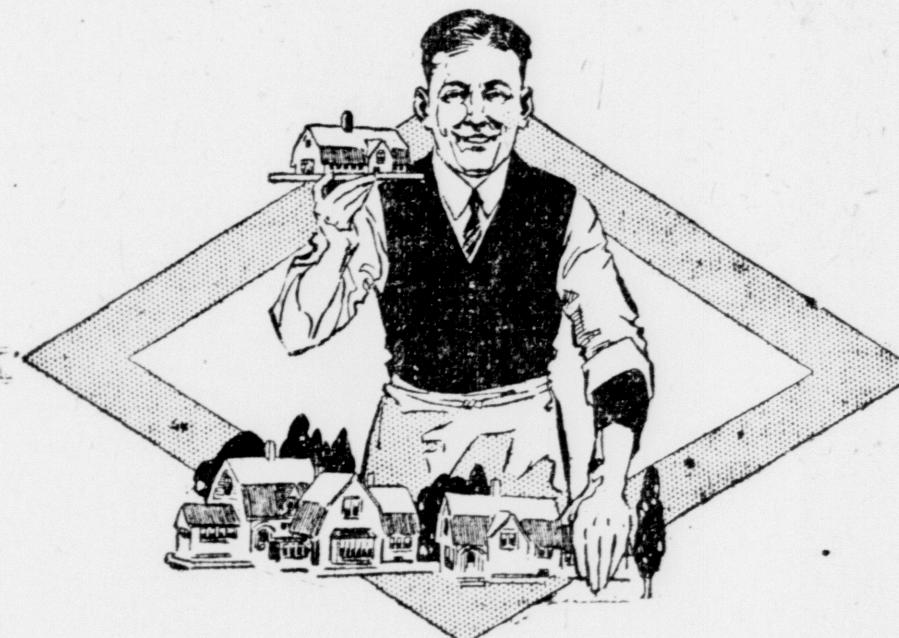

Perhaps one of the places where especially good hardware is necessary is at easement windows. There are numerous types of easement adjusters. The very cheap ones will not give you much satisfaction for very long.

Practicable Suggestions Offered by Handy Man

A hole bored in the end of the hammer handle will form a good place to keep beeswax. When driving nails into hard wood or wood which splits easily, coat the point of the nail with this wax and the tendency to split will be minimized.

A leaking gutter can be repaired at least temporarily by coating the inside of the gutter around the hole and laying in a strip of tar roofing paper and pressing it to shape.

Old doors, which have settled until they scrape the floor, can be improved by pulling out the hinge bolts and setting between the halves a small washer. The door will be raised the thickness of the washer.

A Savings Account

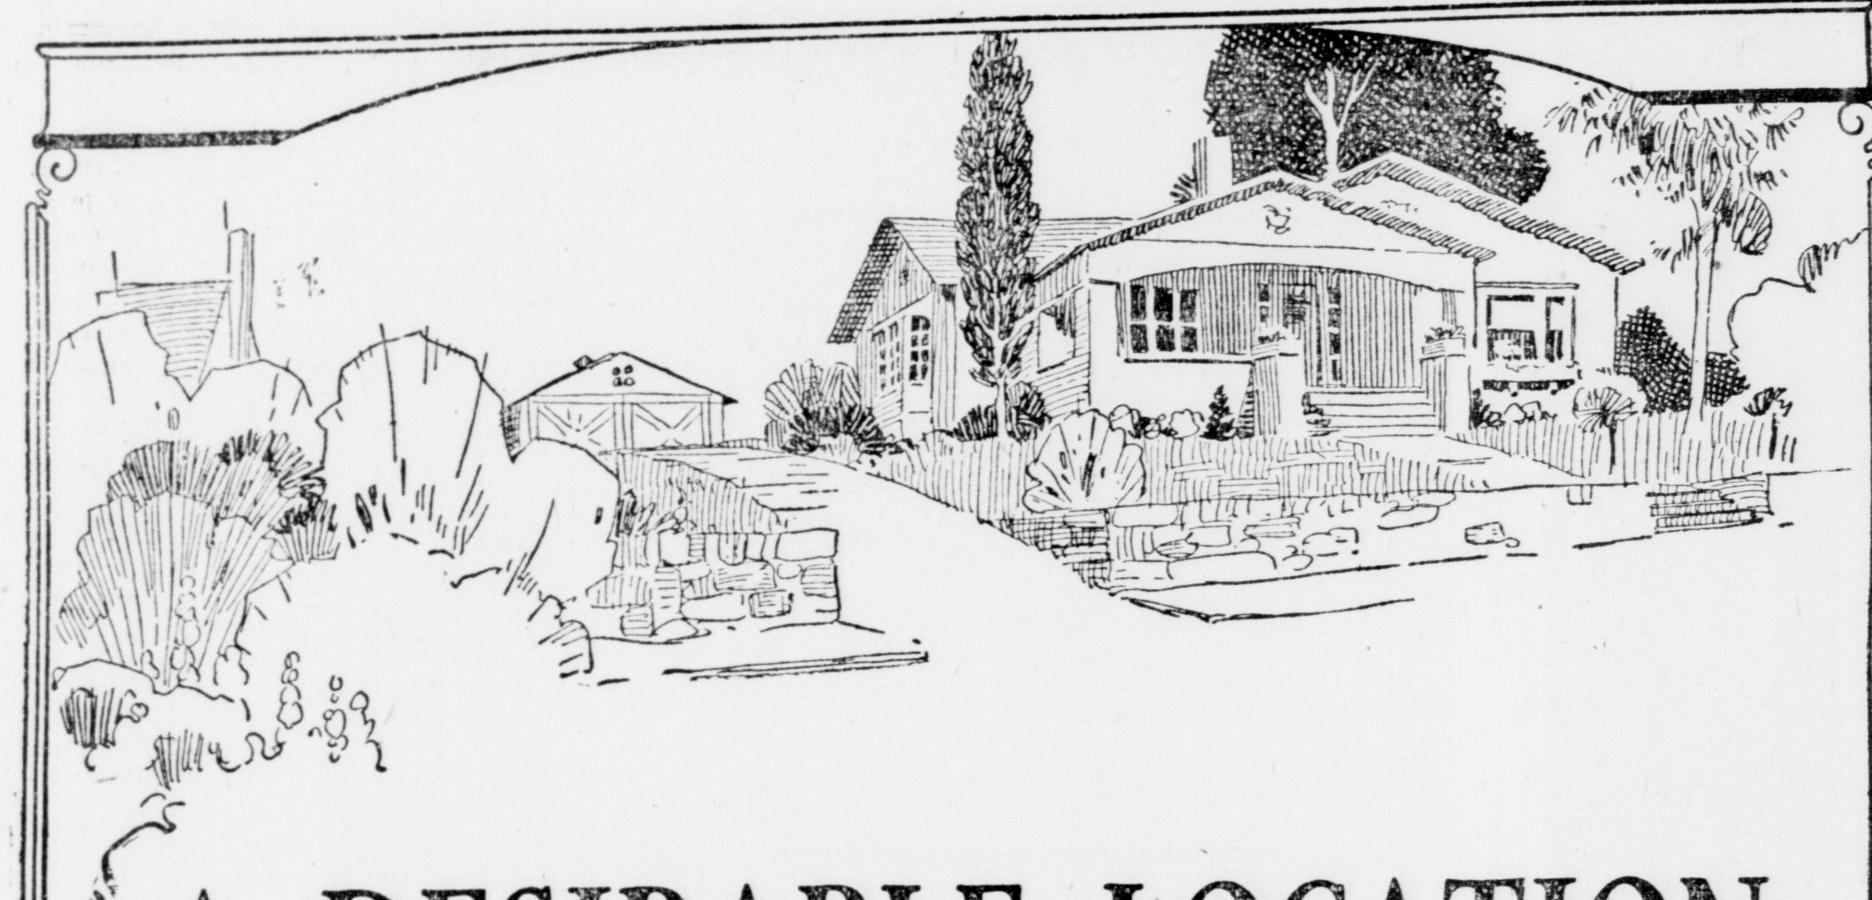

Is More Conducive to Success Than a Charge Account

If you have saved or are saving for a home, you are making the best and safest investment possible—that will pay the largest dividends.

Let Us Assist You With Your Plans
Interest on Savings Liberal Terms on Loans.

Rushville National Bank

The First Bank in Rush County.
Capital Investment, \$235,000.00

A DESIRABLE LOCATION

Your home can be ideal in every way, yet if it has been improperly located, you will never be satisfied with it. Consider carefully your own needs and select a site which has all the requirements for a model and satisfactory home.

Memorial Park Addition fills all these requirements. The surroundings are the best in town. A future school site has been provided adjacent and grade schools are within a few blocks. The lots are all large and properly drained. It is moderately restricted for the family of modest means. Sewers, streets, trees and a beautiful park are there and ornamental lights and a new gymnasium joining are assured.

These are some of the matters you must look into. Don't worry too much about which side of the street you are on—north, south, east or west. Every house has four sides and you can plan your home to take advantage of any direction it faces.

Easy methods of payment have been provided. Many are taking advantage of them, not only for homes but for investment, realizing that these lots are priced low and that they must advance in value.

Stewart & Stewart

BUILDING A HOME VERY IMPORTANT

Not Only is Home Center and Symbol of Family Life But Involves Considerable Investment

NEEDS CAREFUL DESIGNING

Must Build Right For Once House is Built it is Too Late to Change it if Dissatisfied

The building of a home is one of the most important undertakings in your life. Not only is the home the center and symbol of the family life, but from the practical point of view, it involves a considerable investment. You don't build a home every year or every decade. You are going to live in it, or, so to speak, with it, a long period of years. It must, therefore, satisfy in every way; you can't afford to make a mistake, or fool yourself when you build. You must build right, for once the house is built, it is too late to change it if you are dissatisfied. Even if a change of fortune leads you to move away, it is very important that the house is good enough to appeal strongly to the renter or purchaser. Your only wisdom, therefore, in building a home is to make it a valuable permanent investment, thoroughly satisfactory to yourself and to others, if circumstances require the taking it off your hands.

Before building a home the plan or design must receive careful attention. Not all houses are arranged for the convenience of the occupant. For example, there are houses in which the dining room and kitchen are separated from each other by another room, not a service pantry. This means that as long as that house is used the housewife must walk back and forth, taking a large number of unnecessary steps. In some houses it would seem that no attempt has been made to make the housework easy. Each room should have ample light, and there should be wall space for the owners beds, bureaus, piano and other furniture.

The living room will be the most used of all the rooms, and should, therefore, be well lighted and large enough for the family needs. If the front door opens directly into the living room there is danger of drafts in the winter and in a cold climate, difficulty in keeping the living room heated. A vestibule or storm door may prevent this.

A large dining room is a matter of choice. In the home where it is used three times a day it is the most expensive room in the house. In many small houses a dining alcove in the living room or kitchen has proved satisfactory.

Until recently little attention has been given to the arrangement of the kitchen. For the woman who does her own housework, the location of the sink, drain boards, ice box or refrigerator and stove, with reference to natural and artificial light and to each other, is most essential.

There should be some provision for carrying off the fumes from the gas range and gas oven. To lessen fatigue it has been found that the front of the sink should be thirty-four to thirty-six inches from the floor. A corner kitchen with windows in both outside walls, providing cross ventilation, has many advantages. Convenient closets, or cupboards, are also desirable.

Bedrooms need not be very large, but should have plenty of light and air, and should allow beds, dressers, chests of drawers and chair to be placed without interfering with doors windows, or heating outlets. Cross ventilation is most desirable. It is not best to have bedrooms opening directly into the living room. If possible entrance should be from a passage or hallway. Ample clothes chests are most necessary, particularly in small houses where there is little room for storage.

The bathroom should have a window large enough to keep it well aired. Sole access to the only bathroom in the house should not be through a bedroom; showy walls and floors are less necessary than substantial, convenient fixtures and plumbing.

One should make sure that the stairways are easy to climb, have plenty of head room and enough space for easy moving furniture.

If there is a cellar or basement with a heating plant or a laundry in it, this should be easy to enter, both from the inside of the house and from the outside. Concrete or smooth masonry floors are desirable, and there should be attention to convenient fuel storage and openings for receiving coal and removing ashes and refuse. The basement should be damp proof and have drain tile laid outside the foundation walls if necessary to insure dryness. Screening

HOME — THE MOST BEAUTIFUL WORD

(From a Sermon by Dr. T. Dewitt Talmage)

Home! It is a charmed word. Through that one syllable thrills untold melody, and the laughter of children. The sound of well-known footsteps and the voices of undying affection. Home! I hear in the word the ripple of muddy brooks, in which knee-deep, we waded, the lowing of cattle coming up from the pasture; the sharp hiss of the scythe amid the thick grass, the creaking of the hay-rick where we trampled down the load.

Home! Upon that word there drops the sunshine of beauty and the shadow of tender sorrows, the reflection of ten thousand voices and fond memories.

Home! When I see that word in a newspaper or book, the word seems to rise and whisper and chant and pray and weep. It glitters like a diamond; it springs up like a fountain; it thrills like a singing bird; it twinkles like a star; it leaps like a flame; it glows like a sunset; it sings like an angel. And if some lexicographer, urged on by the spirit of evil, should seek to cast forth that word from the language, the children would come forth and hide it in the grass and wild flowers, and the wealthy would go forth and cover it with diamonds and pearls, and kings would conceal it under their crowns; and after Herod had hunted its life from Bethlehem to Egypt, and utterly given up the search, some bright, warm day it would flash from among the gems, and breathe from among the flowers and shine from among the coronets; and the world would read it, bright and fair and beautiful and resonant as before.

Plan now to build a home of your own.

PRINCIPAL AIM IS THE HOUSE FOR COMFORT

In Building a Home, The Thought in Construction Should be For Satisfaction in all Details

VENTILATION IS IMPORTANT

All of the thought and time that you devote to the preliminaries in the construction of a new house will be amply justified if the result is a success, namely, a comfortably built home.

You are the one who will have to live in it, consequently your dwelling should embody every possible feature that will contribute to your health and happiness, both mentally and physically.

The factors necessary to a comfortable home, are convenience in arrangement, warmth in winter and airiness in summer. The first requirement may be secured by careful planning. The second may be effected by the proper insulation of the walls, and good workmanship in the construction of the building itself, particularly in the fitting of the doors and windows. The use of the right kind of lumber plays an important part in the accomplishment of your purpose as it insures permanently tight joints.

Of late years, the subject of insulation for the small house has been given much attention by architects and building experts, with the consequence that prospective home owners are taking advantage of the knowledge gained, and are insulating their new houses to a greater extent than ever before. Insulating a medium size dwelling, costs a surprisingly small amount, only a fractional percentage of the total cost, while the benefit derived is enormous. In fact, the saving in coal pays the cost of the insulating material many times over.

The more comfort that you build into your home, the more you will get out of your investment.

of the cellar windows and other precautions to prevent rats and mice from entering are desirable.

Builders of a home frequently make the mistake of selecting some very nice man, assuming that he will build the house at the lowest possible figure. As a rule it is best to obtain the names of several dependable contractors whose financial standing is good and take bids from them, in order to check against excessive costs. It is not necessary to accept the lowest bid, and it may be well worth while to pay a little more to a contractor who is dependable and has a reputation for good construction work in back of him. But it is not fair to ask bids from a contractor unless it is truly intended to give his bid reasonable consideration.

MILLWORK AIDS MODERN BUILDER

Difficult for Artisan on Job, Un-equipped as He is, to Accomplish Expert Work

GOOD STOCK IS ESSENTIAL

For One Who Must Watch Every Penny Should be no Question About Using Good Stock

Modern practice has made it more economical and more practical for most of the millwork going into the home to be made in the mill, instead of on the job as formerly. Bookcases, kitchen cabinets, china closets and breakfast sets are assembled in the mill, the joints glued and blocked together extremely difficult for the artisan on the job unequipped as he is, to accomplish.

Of course, some mills do vastly better work than others. There is as much difference between products of wood working mills as there is between products of automobile factories. The difference goes all the way from the selection of the materials to the workmanship that is put upon them. The highest grade of materials and workmanship, of course, cost the most, and often is beyond the purse of the small house builder. Even so, the small home builder may insist upon quality materials and workmanship. He has a right to expect these things if he pays a fair price.

Millwork is sometimes especially designed for the building. Moldings are struck off to follow special profiles prepared by the architect. The fittings, mantelpiece, bookcases and cupboards are all specially designed by him for particular places they are to occupy and to meet particular requirements of the home builder. This is called special millwork. Of course there is a special price for this also.

However, moldings and fittings can be obtained from ready made stock designs with resulting decreases in cost that often are very acceptable to the person who must build at the least expense. Happily these stock details quite often are of the finest character, having been carefully designed and proportioned so that they present an appearance that is second to much of the specially designed millwork.

For one who must save every penny, there should be no question about the desirability of using good stock millwork. If the moldings are carefully selected, of the right size and proportion for the places they are to fill, and if the fittings are all of the proper size and accommodation to make the house comfortable and fine appearing, there seems to be no reason why they should not be just as satisfactory for the small inexpensive home as the specially designed things of this kind.

The tendency right along is to improve stock millwork, and we recently have seen some very finely developed standard designs worked out by certain woodworking companies.

Don't think from this that all stock millwork is well designed. The woodworking companies have been forced to produce a wide range of forms to suit individual tastes and needs. By going over these designs carefully, you should be able to find what you want among the simpler forms, so that your millwork will be in harmony with your home and your particular sense of satisfaction.

HINTS FOR PIPE REPAIR IN CASE OF EMERGENCY

A kitty on a hot stove has nothing on you when a pipe suddenly bursts in the house. Ten things to do at once and no idea which one to do first. There are really only two things that can be done: First, shut off the water, then call a plumber. But if said plumber can not come for some time, disconnect the pipe as near back of the break as possible and plug with a rubber stopper.

The right kind can be purchased at any hardware store for a nickel. Get a small stove bolt and two washers and after boring a hole through the stopper, place the bolt and washers and turn the nut down tight. This repair will withstand all ordinary water pressure and permits the use of the rest of the plumbing until the plumber can come.

BUY AT HOME

The furniture being made in America today is better in every way than ever before, but the wise homemaker buys only from an established dealer with a reputation at stake.

Colonial Drapery Fabrics Date Back to the Eighteenth Century

No Other Textile Has Found Such General Favor For Decorative Purposes and With Such a Varied Field For Expression, Than Cretonnes of Soft, Blending Colors

and sensing the call for wide usage in Rush County, the Mauzy Company of this city are fortunate in having patterns, designs and colors for all occasions.

Here has been achieved, for the first time, the charm of hand-done materials—at moderate cost. Beautiful in their soft blending of colors and their profusion of fresh designs, Colonial Town and Country Cretonnes reveal the artistic workmanship that one ordinarily expects to find only in the most costly fabrics.

In patterns vibrant and colorful, or in rich, time-mellowed tones, they provide a range of selection suitable to almost any decorative need. And the exceptional permanence of their colorings assures enduring charm to the effects secured through their use.

There is little doubt but what colors and schemes and any kind of an idea on draperies that a housewife has in mind, can be settled after viewing the assortment at Mauzy's and the materials can be better seen and appreciated than described or pictured.

HANDY FOOT SCRAPER

The blade of an old shovel, upturned and set in the edge of the concrete step will make a dandy foot scraper. It should lean slightly outward so that falling dirt will clear the step.

SCREENED PORCH SHOULD POSSESS DROP CORD

A screened and glassed porch literally adds one room to the home. An ordinary open porch can be altered without much trouble by running 2x4 horizontally between the posts at the sill height and then fitting the openings between with sash or screen, depending upon the season.

A drop cord should, by all means, be installed. In summer the ironing can be done there, breakfasts served with toaster and percolator within reach, and in winter—well, if necessary there is no reason why an electric heater could not be used here and thus turn it into a sun room.

Home Found Too Small Can Be Easily Enlarged

If a hole has been bored through wood and later found to be a little too small, it can be easily enlarged in the following way:

Whittle out a hardwood plug perfectly round and a snug (but not tight) fit for the hole. Bore a small hole through this the full length.

Then with the brace and the larger bit start to bore out the hole again. When the threaded tip of the bit bites into the hard wood, the whole plug turns in the hole, thus guiding the bit and keeping the new hole true and straight.

COMMERCIAL VALUE IN HOME OF BEAUTY

Beauty of Design Combined With Carefully Planned Utility Makes Buildings Desirable

REFLECTS STATION OF LIFE

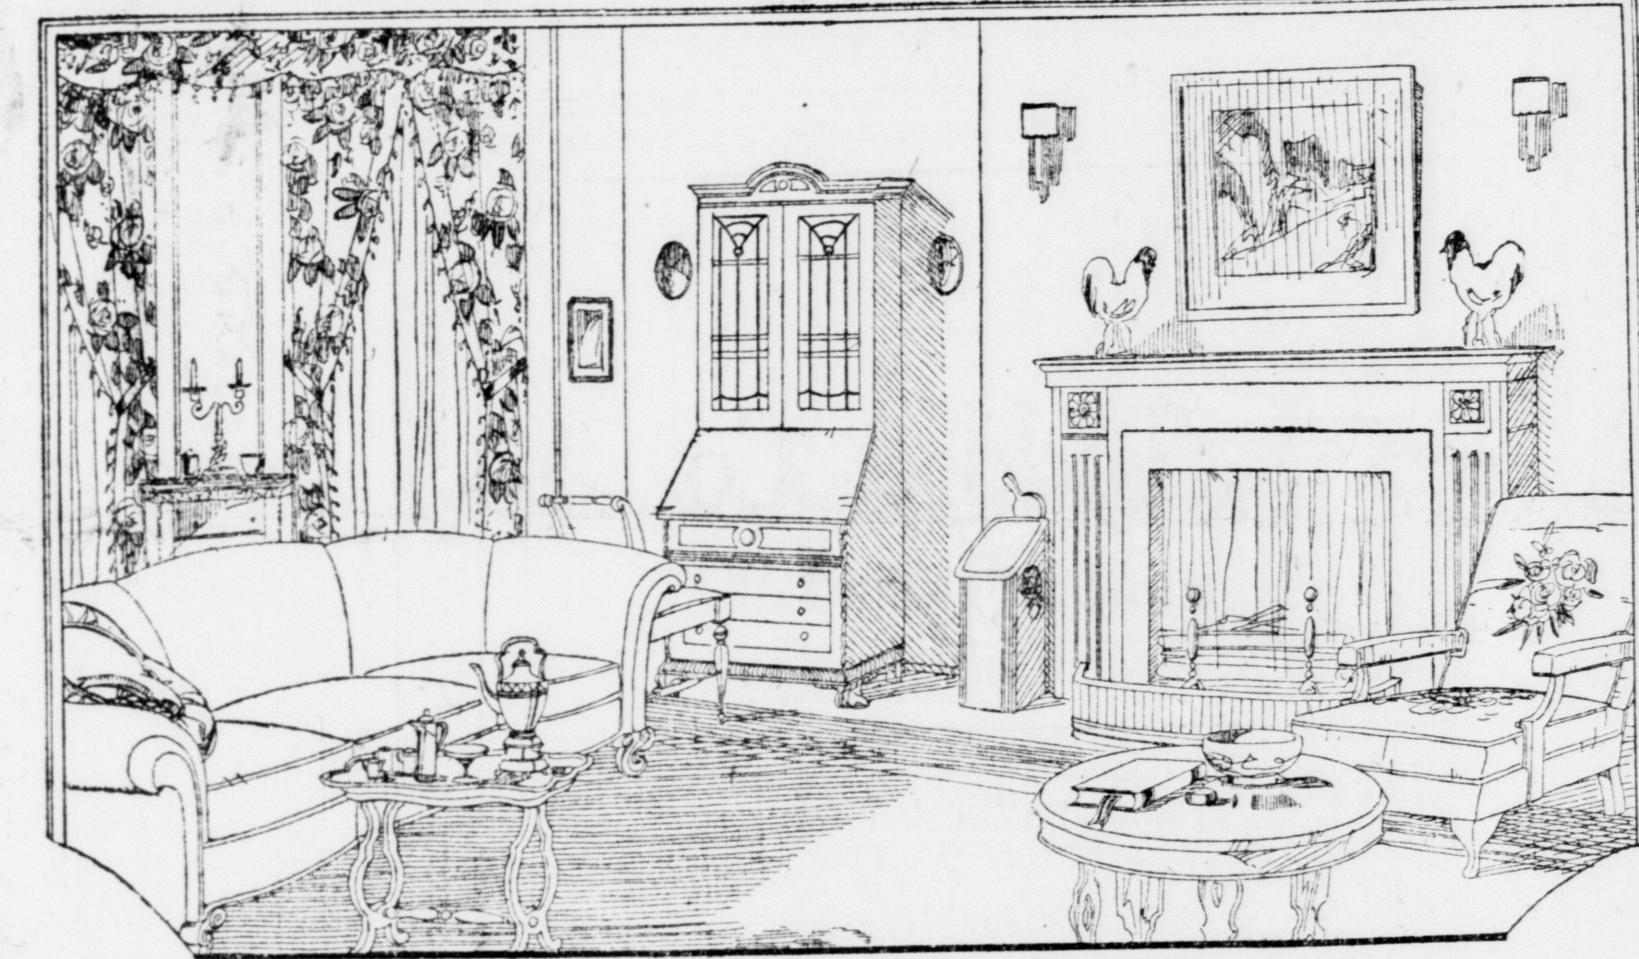

Architectural beauty has as real a commercial value as structural strength or material excellence. Over the rugged sinews of steel and concrete, the architect evolves an adornment of beauty expressing fittingly the character desired.

It is this beauty of design, combined with a carefully planned utility which makes buildings desirable, not only in the eyes of the owner, but in the regard, as well, of those upon whose opinion the commercial value of a building depends.

Men pride themselves upon homes which, in their quiet beauty reflect their owner's station in life. The building of commerce, designed along lines of refined prosperity, is, for the very character and beauty of its design, a desirable place in which to locate. The hotel which best expresses an inviting and generous hospitality, wins patronage through the appeal of attractive appearance.

The architect, by virtue of his training and talents, understands the meaning and application of architectural design. Only he can bring out the beauty so much desired.

MAUZY'S--A Boon to the Home

To Those Soon To Wed

This store in its 70 years' existence has had the honor and pleasure of furnishing multitudes of newly made homes. We court that same honor and pleasure for you, and shall render you every service possible.

What would the most elaborately furnished home be without tasteful floorcoverings and draperies? Without question they make or mar the home. They need not necessarily be expensive but they should be discriminatingly selected. This store keeps abreast of modern trends in offering the newest, and affords the opportunity of selection from assortments that compare favorably in size with those in larger cities with the assurance that the cost will be appreciably smaller.

RUGS

Every size from the smallest scatter rugs to 11x15. There are so many kinds and so many patterns to choose from, you will be delighted. You can see everyone as you would in your own home.

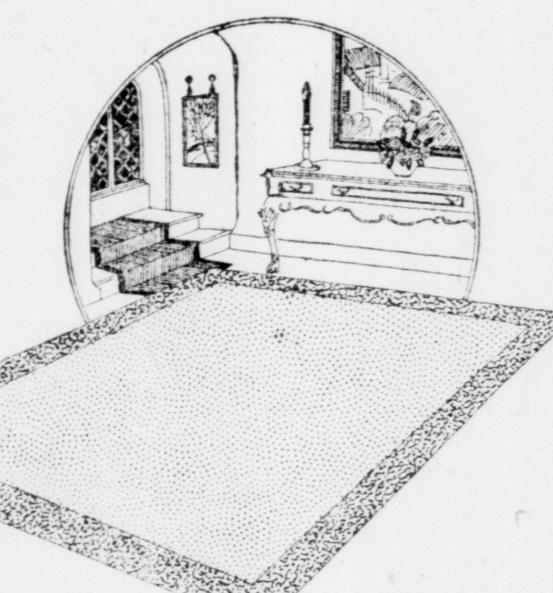

CARPETS

In order to give you a better quality for a less price, we carry in stock, direct from the mills, several patterns of Wilton Velvet and Wool Velvet Carpets. The patterns are most attractive. Customers from surrounding counties are coming to us for these and for ingrain carpets.

Linoleums

New and pretty designs in 6 ft., 7 1/2 ft., 9 ft. and 12 ft. widths. Linoleum and Felt Back Rugs in several sizes too.

9x12
Axminster
Rugs
\$29.50

The Drapery Section

is aglow with many new colorings and weaves. You will be delighted with the audacity of the patterns.

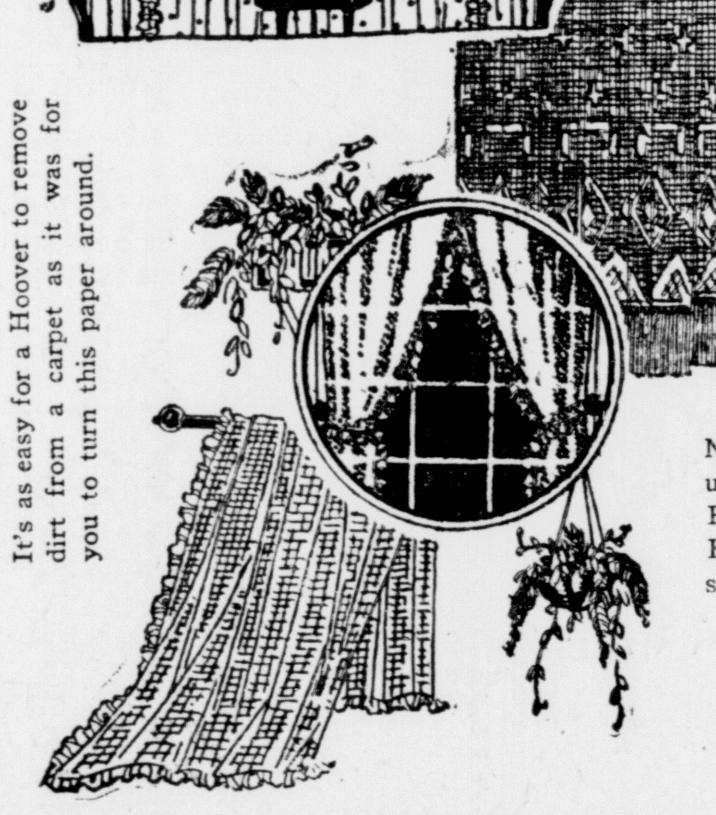

LOVELY DAMASKS, SILKS, VELOURS, CLOISTER CLOTHS, and all accessories to make the finished windows.

TOWN AND COUNTRY CRETTONES — Dashingly different—upwards from 85c.

BEAUTIFUL CRETTONES — 25c to \$1.00

NETS, CHINTZ, MARQUISSETTES and SWISSES — upwards from 19c.

READY MADE CURTAINS — fringed panels and pair goods. Ruffled curtains with valances and tie-backs are finding a ready sale.

The Porch becomes a Summer living room when fitted with our grass rugs and runners. A dashing bit of color supplied by pillows and covers from our Town and Country Cretonnes lend real atmosphere.

The Mauzy Co.

CHEAP VARNISH FALSE ECONOMY

Inferior Grades are Made of Poor Resin Gum and Oils, and is Waste of Money in Homes

FINISH SOON WEARS OUT

Undercoating for Varnish is also Important, and Reputable Dealers Should First be Consulted

Of all the places in the house under construction to economize, the varnish is the poorest, for inferior varnishes wear out, lose their gloss and stain readily and the surface of a good varnish can never be obtained without laboriously and tediously cutting the original stain and varnish from the wood and replacing it with varnish of good quality.

Inferior varnishes are made of cheap resin gum and oils, but this is not the only sort of poor varnish which will prove unsatisfactory. Expensive materials used in compounds out of balance give results equally as disastrous.

For example, chemists show that an excessive amount of China wood oil used in varnish will make it highly resistant to water staining, but that this property is gained at the expense of durability.

It requires expert manufacturing and compounding to keep the proper balance between these things.

On account of the different requirements that are made of varnish, such as for floor coverings, furniture, trim, outside work, varnish that is to be subjected to hot water, acid, and so on, manufacturers have produced a great many

Simple Method to Treat Glass For Perforations

Here is a kink for putting holes through glass. Build a small circular dam of putty, with the inside diameter equal to the diameter of the hole wanted. A good way is to set a rod on end and pinch the putty in place about it, then remove the rod.

Melt a small quantity of lead and pour some in the depression. A round piece of glass will drop out, leaving just the hole you want.

kinds, each one of which has qualities which especially fit it for particular uses. You will see that the kind of varnish that would be suitable for a chair would not generally be best for a floor, and so on.

Since this varnish matter is such a closed book to everybody but the manufacturers, the only recourse that the layman has is to use the product of a manufacturer who bears a reputation which has stood the test of time. When a manufacturer thinks enough of his product to print his name upon the label and then stand behind that product, guaranteeing absolute satisfaction, and when that manufacturer remains in business a long term of years and has a continuous reputation for superior products, you have a right to expect satisfactory results.

It must be said that certain conditions other than those of the varnish must be right if the varnish work is to turn out well. It will not do, for example, to put varnish on damp wood, or even to apply it in a room where the air is excessively damp. We want moderately cool, dry air and clean, dry materials before we start, and then there should be no hurry after the work has begun. Leave time for the successive coatings to harden—day's delay to make sure of this may return large

America Is Now Producing The Best Rugs And Carpets

Home Furnisher Has Wide Variety of Fabrics From Which to Select When Choosing Floor Covering. Important That Quality be Considered in Making Purchases.

In the variety manufactured in quality, and in the art displayed in both design and color the United States leads the world in the production of floor coverings. To such an extent is this so that it is extremely rare to find in the stores rugs and carpets other than those of our own manufacture. In making this statement we are referring to goods woven by machinery—not to oriental rugs, each of which is an

profits to you in a good and durable job.

Don't begin your fine varnish floor finishes with a cheap undercoating. Shellac is a very valuable material for certain finishes on wood trim and furniture, but it wears out quickly on the floor. Build up your floor varnish with two, or, much better, three coats of the best varnish you can get. Don't let the varnish chill—keep it out of drafts—make a mighty effort to keep down the dust.

We have not said much about the workman—the painter. He is as necessary an element in this part of the work as he has been all through building operations. It is easy to distinguish between a good job and one that is poorly done. There are ways in which workmen can slight this part of the work, as there are in everything else through the building. Your guarantee of satisfaction lies largely in having an expert reliable painter do the work.

individual piece, woven by hand and frequently taking years to produce. This situation, of which the manufacturers of rugs and carpets in this country may justly be proud, is not the result of any accident. It is to American invention that the world owes the modern Jacquard carpet and rug loom, while the conception, designing and construction of the rugs themselves, now in use in countless homes, had both their origin and successful development in this country.

The home furnisher of today has a wide variety of fabrics from which to select, when choosing a floor covering. To mention some of the most prominent, there are tapestries, velvets, Axminsters and Wiltons, with several grades in each. Of these the Wilton fabric is the only one woven by the Jacquard process. As the Jacquard principle, named for its inventor in 1801, is perhaps not known to the average reader, it may be briefly described as a mechanism by which certain strands of wool or other materials are either raised or depressed, bringing the proper colors to the surface and thus forming the design. It is used not only in carpets and rugs but in silks and other fine woven fabrics with patterns. In Jacquard woven goods the color on the surface always has one or more colors underneath it, creating a wear-resisting cushion which prolongs the life of the fabric.

No other article of furnishing in the home receives any such wear as the floor covering. It must withstand the pressure of many feet and, though thus down-trodden, must and should preserve its freshness of appearance for a long time. In the old days—and in fact now—the visitors to mosques, and other buildings in the Far East containing fine rugs, are required to remove their shoes before entering. As such a regulation is hardly possible with us it is of the utmost importance to the purchaser of a rug or carpet for the home that she obtain a quality which will withstand the wear caused by the many shoes which will tread upon it.

A prominent engineer who has made an exhaustive study of floor coverings for use in hotels—where

HINTS ON ICEBOXES

Are there little beads of glistening moisture on the outside of your icebox? Even in a well-made refrigerator it is almost impossible to prevent "sweating." It is quite impossible to prevent a difference in temperature between the outside casing and that of the room. Consequently any moisture held in the room atmosphere is bound to condense on the outside of the box. If the refrigerator is kept well finished with varnish or shellac, this moisture is prevented from seeping into the box, causing the panels to warp, seams to open, wood to rot. This condition offers germs an opportunity to develop and causes ice to melt more rapidly. In time an icebox will become useless. See that your refrigerator has two coats of good varnish before warm weather sets in.

good wearing qualities are of course paramount—has written an article in "The Hotel World," going very carefully into the question of the best fabrics. Here are a few extracts:

"No economy in cheap carpets."

"American makes equal importance."

"After a careful study I have concluded that the Wilton carpet is preferable."

"In a Wilton carpet the process of manufacturing is such that a certain grade of quality is essential."

What applies to hotels applies to an extent to the private home. Particularly for the "down-stairs" rooms, the living room, hall, library, or dining-room, Wilton rugs or carpets are much to be preferred and will more than pay—in satisfactory service—for the greatest cost in the beginning.

A word in closing as to Oriental or Chinese rugs. The possessor of a fine Oriental rug has every right to be proud of his ownership. However, an intending purchaser should be very careful not to be misled by offers of cheap Orientals, of which unfortunately, quite a number come into this country. Such rugs are not to be compared with good American-made Wilton rugs, either for permanent beauty or durability. Therefore, such a purchaser should be cautioned against being too easily tempted by the glamor of the words Oriental or Chinese.

I Will Build You This Home and Furnish the Lot for

\$1550

This house will be 24 feet by 30 feet, with four rooms and 2 closets, with 8x14 veranda; solid foundation; well built house; painted; varnished; papered; electric lights and water; front and back steps; and ready to move into.

This house will be built less than one-half square from cement street.

This offer is open for immediate acceptance.

SOFT WATER WOULD BE SOURCE OF JOY

Installation of Softener or Piping From Cistern Would Add to Comfort of Home

HARD WATER HAS OBJECTIONS

From Every Standpoint Soft Water in Home Bespeaks Both Efficiency and Economy

While not an essential part of the house proper, soft water, running and obtainable in the kitchen and the bathroom of the new home, will prove a source of joy as long as the house is tenable. Both hard and soft water have their distinct use and to attempt the use of one where the other should be used is discouraging to say the least.

The condition known as hardness in water is caused by the absorption of certain mineral constituents as the water passes through the earth or flows over its surface.

There are two mineral elements in particular which are easily absorbed by both ground and surface water. These elements, calcium and magnesium, are chiefly responsible for the hardness in water whether it be pumped from wells, lakes, springs or streams.

Even small amounts of lime and magnesium in water can always be recognized by the difficulty in securing a lather with soap. Similarly in the laundry, the bath and all cleaning operations, this hardness is very unsatisfactory.

This same lime and magnesium

hardness is also noticed as scale accumulation in tea kettles, pans, water heaters and boilers, where it forms an incrustation which causes an insulation against heat. It often so clogs the pipes that the flow of water is greatly retarded.

All of these objections are further emphasized in the waste of soap and fuel and extra effort necessary in any household use of hard water.

There is a soft water, however, that is really soft and instantly and always available at full city pressure. It is always clean and 100 per cent desirable for every household purpose. This is soft water from the modern water softener.

This soft water is your city water supply, with the hardness completely and automatically removed. For drinking, cooking, bathing, shaving, shampooing, laundering, cleaning, and every other possible use of water, this soft water is ideal.

It is always soft, always clean. It is efficient and economical. It is provided without cisterns, pumps or chemicals. It is made possible at a low cost by a natural softening process by means of the water softener.

From every standpoint, the use of softened water in the home bespeaks efficiency and economy. Time, labor and supplies are saved in every use of water. It may truly be said that softened water lessens home labor and multiplies home comforts.

Softened water is an all-purpose water. There is not a single use of water in the home to which softened water is not better adapted than either hard or cistern water.

Lebanon—Joe Butcher, formerly of Lebanon and Purdue graduate, is superintendent of maintenance of way of all of the railways in Central America, his friends have learned.

CHEAP ROOF IS MOST EXPENSIVE

Among the Things That Enter Into a Good Roof Are Material, Workmanship and Appearance

SLANT OF ROOF IMPORTANT

Pitch Should be Steep Enough to Permit Water to be Carried Off Quickly as Possible

One of the most expensive items to attach to a new home is a cheap roof, while a good roof is one of the real essentials in economical upkeep of a house. Many things enter into the determination of a good roof—material, pitch, workmanship and last and least, appearance.

Primarily a roof is the protection that we put over the house to keep off the elements, and it must be especially designed to carry off water. This means that the surface have to be inclined or "pitched." The pitch is very important, for the steeper the roof the more quickly it will carry off water, which is just another way of saying that fewer leaks will develop.

For example, a roof covered with shingles that is not steep enough soon will become wet all through. Water will be carried up between the shingles and through the roof covering, and so find its way into the house. As a matter of fact, any kind of roof that is made of overlapping units, such as slate, tile, or shingles of wood, cement, asbestos or asphalt should be pitched at least 30 per cent.

If the roof is covered with sheet metal like tin or copper, or with layers of felt set in hot tar, it does not have to be steep for water runs off this kind of material very quickly. In any event, there is no chance for it to creep back underneath the roofing. These materials are, therefore, especially valuable for flat roofs. On the other hand, the color, texture, and generally superior appearances of overlapping units make these coverings more desirable for pitched roofs—those which can be easily seen.

The simplest kind of a pitched roof is one which slopes both ways from a ridge. This is called a gable roof because of the gables thus formed at each end of the house. If the roof pitches up from all four sides you have a "hip" roof. If the house plan is a combination of rectangles such as an L-shaped plan the planes of the roof come into contact with each other at one or more places to make a valley. Valleys are the most vulnerable places of all in a roof. This is true because the roof covering must be broken to make the angle. There is more water in the valley than elsewhere on the roof surface. Snow and ice lie in this intersection. Any break in the roof plane increase the difficulty of making the roof absolutely water tight. Wherever the roof is broken with a dormer window or a chimney stack or a vent pipe there is a place for water to work down into the house.

WHY WALNUT LEADS

This generation has a higher regard and appreciation of beautiful furniture than our fathers and mothers. All over the land the fundamentals of proper interior decoration are being taught in magazines and in schools. We demand more in design, materials, workmanship and finish of the furniture manufacturer than ever before. At the same time we have so many interests and so many things to do that we frown on anything that makes "more work." Cost of upkeep in time or money is a matter of prime consideration.

In furniture we do not want anything that requires continual work or the services of an expert to keep up its appearance. This is one of the reasons why American walnut is a popular furniture wood today. Finished natural it does not show dirt or finger marks. Walnut furniture that has been "wiped up" does not become "cloudy" before the guests arrive. If the busy housekeeper hasn't had time to slick things up or the guests arrive unexpectedly, she can welcome them without the horrible suspicion that they will think she is careless of appearances.

PAINT HEATING PLANT

Now that the heating plant is about to go on a vacation, all pipes, doors and other portions which are liable to rust should be protected with a paint coating. Such action may forestall inconvenience and a repair bill next fall. There are special paint products made for such surfaces; be sure the proper materials are used.

GREAT PROGRESS IN FURNISHINGS

Manufacturers Show Ingenuity in Beauty and Variety and Appreciation of Needs

MAKE WHAT PUBLIC WANTS

Their Products Anticipated Growing Desire For Attractive And Harmonious Environment

"A Little Down on a Big Bill Will Do." "Come visit our display room, or write for twenty-page handsomely illustrated booklet." In our stereotyped, fit 'em all, three room or twelve, cottage or palace furnishings, we have just the thing you desire. Guaranteed to suit each and every temperament, each and every dimension, we have at last standardized the requirements for all those seeking a home. Satisfaction guaranteed." So an advertisement might have read a few years ago, when the difference between the furniture for a cottage dining room and a dignified, paneled one would be one foot and two leaves added to the table, and four extra chairs. Then, too, it was thought that only the standardized things could go into a house and that the requirements for a three-room home were the same in a flat in Harlem as for a bungalow in Gardena, Kansas, and the woman who did want to make her home different met with no co-operation for all the furniture was built upon the same old set designs with no more thought about individuality than is given to a loaf of bread.

The manufacture of furniture was a reaction from the handwrought pieces of early days and a catering to the pioneer period in which the main object was to make a living. But since then American taste has been greatly refined and people are no longer satisfied with a dining room that looks like every other dining room on the street, or a living room that might be described from imagination as well as sight, so little individuality was shown.

There must always be demand before supply, if that supply-demand theory will work, and in this case as soon as the people really began to resent having their furniture all fashioned from the same designs, or those practically the same, the manufacturers woke up to the idea that some change must be made. Consequently, no effort was spared to give the public what it wanted—furniture with distinction and individuality. The designers realize that greater care and taste is shown by people every day in their selection of and their demands for furniture, and they are catering to this refinement and good taste.

The simplest kind of a pitched roof is one which slopes both ways from a ridge. This is called a gable roof because of the gables thus formed at each end of the house. If the roof pitches up from all four sides you have a "hip" roof. If the house plan is a combination of rectangles such as an L-shaped plan the planes of the roof come into contact with each other at one or more places to make a valley. Valleys are the most vulnerable places of all in a roof. This is true because the roof covering must be broken to make the angle. There is more water in the valley than elsewhere on the roof surface. Snow and ice lie in this intersection. Any break in the roof plane increase the difficulty of making the roof absolutely water tight. Wherever the roof is broken with a dormer window or a chimney stack or a vent pipe there is a place for water to work down into the house.

For instance, take a small, occasional table for the living room. Think of the number of styles, woods and finishes one has to choose from. First, he may use the old stand-by, the gateleg table, and the variations of this are enough to interest the looker for a day; or a tilt-top table, with a round, oval or octagonal top with the edges burled, grooved or "pie-crusted;" or perhaps the person wants a long, narrow davenport table; or one equally as narrow in the shorter end table which may be merely a tiny one for the bookends and maybe a lamp, or may have racks below for magazines, or may be converted into a sewing table on a moment's notice. Besides these, there are tall, thin nests of tables that fit into each other like clockwork, and short side the davenport and without half side the davenport and without half looking, one may find many others.

Moreover, these tables are not

made only of the woods that one

finds in the heavier pieces of furniture, but the small table is often

in a contrasting wood to give a

touch of variety to the room. A very

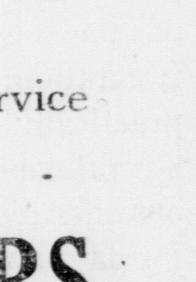

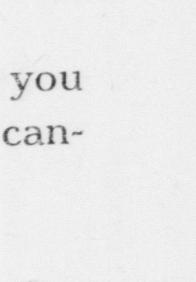

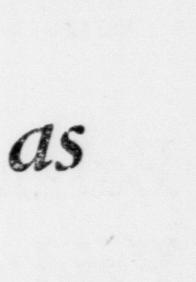

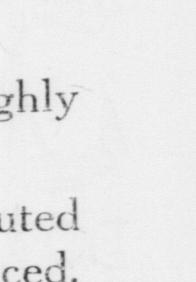

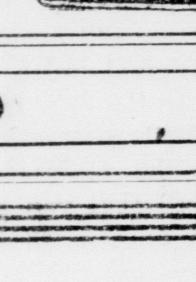

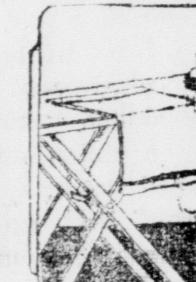

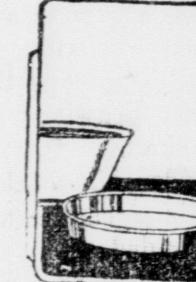

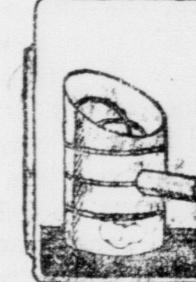

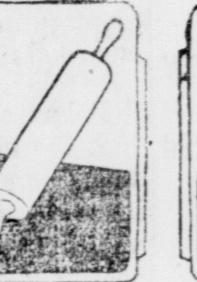

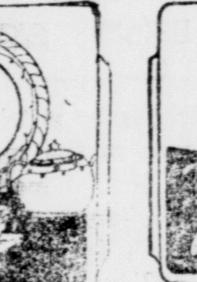

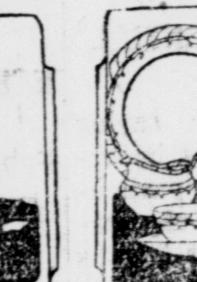

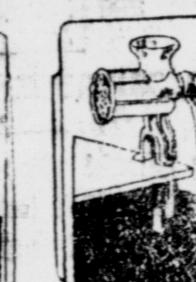

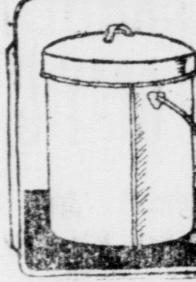

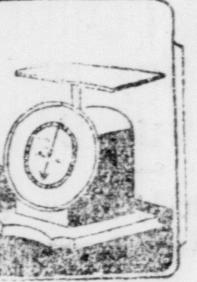

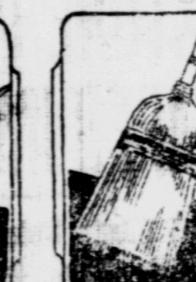

effective variation is found in the

Chinese lacquer, so often in red,

that is being used extensively at

the present time.

It is not in tables alone that one finds his distinction by any means—this was merely used as an example. In the larger pieces of furniture which must of necessity conform to certain lines more than the smaller, the variety in the finishes plays as great a part as the changes in design. Combination of two different kinds of wood adds interest to any piece of furniture if the combination is well done, and the contrast of the grains of the wood running in opposite direction is particularly effective.

CHANGE IN PLANS MAY CAUSE DELAY

Home Builders Should Know What They Want Before Construction Work is Started

"EXTRAS" ALSO COST MONEY

Carpenters and Architects Required to Draw New Plans if Changes Are Very Radical

House builders often gain the impression that because contractors and architects oppose "extras" and changes in the construction of the house and advise against it, this advice is given because of the added work, or that the owner is "getting something for nothing."

Nothing could be farther from the truth, for the architect or contractor when he advises against the change is attempting to save the builder money. Delays cost money. And if there were no other cost to the changes, this would run into a sum large enough to justify more careful consideration before work is started. But there are many other costs which must be paid by the owner changing the original plans, more disastrous than the delay cost.

New drawings must be made, if the change for "extras" involve considerable work, orders for materials already placed must be countermanded, new and different material must be obtained. When you consider that the contractor usually has a force of bricklayers, carpenters, plasterers, electricians and other skilled workmen on the job, you can understand how delays occasioned because of changes and "extras" hold up these workmen and cause the contractor sleepless nights. His whole building program has been disrupted and you must pay the bills.

If special millwork or other special manufactured details for your new home already are completed, and if you decide you want a change or an "extra" it may mean a complete loss of the finished work. Don't forget that the mill or manufacturer will expect you to pay for the original order.

When the bills for all of this work are finally presented to you for payment, the contractor may realize full well that you may think him to be an accomplished robber, holding you up with a bill instead of a gun, but what is he going to do about it, provided you order the "extras?" Contractors are in business to make a legitimate profit, and can not be expected to pay out his own money for changes and "extras" that you order—too late.

Is it possible to eliminate "extras?" Is it possible to decide upon the plan for your home and stick religiously to it until the house is completed? It can be done, provided the three most interested parties in every building operation, namely, the owner, architect and builder, set themselves definitely and in a logical way to do so and provided all three are honest.

Tipton—A hen put it over on Merschand of Tipton. Merschand purchased a pair of white guineas and saved the eggs carefully. Three weeks ago, he put them under a hen. They hatched Buff Orpington chickens.

Is it possible to eliminate "extras?" Is it possible to decide upon the plan for your home and stick religiously to it until the house is completed? It can be done, provided the three most interested parties in every building operation, namely, the owner, architect and builder, set themselves definitely and in a logical way to do so and provided all three are honest.

The whole question of wall coverings lies in the appropriateness of texture, color and design—in this order of procedure—of whatever material you may choose for the purpose. Texture is perhaps the most difficult point of the three for laymen with an untrained artistic sense to decide upon, and certainly is the most difficult for the adviser to explain verbally. But certain general lines may be laid down for you to follow.

Every wall paper manufactured today is a reproduction of some type of textile or leather, or other material, and therefore possesses, artistically speaking, a feeling similar to that of the original. To cite an extreme example: You would never think of using a paper imitating decorated and polished tiles, in a dining room, for the simple reason that real tiles would quite obviously be out of place in such a room.

Again, a bathroom would be badly decorated if you used a paper facsimile of a Louis XVI alternate silk and satin stripe, for you would never employ such fragile material in a room where it would speedily become spotted and stained. In a room constructed along dainty, delicious lines, heavy-textured papers are not correct, for you would not hang such apartments with cumbersome velvets or tapestries if you were able to afford the expense of these materials. In short, let your guiding principle be: Decide upon what kind of textile or other material would be best suited to the rooms you wish to decorate and then choose your paper

MODERN KITCHEN IS A FEATURE IN NEW HOMES

Noticeable Fact That Most Indiana Builders Give Kitchen Most Careful Attention

OPEN PLUMBING ESSENTIAL

It has come to be a trite saying that the kitchen is the most important room in the house—particularly the small house without servants. Since this is true, it is the room which deserves the most careful attention. It is a noticeable fact that most Indiana builders give that attention. Nowhere else is the standard so high.

The margin between a good kitchen and a poor one is very small. It is not a question of size so much as of completeness and arrangement.

Mme. Housewife, do you agree with us on the essentials of a good kitchen?

Plenty of light and cross-ventilation.

Good open plumbing, every crevice of which light and air can get to. A sizeable enameled-iron drain.

Plenty of cupboard sections; liberal room for food storage and dish storage; pots and pans and the bulkier groceries; a place for the broom and the mop.

Work table space—lots of it, preferably porcelain.

A well-insulated modern ice box and an enameled stove.

However, a kitchen can have all these things, and still be a poor kitchen to work in. If these essentials are not properly grouped and arranged, it means unnecessary steps, dirt-eating corners and everything looking awkward and out of balance.

Mme. Housewife, don't let yourself be imposed upon. You are entitled to a good kitchen and it won't cost any one dollar more than a poor one. Insist on your rights. Talk kitchens to your builder.

tras?" Is it possible to decide upon the plan for your home and stick religiously to it until the house is completed? TEXTURE OF WALL PAPER IMPORTANT

Most Difficult Point for Untrained Artistic Sense to Decide Upon and For Adviser

NEED SUITABLE BACKGROUND

Paper Should Provide Atmosphere and Bind all Articles in Room In to One Effect

Modern interiors are constructed and furnished in one of three manners, viz: (1) in some pure period style, in which may be included the so-called colonial, or (2) architecturally plain, of no particular style with real or reproduced period furniture, or (3) with everything modern, uttering no predominant note as far as either architecture or furniture are concerned. This latter class is by far the most numerous, and in such houses it will be the wall paper which will give the rooms their real distinction giving a place to the characterless furniture in the general scheme.

Modern invention has converted the old tasks into pleasures. At every turn the modern housewife can employ some labor-saving device to do her work quickly and give her the freedom to enjoy her home and the companionship of her family.

Power washers, vacuum cleaners, electric irons, etc., are now recognized as essential appliances in every well conducted home. But even preceding these in importance is plentiful hot water at the turn of the faucet.

This prime requirement enables the home manager to better organize her work and realize the full benefit of her mechanical equipment. It completely rounds out her establishment and makes her home equal to the demands of her family and the needs of her friends.

In brief, it gives her a home in which she can take an abounding pride and to which she can invite her guests with assured confidence that her hospitality will be complete in every respect.

To have abundant hot water always on hand is as necessary as heat and good lighting in every well managed home. As the first and last essential of the day, hot water is indispensable for all personal comfort. And in laundering, cooking and cleaning it is the primary requisite.

The white, crisp table cloth you spread—the gleaming silverware and dishes that you set upon it, and your many other articles of elegance demand the use of pure hot water to keep them in perfect readiness.

The magic response of the automatic gas water heater provides this prompt and bountiful hot water service.

from among hose which reproduce that same texture and feeling.

The next rule is to choose a paper which will be a suitable background for your furniture, pictures and hangings. It should provide an atmosphere and bind all the different articles in your room into one homogeneous effect. "One of the faults of plain, painted walls is that their very simplicity makes them 'stand out of the picture,' instead of remaining unobtrusively in their proper place. Like the self-conscious woman who went to church after she would not be noticed!

she would not be noticed!

WATER EQUIPMENT IS AN AID TO HOUSEWIFE

To Have Abundant Hot Water Always on Hand is as Necessary as Heat and Good Lighting

GIVES PRIDE TO HOME

Hoover Comments of Aims Of Better Homes in America

Everyone is in accord with the aims of Better Homes in America. The function of that educational organization is to correlate these wishes, through local Better Homes demonstrations, into tangible, beneficial results. Herbert Hoover, Secretary of Commerce and President of Better Homes in America, writing of the movement, said:

"In the crowded life of today there is danger that we may lose sight of high standards for the home and the stimulus they afford. We all do better when we have a high ideal to live up to. The Better Homes in America movement aims to give practical demonstrations of comfortable, healthful and attractive homes, to direct attention to the means by which family life may be elevated. It recognizes, however, that it is not the wish but the will; not sentimental desire, but vigorous, well-judged leadership, that moves our national life forward. The campaigns provide a means by which the men and women and children of our cities and our farms may cooperate to encourage and facilitate home-building, reduce needless drudgery in household operations, increase good sense or balance in furnishing or decorating the home, raise standards where necessary, in housing and family life, and, especially, foster the fine ideals of the American home."

"The 1924 campaign for Better Homes in America was greater than ever before. It reached every state in the Union; it penetrated rural districts, and towns and cities. Fifteen hundred local committees worked with the most inspiring zeal for public service, to protect and raise the standards not only of the home but of the community and the nation as well.

The white, crisp table cloth you spread—the gleaming silverware and dishes that you set upon it, and your many other articles of elegance demand the use of pure hot water to keep them in perfect readiness.

ARCHITECTS FAVOR ORNAMENTAL GLASS

New Glass Differs From Ordinary Plate in Having Slightly Wrinkled Semipaque Surface

DIFFUSES THE LIGHT RAYS

A new sort of building and ornamental glass that was discovered by the Pittsburgh Plate Glass Company through a slight variation in the process of manufacturing polished plate glass is in increasing favor with architects and builders. Before the new glass was made available through dealers it was tested directly by the main organization of the Pittsburgh company. Several installations were made in office buildings, stores, public buildings and religious edifices.

The new glass differs from ordinary plate in having a slightly wrinkled semipaque surface. It breaks up and diffuses light rays, spreading illumination even more than polished plate. Its chief use is in office partitions and doors and in opaque but translucent screens. In decoration it has turned a new leaf in the book of glass possibilities. Designs can be etched, mired or sand-blasted on it with excellent effect, the natural appearance of the glass affording the finest of backgrounds.

A peculiar property is that while the glass obscures the view of anything or any one three or four feet away, as seen through an office door, when it is placed directly against an object, as against a framed painting, or objects on a desk top, it is perfectly transparent.

PRESERVE PAINT

COUNCIL ACTS TO IMPROVE CITY PROPERTY

Orders Curb and Gutter in 11th Street, Park Bandstand and More Work on City Building

FRONT WILL BE REMODELED

With Rear of Building Enlarged, Modern Fire Doors Will be Installed, it is Decided

OTHER PARK IMPROVEMENTS

No Definite Action Taken on Engineer's Recommendations Regarding Enclosure of Branch

The estimated cost of enclosing Hodges Branch and cleaning out the old basin from the point where the enclosure empties into the open ditch again, was placed at \$45,000 in a summary of recommendations presented by Will Dill, engineer, to the city council Tuesday night, when they met in regular session.

Mr. Dill's report showed that the bridges of the railroads were not large enough to permit storm water, and that a new bridge should be constructed 400 feet east of the present bridge on the C. I. & W. railroad and a new channel made for the ditch for 500 feet. The enclosed sewer should start at Ninth street, and run to a point about 200 feet south of the Seventh street bridge, which would then empty into the open ditch about half way between Seventh street and the Big Four bridge.

He recommended that the open ditch be dredged from 14 to 16 feet in width and to a depth of about eight feet. The construction of the concrete sewer was recommended to be 5 by 8½ feet, in a double section, which would provide two sewers parallel, each being 5 by 8½ feet. This would do away with bridges over streets.

The cost of the proposed improvement, as estimated by Mr. Dill, at \$45,000, would be assessed against the lots affected by the water shed, roughly estimated at 1,800 lots, with those more directly benefited paying the largest assessments.

The railroads will be notified at once to enlarge their bridges, and steps will be taken to figure on a smaller sewer of about five feet in circumference, which the councilmen believe will be large enough to take

"STOP AND GO" SIGNAL TO BE INSTALLED HERE

Automatic Light Arrangements to be Placed at Main and Second Streets on Trial

SAME BASE WILL BE USED

An automatic "go and stop" signal to regulate traffic will be installed at Main and Second streets on a 30 day trial, and work will start at once putting it in operation.

The same concrete base will be used, which now holds the large traffic post in position, and the new automatic post will be erected on the base, standing 8 feet high. On account of different wiring, it will be necessary to bring the wires in from the top while it is being tried out, but if found to be satisfactory and placed here permanently, the wiring will be placed in the cable as it is now done beneath the street.

The post to be erected, is similar to the one in use in Indianapolis. The green light flashes when traffic is to move. The white light flashes for the change, and red light flashes for traffic to stop.

A switch is attached to the post which will enable a police officer to cut off the "go and stop" arrangement at nights and when traffic is light, and when the switch is regulated there is a red light at the top which burns to serve in the capacity as the one now in use. If the experiment proves satisfactory during the 30 day trial, the council will probably purchase it, and have it installed permanent.

JUNIOR HIGH TROOP FORMED

Fred Casady Will Take Charge of New Group of Scouts

A junior high school Boy Scout troop was organized by the local Scout committee Tuesday evening at the Graham high school building and Fred Casady of the Princess and Castle theatres, who has had experience in Scout work, will take charge as scoutmaster.

This will make the third Scout troop in the city. The other two are meeting regularly with D. R. Merrell and Cecil Puckett as scoutmasters.

Mr. Casady announced that he would lead a hike for all boys 12 years or more of age, regardless of whether they are Scouts, Saturday morning. Boys who want to go are requested to be at the Graham high school playgrounds promptly at 8 o'clock. They will return by noon.

GAIN IN PERSONAL PROPERTY SHOWN

Assessments Increased, Complete Report Reveals, But Real Estate Will Be Lower

ONLY PARTIAL REPORTS IN
In Nine Townships Land and Improvements are Assessed at \$11,60 Less Per Acre

Although personal property is assessed higher this year, according to final reports from township assessors compiled by the county assessor, Earl F. Priest, real estate will show a loss, based on returns from nine townships which have been received by the county assessor.

Land and improvements in the nine townships reporting are appraised at \$11,60 less per acre than at present. The appraisement just completed will be the basis for taxation next year. Real estate improvements were assessed the last time three years ago, and the law provides for reappraisal only every four years, but farmers brought pressure to bear to get a new assessment this year because of their belief that farm realty was appraised too high for taxation purposes.

Complete figures and comparisons with three years ago can not be given until all reports are received from the townships.

The personal property report of the county assessor reveals that every item on the personal property list is assessed higher on the average than last year, with three exceptions, and in two of these cases the average taxation value is the same as last year.

Farm implements are given an average valuation this year of \$213 per farm, as compared with \$207 last year. Fourteen hundred and forty-three were assessed at a total value of \$307,810.

There were 2,981 automobiles and trucks listed by the assessors and they were valued for taxation at \$735,790, making the average value of each \$247. Last year the average assessed value of automobiles was \$259.

The assessors listed 5,613 horses, giving them a tax value of \$477,735, which is an average of \$85 each. Last year the average was \$74.

Five hundred and forty-two mules were assessed at \$44,675, making the average appraisement \$82 each. The 1924 average was \$77.

Milk cows numbering 4814 were given a combined valuation of \$301,440 and their average appraisement value is \$62. This is a gain of \$4 per cow over last year.

The assessors listed \$4,37 other cattle and gave them a combined value for taxation purposes of \$166,625, making their average tax value \$30 a head. The average was the same last year.

Fifty-nine hundred and sixty-three head of sheep were assessed at \$61,520, making the average valuation \$10.32. The 1924 average was \$9.75.

The difference between the hog market March 1 this year and at the same period last year is reflected in the big increase in values placed on hogs for assessment purposes.

This year assessors listed 11,488

THESE ARE HARD DAYS FOR SLAPSTICK ARTISTS

IS APPOINTED SPECIAL JUDGE

John W. Craig Selected to Try Billings Foreclosure Suit

John W. Craig, of Greensburg, judge of the Decatur circuit court, has been elected to act as special judge in the case pending of Walter E. Smith against George F. Billings and others, in which Carlton Chaney, one of the defendants, filed the motion for a change of judge. The action is a complaint to foreclose a mortgage and on notes.

In the case pending of Carlos H. Mansfield against Walter S. Mansfield and Miles S. Cox as administrator of the estate of Zelma F. Mansfield, the partition of real estate was granted and a farm ordered sold in order to make a settlement.

PRIMARY COST 42 CENTS A VOTE

Claims Allowed by Council Show Expenses to be \$727.75—Average \$65.50 a Precinct

TOTAL OF 1760 VOTES CAST

June 4 is Last Day for Candidates to File Expense Account Under Corrupt Practices Act

It cost the taxpayers of the city of Rushville 42 cents for each vote in the city primary election, May 5, according to a detailed report of election expenses made Tuesday night by Earl Osborne, city clerk, to the council.

The total cost for the election figured \$727.75, and the various bills were passed and paid. Each precinct being \$65.50 and he is to pay his precinct expenses, with the average being \$65.50, an due is to pay his election officials, meals and other incidentals. In addition there were bills for booths, ballots and advertising.

Figuring on the basis of 1,760 votes cast in the election by both parties for the four candidates for mayor, the election cost about 42 cents a vote.

The council last fall appropriated \$1,700 for city elections for this year, which still leaves about \$900 for the November election. According to the costs of conducting the election here, it is about the average for most cities. In Connersville the per capita cost was more than 60 cents, while in Lebanon the cost was only 15 cents a vote.

So far candidates have neglected to file their expense accounts for the primary election, and Earl Osborne, city clerk, today called attention to the fact that all candidates are required under the corrupt practices act, to file with him a statement showing their expenditures in the campaign. The last day for filing is Thursday, June 4. If the candidates had no expense, they must so state in their statement to be filed with the clerk.

The statements of campaign expenses and all promises which were made during the campaign, must be filed with the city clerk not later than thirty days after date of the primary. The statements must be sworn to before a notary public or other proper official.

Candidates who fail to file their statements with the clerks as they are required to do are subject to a fine of not less than \$300 and not more than \$1,000. In addition they may be imprisoned for a period of not more than one year.

REGISTERED NURSE TO SPEAK

Miss L. E. Renwick, registered nurse, working in this city and Rush county under the auspices of the Indiana State Board of Health, will give an address at the First United Presbyterian prayer meeting Thursday evening, May 21. She is to tell about her work among the Jews in the Chicago Jewish quarters, where she has been for several years as a nurse and a community worker. The hour is 10:30 o'clock and as many as can do so are invited to this meeting.

TAKEN TO LONG HOSPITAL

Peter Connelly was taken to the Robert Long hospital in Indianapolis today where he will undergo an operation.

PRESBYTERIANS TO RENEW OLD BATTLE

Dispute Between Fundamentalists and Modernists Expected When 137th General Assembly Meets

MORE TALK OF CHURCH UNION

Demand Will be Made That Presbytery of New York be Expelled From Church at This Time

(By United Press)

Columbus, O., May 20—Renewal of the battle between fundamentalists and modernists is expected when the 137th general assembly of the Presbyterian Church in the U. S. A., meets here tomorrow.

The first shot will probably be fired when Dr. Clarence Edward Macartney of Philadelphia, retiring moderator, opens the assembly with his inderatorial sermon, "Reconciliation Through Christ." Dr. Macartney was elected by the General Assembly of 1924 as the leader of the Conservatives on the direct issue based on the preaching of Dr. Emerson Fosdick in the First Presbyterian Church of New York City.

Dr. Fosdick is a Baptist but for years served as a special preacher in that church. Dr. Macartney and others took exception to some of his pulpit utterances as heretical. The General Assembly of 1924 decreed that Dr. Fosdick's occupancy of the Presbyterian pulpit was irregular and invited him to either accept the Presbyterian creed or cease his preaching in the Presbyterian Church. Dr. Fosdick refused to bind himself to the Presbyterian creed, but continued to occupy the First Presbyterian pulpit in New York for many months. A complaint against the Presbytery of New York will therefore be presented to the General Assembly by 12 ministers and four elders of the Presbytery of New York, headed by Dr. Walter D. Buchanan. The New York Presbytery is charged with "dishonest action" and "error" in ten specific counts.

The Presbytery of Chester, Pennsylvania, will present at the General Assembly an overture demanding that the Presbytery of New York be excommunicated, its property taken over, and a "new loyal" Presbytery set up in its place.

Among the charges brought against the New York Presbytery in addition to the Fosdick case is the accusation that the New York Presbytery has licensed to preach young ministers who did not accept such Presbyterian fundamentals as belief in the Virgin Birth and the Miracles of Jesus.

So bitter is the feeling in Baltimore Presbytery against Philadelphia Presbytery for having started the controversy that Baltimore Presbytery will ask the General Assembly to separate it from the Presbytery of Philadelphia in the voting.

TRAINS DETOUR DUE TO WRECK ON C. I. & W.

Freight Car Loaded With Coal Jumps Track Near Liberty, Delaying Traffic All Day

NO. 35 BACKS TO RUSHVILLE

A slight wreck on the C. I. & W. railroad near Liberty this morning, caused a delay in traffic of three passenger trains which were forced to detour in this city.

A freight car loaded with coal jumped the track and the heavily loaded car was thrown crosswise of the tracks, making it an all day job getting it back.

The early morning mail train, due here at seven o'clock went as far as the wreck, and then backed to this city and was detoured over the Pennsylvania to Richmond, and then to Cottage Grove, which is east of the wreck. The 10:47 passenger to Cincinnati, also detoured in this manner, and the train from Cincinnati to Chicago, due here at 10:47, came over the Pennsylvania via Richmond, and went from here to Indianapolis and Chicago.

The wreckage was expected to be cleared so that evening trains could resume their schedule.

Womanless Wedding

PERSONAL POINTS

—Miss Grace Schaffer spent this afternoon in Indianapolis.

—E. S. Peterson of Joliet, Ill., was a business visitor in this city today.

—Albert Oster of Denver, Col., is here for a visit with his brother Cornelius Oster.

—Gaston P. Hunt and Charles F. Wilson transacted business in Orange this morning.

—Theodore Heeb left this morning for Cincinnati, O., where he will make a short business trip.

—Mrs. Nora Huff, who was called to Glenwood by the serious illness of S. Z. Bell, has returned to her home in West Virginia.

—Mr. and Mrs. Charles Schlagel of Glenwood are visiting their daughter, Mrs. Robert Marshall and family near Camden, Ohio.

—Mr. and Mrs. Sam Young have returned home from Kokomo, where they spent the week end with their son, Dr. Elmer Young and family.

—Harold Pearce returned home Tuesday evening from Indianapolis where he underwent an operation last week at the Methodist hospital for sinus trouble.

—Mr. and Mrs. R. H. Jones have returned home from Chicago, where Mr. Jones took treatment in a hospital in that city, and whose condition is reported favorable.

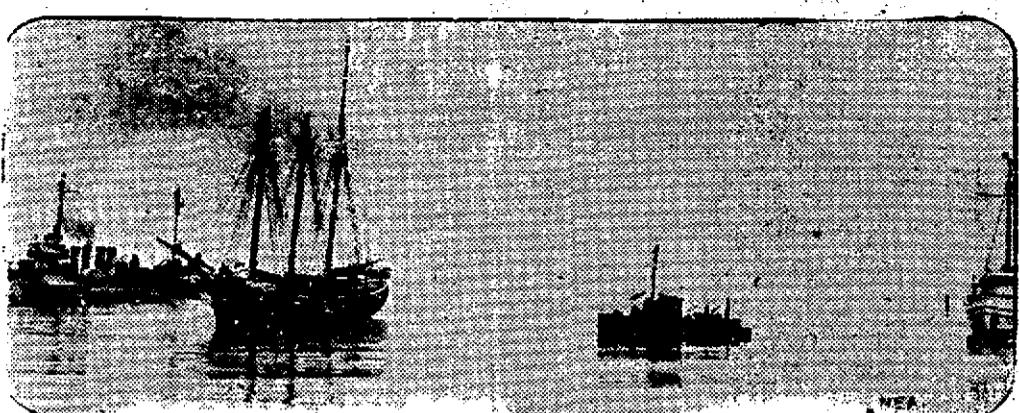

—Mr. and Mrs. J. R. Ball and daughter of Enid, Oklahoma, are spending two weeks in this city visiting with his parents, Mr. and Mrs. James Ball and other relatives here.

—Mrs. Hattie Dillard and Mrs. Doris Berry have returned from Indianapolis where they attended the forty-first Rebekah Assembly of Indiana and received the assembly degree of Rebekah Odd Fellowship.

—Walter Megee of Eaton, Ohio, spent Tuesday evening in this city, the guest of Mrs. Edwin Megee and family. He left this morning for Dayton, Ohio, where he will transact business before returning to his home.

—J. W. Hogsett left this morning for Columbus, Ohio, where he will attend the General Assembly of the Presbyterian church, as a commissioner from the Whitewater Presbytery. The Rev. Forrist Taylor, minister of the Lawrenceburg, Ind., Presbyterian church and Mr. Hogsett are the only representatives from this presbytery to attend the national yearly meeting of the church, which convenes Thursday morning and will last for ten days.

COAST GUARD "BOTTLES" RUM ROW

This picture gives you an idea of how the rejuvenated coast guard has bottled up the bootleg fleet on rum row. Left to right you see a coast guard destroyer, the General Paul which is alleged to be a rum ship, a coast guard patrol and coast guard cutter.

COUNCIL ACTS TO IMPROVE CITY PROPERTY

Continued from Page One

care of most rainfalls, and in excessive rainfalls the water can flow over the streets, but will be taken care of more rapidly than under present conditions. The cost of \$45,000 is believed to be in excess to the assessments that would be necessary.

The plan of reducing the size of the ditch will be studied out, and another report made by the next council meeting, so that something definite can be done on the drain as soon as possible.

The engineer for the city was ordered to draw plans and specifications for curb and gutters in West Eleventh street, extending on both sides of the street from Main to Jackson streets. No curb or gutter will be built through the park, but the engineer was ordered to draw plans for curb and gutters on the south side of the street from Sexton west to Spencer. This action is being taken in view of the possibility of improving the street this summer.

A petition was granted for curb and gutters on the west side of Oliver street, from Ninth to Eleventh, and the engineer ordered to make plans and fix the grade. A resolution also calling for a sidewalk from Willow street, east a half block on the south side of the street, was passed, following the action on a petition filed several weeks ago by M. C. Dawson.

The fire committee was instructed to continue their plans with remodeling the city hall, and reported that the rear end of the building was about completed, and work on a new

WANT ADS BRING RESULTS

front with modern doors will be in the program for the remodeling.

It was decided at the meeting that the street oiling would not commence until sometime during the period of June 1 to 15. A proposition of an oiling concern of Richmond was presented to the council, but it was decided that the oiling could be done cheaper by the city machinery.

The clerk was instructed to notify O. M. Dale to place cement sidewalks in front of his office rooms in West Third street, to make them uniform with business district walks. Several trees were removed from the lawn last summer, and the orders of the council are that the lawn is to be made into a sidewalk, extending to the curb.

The park board was given permission to rent the refreshment stand at the park to a reliable person at a stipulated rental a month, and the board also was given full power to govern entertainments, concessions and other matters that want the use of the park. A church revival in a tent will be given permission to use a west portion of the park within the next few weeks.

The park board ordered the immediate erection of the band stand in the park, as decided upon last fall when it was too late to proceed, and the place of locating it will be decided upon at once. The toilets in the park will also be connected with the sewer, and the committee was making an inspection trip of the park this afternoon for the purpose of looking over the situation.

AMUSEMENTS

"Sundown" At Princess

Two hundred and fifty thousand head of cattle, stretching out over a vast desert as far as the crimson horizon! Surging and rolling like an animated ocean—a great, black serpent crawling over a silent plain.

This is the awe-inspiring sight which will greet patrons of the Princess theatre today when "Sundown," First National's highly-heralded epic of the cattle country will be shown.

It tells of the pioneers of today, the cattlemen who fought for what they had and then were forced by nesters and homesteaders to cross the Mexican border in search of new grazing lands for their herds.

The picture was directed by Lawrence Trimble and Harry O. Hoyt, with ten cameramen constantly "shooting." Its cast comprises Jessie Love, Hobart Bosworth, Roy Stewart, Charlie Murray, Jere Austin, Charles Crockett, Wilfred North, Charlie Sellon, Arthur Hoyt and Margaret McWade.

"Happiness" At Castle

The comedy delight of the year is "Happiness," the second motion picture made by Laurette Taylor for Metro, which opened today at the Castle theatre. Miss Taylor is simply revishing as a happy-go-lucky little shop girl who brings the joy of living into a home made colorless by too much wealth. Her personality shines like radium, and is as ingratiating to those who need treatment for the blue and other nervous ailments.

The picture was taken from the play by J. Hartley Manners, and the author himself made the screen adaptation and continuity. Chester A. Lyons was the photographer. A fine supporting cast includes Pat O'Malley, Hedda Hopper, Cyril Chadwick and others.

I. & C. OPPOSES BUS LINE OPERATING

Continued from Page One and had receipts of \$305,301.36 as against 385,576 passengers and \$206,408.44 revenue in 1924. Adverse business conditions are responsible to a great degree, he said.

Reductions in interurban fares by his lines has not brought about an increase in receipts, he said.

Crawfordsville Opposed

Crawfordsville, Ind., May 20—The city council today forwarded a resolution to the state public service commission requesting that the Hiner Red Ball Bus line be refused a license to operate between Indianapolis and Crawfordsville.

Present transportation facilities are adequate and the motor busses will prove detrimental to existing lines, according to the council.

RUM BOAT SEIZED

Cleveland, Ohio, May 20—Lake Erie's dry navy chalked up its first capture today with the seizure of a thirty-six foot rum boat off Erie, Pa., and 350 cases of whiskey, it was reported to federal officials here. The crew of two were held for the grand jury. The capture was made by the navy's lake flagship patrolling out of Cleveland.

VETERAN INJURED

Dallas, Tex., May 20—E. M. Collins, 79, of Little Switzerland, N. C., attending the Confederate reunion here, was slightly injured when an airplane sideslipped and wrecked at the start of a flight today. The fall marked the veteran's first attempt at the flying game, Collins said.

GUNN HAYDON

ARLINGTON

Mr. and Mrs. Fred Woods and son Jesse and Mr. and Mrs. Leonard Blank spent Sunday in Muncie.

Miss Mary Baldridge, who was operated on for appendicitis at the M. E. hospital at Indianapolis, returned home Saturday.

Mr. and Mrs. Ora Adams and son Carl spent Saturday in Indianapolis.

Miss Dorcas Proctor, former teacher of Arlington, will be at Manila next year.

Will Hufferd and son Ralph attended a sale at Greenfield Saturday.

Mrs. Zula Houston attended the Postmasters' convention at Indianapolis this week.

Mr. and Mrs. Russell Six are the parents of a baby girl born Saturday, May 16.

James Dunn and family have returned to their home at Niagara Falls after a short visit here.

Mr. and Mrs. Frank Downey and grandchildren visited Glen Downey at Cincinnati Ohio last week.

Prof. Logan of Newcastle was a guest at the home of John Conway Sunday.

A reunion of the cousins of Pressnell Folger was held Sunday at the home of Mr. and Mrs. H. F. Pressnell. The following persons attended: Mr. and Mrs. D. M. Pressnell and E. C. Macy of Arlington, L. H. Macy and daughters of near Arlington, Mr. and Mrs. Mrs. Oscar Folger and two children of Lapel, Mr. and Mrs. Earl Folger and family of Shirley, Mrs. Estelle Branson and adopted daughter and husband, Mr. and Mrs. Marshall Moore of Indianapolis, W. O. Folger and daughter of Indianapolis, Mr. and Mrs. Ottie Folger and daughter of Richmond, Mrs. Bessie Conner and two of her children of Anderson. A two-course dinner was served at the noon hour. The afternoon guests were Mr. and Mrs. Charlie Vanzandt and family and Mr. and Mrs. Walter Vanzandt and family. The day was spent sociably with music, both instrumental and vocal.

Mrs. Tom Newhouse fell off of a step ladder Tuesday and she was taken to Shelbyville to the Inlow Brothers' hospital where she underwent an X-ray examination. No bones were found to be broken but the ligaments were torn loose on her shoulder.

BIRTHDAY CELEBRATED

Prof. and Mrs. J. E. Bean, 604 E. 7th street, entertained at a party Monday evening in honor of the sixteenth birthday of their daughter Mae Etta. The evening was spent with music and games and a two-course luncheon was served. Guests from out of the city were Miss Beatrice Dixon of North Vernon, Miss Harriett Walker of Anderson, Miss Jessie Etta Garrett of Dayton, O., and Miss Laura Belle Evans of Frankfort, Ind.

Who Shall Enter:—Not every one that saith unto me, Lord, Lord, shall enter into the Kingdom of heaven, but he that doeth the will of my Father which is in heaven. Matthew 7: 21.

Prayer:—Blessed Lord, Thou art the Teacher, and Thou hast taught us that we are accepted only when we come to Thee with our whole heart.

Home Ownership

The Daily Republican today publishes a Better Homes Section as an incentive to home ownership, with the thought that a home owner makes a good citizen.

Home ownership is a principal factor in the making of citizenship. The community that is largely composed of home owners is always progressive and is a desirable place to live, making its prospects for growth much better than the community that is made up mostly of renters.

Rushville is noted for the beauty of its homes, expressing the pride which their owners have in keeping them attractive and pleasing to the eye. In the vast majority of cases, the most beautiful homes are those whose occupants are the owners.

The renter as a rule takes little pride in the surroundings of his home, its upkeep or its furnishings. He is always dreaming of that home of his own and he saves all of his energy and ingenuity until that time when he can spend it on his own possessions.

Thus the home owner is more dependable, more stable and more desirable, because he feels that he is a part of the community. He takes more interest in community activities, knowing that it is his permanent home and he is more likely to be a force for good government, than if he is unsettled and in doubt about the term of his residence.

The home owner pays taxes and is concerned about how the money is spent, which makes him a desirable citizen. He demands good laws and their enforcement for the protection of his family and his property.

The man who owns his home has a high respect for property and is anxious to keep it looking its best. He is thrifty and eager to save so that he may add the latest conveniences and enjoy the best furnishings, with the knowledge that it will not be damaged by frequent moving.

The home owner invariably has strong family ties and a pardonable community pride that makes him the most desirable citizen.

Rushville wants all of the citizens of this type that it can get and any influence that will cause a man to build a home in Rushville is eminently worth while.

Thought 3 Little Children Needed Mother's Care

"My stomach suffering was so severe that I could not have lasted much longer. I did not care so much for myself but did not want to leave my three little children who needed a mother's love and care. A cousin in California wrote me about May's Wonderful Remedy and I took a course of it. I have since been entirely well." It is a simple, harmless preparation that removes the catarrhal mucus from the intestinal tract and allays the inflammation which causes practically all stomach and intestinal ailments, including appendicitis. One dose will convince or money refunded. For sale by all druggists.

June Stars

June, the month of brides, is the one in which to look for the Big Dipper high in the western sky, with the end of the handle nearly due north.

Whether the dipper has any significance, appearing as it does in June, the accepted time for romance and marriage, is not known, but it must be acknowledged that a dipper might be considered in the light of household equipment.

However, the star gazers tell us that dipper as used in this connection is not related in any sense with the well known kitchen implement, but that it gets its name from the fact that it is shaped like a dipper.

The central star in this constellation is Bootes, which is generally spoken of as The Herdsman and is also known as the Ox-driver, who is supposed to be driving the seven plough oxen, as the seven stars of the Big Dipper were also known, around the north pole of the heavens.

June nights are splendid nights for communing with the stars. The Big Dipper will form an interesting study for those who are interested in the starry heavens and like to gaze at them and let their imagination roam at will in trying to fathom the intriguing mysteries which they conceal.

FIFTEEN YEARS AGO TODAY

From Daily Republican Friday, May 20, 1910

Enthusiasm and original ideas of the betterment of Rushville overflowed, bubbled over and overspread all of the business men who attended the regular bi-monthly meeting of the Retail Merchants' association in the court house last night. About thirty-five business men were present and formed a nucleus for greater things later.

Once more the time of the year rolls around when the high school graduate holds the center of the state. The commencement exercises will be held in the Main Street Christian church next Friday evening. The speaker for the occasion will be S. A. Long of Dayton, Ohio. The baccalaureate sermon will be preached by the Rev. J. W. Turner, pastor of the St. Paul M. E. church next Sunday evening at the Main Street Christian church. There are twenty-two students who will get a diploma from the high school.

The new bank safe has arrived. It took a four horse team to haul it and weighed three tons. (Falmouth correspondent.)

Mrs. Ollie McDonald and son Raymond visited her parents, Mr. and Mrs. Harrison Brookbank this week. (Orange township correspondent.)

Rev. Carl Berry, Mrs. Frank Reddick, Mrs. J. A. Sipe, Mrs. R. L. Hamilton and Mrs. James Anderson attended the Christian Sunday school convention at Anderson this week. (Carthage correspondent.)

Ben Humes left this morning for Bloomington, where he will be the guest of friends in Indiana University and will attend a dance.

Miss Hattie Mock left today for Decatur, Ill., where she will spend a week's vacation. She will also visit in St. Louis, Mo.

Chris Bloomingdale of Cincinnati will spend the week end with his wife who is visiting her parents, Mr. and Mrs. Lewis Cline in North Harrison street.

The meeting of the D. A. R. Thursday afternoon was one of unusual interest, it being the first one held since the rooms for the library and rest room were decided upon. The members discussed plans for the furnishing of the library and rest room and great enthusiasm and interest was shown.

Miss Arleigh Offutt has resumed her duties at the L. & C. traction offices after a two weeks' vacation.

Oliver Willard Pierce of the Indiana Conservatory of Music, who was advertised to give a recital here last Monday night, will give the entertainment in the corridors of the court house next Tuesday evening. Mr. Pierce will be assisted by Miss Jessie Kitchen, a pianist of ability, who studied under Mr. Pierce.

Stewart's Washington Letter

BY CHARLES P. STEWART
NEA Service Writer

WASHINGTON — Suicide, for generations, has been a recognized method in China of insisting on needed reforms. A reformer works and toils. No good. He's ignored. Finally, "I'll go the limit," he decides. Writing a letter, urging the reform he's dying for, he bumps himself off. "I wonder why," observes the coroner.

The letter is opened and read. Pretty soon, all over town, "Wuxtry! Wuxtry! Wuxtry!" the news kids are hollering. "The Hon. So-and-So kills himself for such-and-such a reform!" Public attention is focused forcibly on the reform. Everybody gets to talking about it. If it's any good, often it's adopted promptly; whereas it might have lagged for years otherwise.

ACCIDENTALIZED, this was General (now Colonel) Billy Mitchell's system. He sacrificed his job to concentrate attention on his fight for aviation reform. But, the Oriental way is better.

How much more emphatic General Billy would have been if he'd gone up in an airplane and crashed, on purpose, from a three-mile altitude—having served notice previously what he was doing it for.

ON the same principle, President Coolidge missed a chance to do a great work in behalf of safety from automobiles when he dodged one of them the other day. It wouldn't be fair to say he did this from deliberate indifference to the National Safety Council's cause. Probably he dodged thoughtlessly.

But what a roar would have gone up about drivers' recklessness if one of them had hit the president! It would have meant a widespread tightening up of

regulations that would have saved thousands of lives.

WELL, that opportunity's lost. But isn't there some other way of accomplishing the same result? Inasmuch as no first-class notability is available for the experiment, can't the individual prominence of the subject be offset by numbers? We have those all right.

Approximately 20,000 persons died under automobile wheels throughout the country last year. The trouble is, they didn't die at once. They were strung along, one or two at a time and an hour or two apart. The whole 20,000 never furnished one such peppy story as the loss, say, of 200 lives in a single theater fire would have done.

It's all very well to foot them up and show the appalling total at the year's end, but in that form it packs no punch.

OBVIOUSLY the killings must be bunched to do any good. So I propose this: Assemble 500 volunteer dare-devils here in Washington, as a conspicuous central point. Pack them into Pennsylvania avenue—children predominating, if possible. Then turn all the city's autos loose on them—from east and west; from north and south at street intersections. Give the drivers carte blanche to

jump on sidewalks, to mount street car loading platforms, to disregard safety lines, just as they do now—to kill and maim, all day.

I ESTIMATE the dead would number at least 1000: the mangled, all the rest. And it would arouse public opinion at last. At what a saving in the annual number of auto fatalities, too!—about 95 per cent. For there wouldn't be many more auto killings after that.

I'm sorry I can't volunteer for this service myself. Somebody must be left to report the event. Besides, I'm so used to dodging auto that it's a second nature to me. I can't help myself.

Mr. and Mrs. Carroll Clifton and daughter of Ging spent the day Sunday with Mr. and Mrs. Elsworth Kiser. Mr. and Mrs. William Utley and Charles Myers were in Richmond Saturday.

H. C. Morgan and son J. S. Teague and three sons N. B. Schell and J. M. Morgan spent the evening with Mr. and Mrs. E. L. Pennington and children Saturday.

Myron Addison visited Marion McBride Saturday night and Sunday.

Mr. and Mrs. Carroll Clifton and daughter of Ging spent the day Sunday with Mr. and Mrs. Elsworth Kiser. Mr. and Mrs. William Utley and Charles Myers were in Richmond Saturday.

Mr. and Mrs. Ernest Burton and son of Connersville Mr. and Mrs. Fred Myers, William Utley, Mrs. William Utley, Mr. and Mrs. Walter Martin and son, and Charles Myers visited Mr. and Mrs. John Myers and daughter Sunday.

Mr. and Mrs. Harley Bearcraft and children spent the day Sunday with Mr. and Mrs. Charles McCorkle.

Mr. and Mrs. William Lucas of Newcastle called on Mr. and Mrs. O. C. Thompson Sunday afternoon.

Mr. and Mrs. John Cleveland and daughter Mossie spent the day Sunday at the home of Mr. and Mrs. Harve Bradburn.

Mr. and Mrs. Bert Hobbs and daughter of Rushville visited relatives here Sunday.

Mr. and Mrs. Harry Becher entertained Sunday Mr. and Mrs. Howard Becher and daughter of Greensburg and Charles Becker of Rushville.

Mr. and Mrs. Charles F. Culbertson had for Sunday dinner guests Mr. and Mrs. Culey Francher and daughter Lucy of Ging, Mr. and Mrs. Will Sheral, Charles Marshall and Vernon Culbertson. Mrs. John Kirk and daughter Margaret were guests during the afternoon.

Mr. and Mrs. John W. Pratt and little daughter Marjorie of Spiceland spent Sunday with Mr. and Mrs. M. L. Pratt.

Fred Blessinger was in Newcastle on business Monday.

Miss Marie Hayes of Indianapolis spent the week-end with Mr. and Mrs. Dick Kirkpatrick.

Orville Porter, who has been seriously ill, is improving.

Mr. and Mrs. John Graves and family spent Sunday with Mr. and Mrs. William Joyce and family.

Mr. and Mrs. Will Wright and family entertained Sunday for dinner their son Carl of Cincinnati and Forrest Marshall, Elvin Fowl, Miss Alta Fowl, and Laura Maple of Rushville and Margaret Wartfield of Indianapolis.

Wilbur Winkler, Herschel Hankins, Howard Aldridge, Carl Aldridge, Russel Humans, Reginald Sweet, the Misses Dorothy Ellerman, May Aldridge, Virginia Davis and Helen Winkler spent Sunday evening with Frances and Byron Smith.

Mr. and Mrs. Michael Humans and family spent Sunday at the home of Mr. and Mrs. Dickens of near Rushville. A bountiful pitch-in dinner was served at noon.

Mrs. Paul Norris and children spent Thursday with her parents, Mr. and Mrs. Hal Green and family.

Miss Frances Baker of Indianapolis spent the week-end with Mr. and Mrs. Ross McBride and family.

Mrs. George Hay spent Friday with her son, Mr. Snoddy of near Glenwood.

Mr. and Mrs. Soren Lee and Mary Hankins of Richland spent Sunday with Mr. and Mrs. Everett Lee. Mr. and Mrs. Frank Lee and family were visitors in the afternoon.

Mr. and Mrs. Dale Fisher and Miss Dora Winkler visited Mrs. Ray Sample Sunday afternoon.

MAY REJOIN TEAM BY LAST OF MONTH

Babe Ruth Will be Able to do Bench Duty When Yankees Return East May 28

RECOVERY HAS BEEN RAPID

Giants Lose Only Two Games to Western Clubs—Robins Doing Almost As Well

By HENRY L. FARRELL

(U. P. Staff Correspondent)

New York, May 20—Babe Ruth will be able to join the floundering New York Yankees when they return home after the first western invasion of the year. The team will be back in the east May 28 and the Babe should be ready to do some bench duty.

His recovery from the operation he underwent was more rapid than expected, but he is weak and soft from being in bed for more than five weeks. He is to be permitted to work out every day at the Yankee stadium but the doctors have warned him not to do too much.

"I think I've learned by this experience to take care of myself," the Babe said. "I was never sick before and I never want to be sick again."

Ruth's return to the game is almost certain to improve the Yankees, who have been in a very low state of mind. It isn't the actual batting or fielding of the Babe that is needed. It is the Ruth threat and the morale effect of the Babe upon the opposition. Ball players say that even the best of pitchers are worried when Ruth is in the game and that the threat affects their pitching against the other batters. When Ruth is not in the game opposition clubs considered the Yankees merely as a baseball team and they have been treated as such this season.

The Yankees have not been going right at all. When the pitching is good they can't get runs. When the team is batting the pitching goes bad and when the batting and pitching is ordinary the fielding falls off.

The Yankees are the only eastern team that is failing to hold up its end through the first intersectional struggles over the season.

The Giants have lost only two games to western clubs—one to Chicago and one to St. Louis. The Brooklyn Robins are doing almost as well, having lost only three games—to Pittsburgh, St. Louis and Chicago. The furious Phillies have lost four games to the west—two to the Pirates and one each to the Cardinals and the Cubs.

The Cincinnati Reds took a bad tumble when they hit the east—losing four games in New York, three in Brooklyn and one in Boston.

The Philadelphia Athletics, setting the pace in the American League have lost only two games since they have been in the west and they were both dropped to the Chicago White Sox. The Washington Senators lost four games—two in Chicago, one in Cleveland and one in St. Louis.

The Yankees left a trail behind them all over the west. They lost three in Chicago, one in St. Louis, and two in Detroit. The Red Sox dropped four in Cleveland, three in St. Louis and two in Detroit.

SPORT CHATTER

Boston—Harvard athletic officials expect the big stadium to be filled Friday when Paavo Nurmi, Finnish running star, makes an attempt to establish a new world's record for a mile. Admission is to be free and the athletic commission said more tickets had been applied for than for a Yale football game.

New York—Louis B. Daily Jr., of East Orange N. J., has been added to the team of young players that is to be sent to Wimbledon next month by the United States Lawn Tennis Association to play in the British national championships. Ray Casey and Johnny Hennessey were appointed some time ago.

Michigan City, Ind.—Wayne "Big" Munn is training for his Decoration Day bout with Ed Strangler Lewis by climbing trees. Lou Talaber, former middleweight champion who is training him, convinced Munn that it was a good conditioner and now has a hard time pulling him away to grapple with his sparring mates.

Chicago—The national A. A. U. women's track meet is to be held at Pasadena, July 11. Fred Steers, president of the Central A. A. U., and chairman of the event announced today. It will be sponsored by the Pasadena Athletic and Country Club.

WHEN SANDE AND FLYING EBONY TRIUMPHED

Under the skillful handling of Earl Sande, jockey, who recently left a hospital cot, Flying Ebony raced to victory in the Kentucky Derby. It was the first time in the history of the great racing classic that a field horse finished first. In the top picture Sande is shown near the rail leaving Flying Ebony out for the home stretch. Below, Sande is shown leading for the wire.

Dundee Through

By HENRY L. FARRELL
(United Press Sports Editor)

New York, May 20—"Get him back for fifteen rounds and I'll knock him out," Johnny Dundee, veteran of sixteen hard years in the ring told his manager, Jimmy Johnston, after he had lost a twelve round decision to young Sid Terris.

Everyone at the ringside at that last boxing show in historic old Madison Square Garden left the arena convinced that Dundee was through as a first class fighter.

"It's a shame to see that fellow try to keep on going. He's only the shell of the old Dundee and he's bound to get it sooner or later," a friend remarked to Johnston after the fight.

"He doesn't think so. He thinks he won the fight and I think that the worst they could have given him was a draw," Johnston replied.

No manager wants to admit that his fighter has been licked and for all his loyalty it took no great power of observation to see that Johnston was badly worried all during the fight and that he was greatly relieved when the final gong found the great little man off his feet.

Johnston sharply rebuked Dundee after the first round for working too fast and for jumping around the ring and bounding off the ropes like he used to do in his prime.

"Don't do any of that stuff until the fifth round," Johnston said commanding. "Let that other fellow do the work. You can't step with him and don't try."

Dundee opened the throttle, but the old power wasn't there. He didn't get the response from his arms and legs that a stout heart called for. The motions of the machine were there, but the motor was not equal to high speed under the load of age.

Going into the eleventh round, Johnston squatted low in front of Dundee, where he could see the fighter's face, shook him up and pleaded:

"There's only six minutes left, Johnny, only six minutes, do you hear me? You can go six minutes more. Go out there now and get all over him. You're just losing by a shade and two more rounds will give you the decision. Only six more minutes, Johnny," and he pushed him out of the corner when the gong rang.

When a veteran fighter, who has engaged in more than 600 fights, has to be told to go easy for the first five rounds and has to be encouraged with the thought that there are only six more minutes to go, he is through.

Dundee wouldn't admit it, though. Fighters with real hearts never will admit that they are through.

NORTHWESTERN WILL

PLAY I. U. SATURDAY

Crimson Batsmen Will Have Chance To Increase Percentage in Baseball Game

OHIO STATE IS SLIPPING

Bloomington, Ind., May 20—Indiana University will remain in second place in the conference baseball race until Saturday when the Crimson batsmen will have a chance to increase their percentage at the expense of Northwestern. Ohio State seems to be slipping from the first place position which it had undisputedly for several weeks, losing to Illinois last week and facing hard games within the next few days. A return game with the Illini this week will precede a three-day series next week, when Wisconsin is played at Madison on Thursday and the Minnesota nine is met at Minneapolis on both Friday and Saturday.

Indiana on the other hand has a comparatively easy schedule for the remainder of the season. All of its games are with teams which it has beaten before in the season, including Northwestern and Purdue, the conference tail-enders. The Chicago game at Bloomington should be the hardest of the remainders of the season as the Maroons have been playing superior baseball during the last few weeks. Iowa, the team which is tied with Indiana for second place has three hard games left, one with Minnesota and two with Michigan.

Tomorrow's game with Wabash will give Coach Dean a chance to use one of his rookie pitchers, according to the showing made by Wabash in the last few weeks. Either Ford or Kaufman will start on the mound in tomorrow's contest with Woodward and Link in reserve. Irwin, Rosbrugh and Lewis all will be used during the game, according to Coach Dean's plans.

KEEPING ONE EYE ON THE SCORE BOARD

Yesterday's Hero: Walter Johnson, Washington pitching star, went in as a pinch hitter in the 9th inning with a runner on base and knocked a home run that beat the Indians 4 to 3.

The Cubs knocked Nehf out of the box and beat the Giants 8 to 2. The Giants had won eight straight games.

Barnes held the Reds safe for six innings but he weakened late in the game as the Braves lost, 7 to 4.

Sam Jones blew up in the sixth inning when he issued four passes and the Tigers beat the Yankees 11 to 5.

George Sisler hit safely in his 34th consecutive game and help the Browns win from the Red Sox 8 to 2.

The Athletics got to Ted Lyons for three runs in the 9th but the White Sox had a lead and won 4 to 3.

Good support behind Rube Erhardt gave the Robins a 9 to 5 victory over the Pirates.

CORYDON MINISTER TO LEAD DISCIPLES

Rev. J. M. Vawter Elected President at Annual State Convention in Session at Marion

NO DRY CHANGE DESIRED

(By United Press)

Marion, Ind., May 20—Rev. J. M. Vawter of Corydon, Ind., was elected state president of the Indiana Disciples of Christ at the morning session of the eighty-sixth state convention here today. Resolutions protesting the proposed alteration of the Volstead law were adopted. Another resolution sanctioning the movement to raise a \$350,000 fund for the improvement and establishment of the Religious School at Butler college was introduced and will be acted on Thursday.

F. McCormack of Milton was named Vice President and J. A. Long, Indianapolis secretary. Three year members of the State Board of Directors were named as follows: Rev. Bernard Smith, of Franklin; M. R. Dennison of South Bend; R. E. Kennedy, Indianapolis; Rev. Leroy Sargent, Newcastle, and Rev. J. L. Wilkenson, Corydon.

Members of committee on recommendations for international conventions: Rev. W. E. Moore, Marion; Rev. Gerald L. K. Smith, Indianapolis; Mrs. C. C. Cumberland, Indianapolis; Mrs. Elmer Cole, South Bend; Rev. E. E. Moorman, Frankfort.

Rev. John McD. Horne, of Lebanon, was elected president of the ministerial association. Other officers will be selected Thursday. Bloomington and Lafayette are seeking next year's meeting.

EXTRADITION PAPERS SIGNED

Four Alleged Bandits Will be Returned to State for Trial

Indianapolis, Ind., May 20—Extradition papers signed by Governor Jackson were sent to Benton Ill. today for the return of four persons held there as suspects in the robbery of the Farmers' State Bank at Wadesville, Ind.

The four refused to waive extradition. The suspects are Loren Commeans and his wife, Jeanette, Charles Clayton and Mary Sislock.

Harry Webster, superintendent of the protective division of the Indiana Bankers' association, declared the cashier of the bank identified the four as the persons who routed him out of bed and forced him to go to the bank and open the safe.

MAY REST WITH JURY BY NIGHT

Bribery Case Against Former Kansas Governor Completed

Topeka, Kans., May 20—The fate of former Governor Jonathan M. Davis, accused of bribery in connection with pardoning prisoners, may rest with the jury before night. All the evidence in the case was completed yesterday afternoon.

The former governor denied charges of the prosecution and branded as false much of the testimony of state witnesses. The defense is relying wholly on his denial for an acquittal.

If found guilty, Davis will face a sentence of one to two years in the penitentiary at hard labor or imprisonment to jail for not more than a year and a fine of \$1,000.

DOUBT IF EITHER IS "BICYCLE BANDIT"

Indianapolis Police Hold Two Suspects in Connection With Fort Wayne Murder

SATISFACTORY ALIBI GIVEN

Both Men Being Detained, However, Until Fort Wayne Authorities Receive Descriptions

(By United Press)

Marion, Ind., May 20—Police early this afternoon were very doubtful whether either of two men taken into custody earlier in the day is the "bicycle bandit" wanted by Fort Wayne authorities in connection with the double murder of Miss Katherine Herbers and Howard Fisher.

After questioning the two men, detectives said they had given a fairly satisfactory account of their whereabouts the night Miss Herbers and Fisher were shot.

As a precautionary measure, however, the two were detained on a vagrancy charge until Fort Wayne authorities receive descriptions of the men.

One man gave the name of Theodore Penn, of Cincinnati, O., and the other said he was William Smith, of Louisville, Ky.

Detectives here admitted they had nothing on which to hold the two men beyond the fact that they answered in a general way the description of the "bicycle bandit" who is believed by Fort Wayne police to have been responsible for the killings.

Penn, according to detectives, was riding a bicycle when arrested.

Both men were slated on vagrancy charges and their pictures and descriptions were forwarded to Fort Wayne.

Penn was somewhat taller than the bicycle bandit described in a wire from Fort Wayne police. He was not clothed according to the description of the hunted man but resembled him in other ways, detectives said.

The man was trailed south along the eastern border of Indiana to Richmond and there he swung west on the national road, according to authorities.

Word was received here that he passed through Greenfield last night and district patrolmen and motorycycle officers were keeping a close watch for him.

Mrs. Herber and Fisher were shot to death while seated in Fisher's auto on a lonely country road, near Fort Wayne early this month.

After an investigation of the murders, Fort Wayne authorities turned to the theory that the crime was committed by a bandit who rode a bicycle and who had held up numerous "petting parties" near the spot.

Police Apologize

Portland, Ind., May 20—Police apologized today to David Green, eccentric bicycle rider.

L. R. Houser, druggist, informed officers that a man resembling the description of the bicycle bandit who is believed to have killed Howard Fisher and Miss Kathryn Herbers at Fort Wayne was seen riding a bicycle out of Portland.

Police chased him into the country before they found that it was Green.

BEGINS WEAVING HIS NET

Prosecutor Presents Circumstantial Evidence Against Negro

Martinsville, Ind., May 20—Prosecutor Remy of Marion county today began weaving his net of circumstantial evidence against John Thomas Shaw, negro, charged with murdering Mrs. Helen Hager Whelchel in Indianapolis.

Witnesses put on the stand today were to tell of seeing Miss Whelchel get off a street car near her home and of her screams after she was seized by a man and carried to an automobile one night in November, 1923.

Other witnesses were to tell of the finding of her body the next morning lying along a railroad track west of Indianapolis.

Shaw was brought here on change of venue after the supreme court had ordered a new trial from his conviction and sentence of death in the Marion county criminal court.

MRS. NIPP BETTER

Mrs. J. L. Nipp who has been ill at her home on North Main street, is reported to be slightly improved.

sows and gave them a value for taxes of \$45,655, making the average \$30 per sow. Last year there were many more sows—14,456, but their average taxation value was only \$20 a head.

The same holds true in other hogs. This year there were 43,522 on Rush county farms March 1 and they were assessed at \$351,385, making the average \$8. Last year there were 51,577 hogs on the farms and they were assessed at \$260,660, which was an average of \$5.03 a head.

Poultry was assessed at \$10 a dozen on the average this year, the same as last. Twelve thousand, five hundred and ninety dozen were assessed this year and last year there were 10,905 dozen.

Household goods were assessed on the average of \$250 per home this year as compared with \$248.10 last year. Four thousand, two hundred and fifty six homes were assessed this year and last year only 4,078.

Diamonds and jewelry were given a combined value of \$24,510 this year compared with \$21,150 last year.

Merchandise (retail stocks of goods) was given a combined taxation value of \$889,160 this year and last year the valuation was \$610,815.

Money, notes and other intangibles were assessed at \$1,080,875. Last year the same item was \$1,010,420.

PRESBYTERIANS TO RENEW OLD BATTLE

Continued from Page One:
section where the two Presbyteries for years have been joined.

The Presbyteries of Grand Rapids and Chicago will present conciliatory resolutions, urging that the controversy be dropped and that peace be restored. Possible candidates for moderator are Dr. William L. McEwan of Pittsburgh, Pennsylvania; William Jennings Bryan of Florida, who is retiring vice moderator and Dr. Charles R. Erdman of Princeton, New Jersey. Dr. Erdman was defeated by Dr. Macartney for moderator last year. He has been accused of sympathy with the Modernists, but recently proclaimed himself a Conservative.

The cases concerning New York Presbytery will be tried in executive session by the Permanent Judicial Commission, which brings its decision to the Assembly toward the close of its sessions. If the General Assembly accepts the decision of the commission, that decision is final. If it does not accept, then the whole issue is thrown into open trial before the Assembly.

The sessions of the Presbyteries here will be held in Franklin County Memorial Hall, here, and about 1,000 official commissioners will attend, representing every state in the Union; also, Alaska, Porto Rico, Cuba, West Africa and other countries.

The Assembly will transact business for 46 synods, 299 Presbyteries, 10,000 Churches and over 1,800,000 members. At about the same time the General Assembly of the Presbyterian Church in the U. S. (Southern) will be in session at Lexington. At several General Assemblies efforts have been made to merge these two branches of the denomination into one, but thus far without success.

Among legislation to be enacted will be the adopting of a unified finance system for the entire denomination on which a special commission has been at work for three years under the leadership of Dr. Joseph A. Vance of Detroit, Michigan. Plans will be launched for a national crusade for the re-establishment of the American home as the working unit for Christian citizenship to combat the evils which have grown up under the laxity of parental supervision over the growing generation, which Presbyterian leaders hold responsible for the increase of immorality and crime. This crusade will be placed under the direction of Dr. William Chalmers Covert, of Philadelphia, General Secretary of the Presbyterian Board of Christian Education.

Police chased him into the country before they found that it was Green.

Police Apologize

Portland, Ind., May 20—Police apologized today to David Green, eccentric bicycle rider.

L. R. Houser, druggist, informed officers that a man resembling the description of the bicycle bandit who is believed to have killed Howard Fisher and Miss Kathryn Herbers at Fort Wayne was seen riding a bicycle out of Portland.

Police chased him into the country before they found that it was Green.

Prosecutor Presents Circumstantial Evidence Against Negro

Martinsville, Ind., May 20—Prosecutor Remy of Marion county today began weaving his net of circumstantial evidence against John Thomas Shaw, negro, charged with murdering Mrs. Helen Hager Whelchel in Indianapolis.

Witnesses put on the stand today were to tell of seeing Miss Whelchel get off a street car near her home and of her screams after she was seized by a man and carried to an automobile one night in November, 1923.

Other witnesses were to tell of the finding of her body the next morning lying along a railroad track west of Indianapolis.

Shaw was brought here on change of venue after the supreme court had ordered a new trial from his conviction and sentence of death in the Marion county criminal court.

MRS. NIPP BETTER

Mrs. J. L. Nipp who has been ill at her home on North Main street, is reported to be slightly improved.

DEMAND COMFORT AND CONVENIENCE

COOKING PROBLEM SOLVED BY RANGE

People Think of House as Home Making and Character Building Environment

DIFFICULT TO SELL NUMBER

Demonstrated That it is More Profitable if Not Easier to Sell Home Than to Sell Material.

Ability to sell is the first step toward success in any business, and in modern merchandising the desirability of the goods is stressed more than the price asked. Perfection in manufacture and satisfaction in use cut more figure than cost, because they are the real elements of value and because goods sold on that basis are well sold.

Nowadays quality is a more comprehensive term than formerly. In times past, when clothing was not cast off with each change in style, resistance to wear was the first consideration; but now style, fit and appearance take precedence. In the old days the home builder's first consideration was shelter, and the home of those days defied all the canons of comfort and convenience. Now nobody is content with what formerly was beyond the reach of the wealthy. Folks want comfort and convenience in their homes and they expect them to be attractive and up-to-date. They no longer think of a house as of so many boards, rather as an agency for providing a home-making and character-building environment, a place of contentment and happiness.

Lumbermen who still try to sell boards by the thousand feet are having increasing difficulty in meeting the competition of those who sell complete houses embodying everything that home signifies to the modern family. Well manufactured lumber, properly graded and suited to the purpose, is presumed. What the buyer has in mind and what the seller ought to keep in his mind is a home, and the fact is being daily demonstrated that it is more profitable if it is not easier to sell a home than to sell the material to build it. The lumber cost is a small part of the whole cost, and nobody can have a home without spending more for other things than for lumber. To talk about the lumber instead of the home is to miss the strongest appeal and to stress cost where satisfaction is sought.

Righteous prices should be charged for lumber as a matter of common honesty and sound policy, but the thing to visualize is the complete structure and the satisfaction it will bring to the buyer and to his family. He must be made to want a home enough to deny himself nonessentials in order to get it. Selling lumber, therefore, ought to be selling the home-owning, home-improving idea, the comforts conveniences and advantages of home-ownership, rather than the dispensing of the materials from which a house is built. To sell lumber in this modern way is merely to apply in the lumber yard methods that are in the vogue everywhere else. It means that homes shall be bought as clothing, furniture, automobiles and everything else, except lumber, is bought.

cooking methods have passed through many stages. After the old coal stove came the gas range with shortcomings that were bound to be realized.

Then came a big step forward—the fireless cooker, but this cluttered up the kitchen with one extra space-taking device and had other disadvantages. Next came the effort for automatic control by harnessing thermostatic principles. But it kept on burning gas and its slight savings could be applied only to the oven, where but a small part of the cooking is done.

But an efficient solution has been found at last in the Chambers Fire-

less Gas Range. It cuts gas bills in half, saves more than two-thirds of the time and effort devoted to cooking, and keep all the rich juices and delicious flavors in the food."

The principle on which the Chambers Range operates is that of retained heat. Both the so-called Thermodome, under which boiling and stewing are done, and the specially insulated Chambers Oven, for roasting and baking, are so constructed that they seal the heat for hours. Just a few minutes gas is required, then the housewife can go away while the food cooks with the gas turned off.

The following women have pur-

chased and are now using the Chambers Fireless Gas Range:

Mrs. Robert L. Tompkins, Mrs. A. L. Riggs, Mrs. Guy Abercrombie, Mrs. Walter Hubbard, Mrs. Will Norris, the Methodist church, Mrs. L. M. Green, Mrs. Charles Green, Mrs. Ambrose Gohring, Mrs. Fred Beale, Mrs. William Meredith, Mrs. William Brann, Mrs. Marion Fluey, Mrs. Harry Euler, Mrs. Charles Worland, Mrs. Albert Stevens, William Ruhman, Mrs. F. R. McLanahan, Mrs. Morris Howell, Mrs. L. M. Clark, the Sleeth Sisters, Mrs. Glen Foster, Mrs. Harry Petry, Mrs. Fred Osborne, Mrs. William Carter, Mrs. Sallie Henley, Mrs. Eliza Billings, Mrs. Vorhees Cavitt, Mrs. George Looney, Mrs. Tom Kelley, Mrs. D. H. Dean and Mrs. Dan Matlock.

GREAT INCREASE MADE IN USE OF ASBESTOS

That there has been a great increase in the use of asbestos in building materials in the last two years is shown by a report just issued by the Department of Commerce. In 1921 the total value of these products was \$5,167,733, while in 1923, according to the biennial census of manufacturers, it was \$8,252,116. Throughout the industry covering the entire country, there was an increase of 109.4 per cent in the manufacture of asbestos products, not including textiles.

Efficiency in Cooking Depends Upon the Stove, and Experiments Have Made Big Strides

HOME OWNERSHIP GOOD INVESTMENT

Relatively Low Price of Property in Rushville is Additional Argument Locally

HOME OWNERS PROSPEROUS

Payments Can be Arranged so That Most Anyone May Buy One—Rushville's Advantage

Owning one's home in Rushville has taken on the qualities of a safe and profitable investment.

To every argument advanced anywhere to home ownership, one additional reason for purchase exists in Rushville. The relatively low price of property here, due to the fact the ground upon which houses are built in Rushville costs less than in any other city of this size. Lot prices elsewhere are two or three times what they are here.

There exists only so much land for nice homes and its tendency is to advance in value. In Rushville there is a wider margin for advancement in well located residential ground than in any city anywhere. Rushville is increasingly known as a city of attractive homes.

Payments can be so arranged that today almost anyone can buy a home. One's own experience supports the statistics which indicate that those who have exercised the privilege of home ownership have prospered beyond those that have paid rent. The home purchaser should be protected by a city plan commission and the zoning law against the encroachment of undesirable intrusion. Then, blighted residence areas will be of the past. Owning a home, therefore, becomes not only more desirable from the view of happier home surroundings, but it becomes a safe investment.

The desirability of such an investment in Rushville has been greatly enhanced within the last six months owing to the locating here of several new factories. Statistics show that populations increase four or five times as much as the increase in the number of men employed. Such an increase in population naturally increases the value of all city property and clearly stimulates building. Since the older portions of Rushville are already thickly built upon, the new building activities will be concentrated in the newer sections of the city.

Care, however, must be taken not to mar the beauty of this city of homes by indiscriminate building. A great step to eliminate such an undesirable condition has been taken by the forethought of the present council in providing a large new park and school site in the north end. The necessity for public parks is increasingly apparent to municipal government as the trend of population continues toward the cities. The importance of park use of woods and forest is becoming impressed upon the people not only from the viewpoint of natural beauty but also from the saving of large expenditures for the inclosing of such water areas. This is now in particular evidence owing to the agitation to inclose, at an enormous expense, that portion of

GOOD PAINT KEEPS HOUSES IN REPAIR

When you consider the painting of your property, be sure to look at the matter from the standpoint of economy and conservation. Any piece of property not painted at least once in four years depreciates in value and costs from five to ten times as much in repairs as the paint and varnish required to keep it permanently in good condition. For example, a well painted house will last from five to ten times as long as an unpainted structure. In other words, a house that is protected with paint at regular intervals will be in perfect condition after five or ten unpainted houses have in turn become uninhabitable. This applies to painting and varnishing inside as well as outside. While outside surfaces have to resist weather, inside surfaces have to resist wear—the touch of hands, the grinding of feet, the contact of furniture—and a thin film of paint or varnish 1/400th of an inch thick will give ten times better protection than a sheet of steel of equal thickness.

Hedges Branch that is already built upon. An expenditure of this kind will never be required north of Ninth street because it is surrounded on both sides by beautiful park lands. The objection is sometimes offered that parks and playgrounds decrease real estate values but experience has shown that where properly planned the value of property adjoining parks and play areas has increased rather than decreased. The provision of play grounds and recreation centers attracts buyers. People are increasingly anxious to have homes in sections which can offer safe places for their children to play and tennis and other forms of recreation for themselves. Property adjacent to park lands has been known to increase ten or fifteen times more than it ordinarily would. For these reasons Rushville is particularly fortunate in having acquired this wood land and stream for park purposes.

It has at the same time had provided for it a new addition known as Memorial Park addition which adjoins this park and the fine residential district at the north end of the city. The primary object of the owners of the addition is to make it the best residential district of the town and since the better residences can go only to the north, this is assured. Its closeness to the new park is also an added attraction and will influence prospective home builders from the man of modest means to the man of highest means to locate in it.

Care and discrimination should, of course, be used at all times in investing in city property but the individual who is alert will readily see the possibilities which are offered him not only from the standpoint of financial gain but from the standpoint of desirable residence sites in investing in city property at this time. The new factories have not yet reached the stage of employment and naturally prices have not yet been raised. However, as soon as employment does start, prices will naturally go up and the man who invests now will be the gainer.

I FAVOR the policy of economy, not because I wish to save money, but because I wish to save people. The men and women of this country who toil are the ones who bear the cost of the Government. Every dollar that we carelessly waste means that their life will be so much the more meager. Every dollar that we prudently save means that their life will be so much the more abundant. Economy is idealism in its most practical form.

Calvin Coolidge.

Complete Stock of Wall Paper Designs is Necessary for Retail Trade in Small Cities

PEOPLE EXPECT GOOD SERVICE

Walter Hubbard of Johnson's Relates Experience With Mail Order Competition in Wall Paper

The retail wall paper dealer must carry a stock of the season's latest creations in decorative wall paper coverings as well as a complete stock of the regular wall paper which he is compelled to carry, so that he may at all times be able to supply his trade with all of the different grades," declared Walter Hubbard of F. B. Johnson and company, in commenting on the services which the local interior decorator gives his customers, as compared with outside competitors.

Your retail dealer carries this stock for the benefit of his customers in the city and in the surrounding country. You are at liberty to go to his show room and have him show you everything that is new and up to date in his line. He does not ask you to send him a money order in advance to cover the cost of the paper that you select, and you are at liberty to return for credit any unused rolls; in fact, he is really giving you more in quality and in his service to you than any mail order house in the country.

"He not only gives you this ser-

SAND AND OIL ARE GOOD TO KEEP TOOLS CLEAN

Speaking of tools prompts a practical suggestion for securing them. For large tools, such as hoes, spades, shovels, etc., fill a small box with sand and over this pour a quart or two of old cylinder oil.

Push the blade back and forth through this sand whenever any rust occurs and you will never be bothered with rusty tools. The sand removes rust already formed, the oil coats the surface and checks the tendency for it to occur again.

For smaller tools use fine sand and coal oil in a small tin pail.

are just as essential to their business success, consequently they are coming to understand each other better and the result is bound to be greater success for both.

The business man in the country or the business man in town who thinks he can live by himself, is fooling nobody but himself.

Referring back to the mail order buying, I want to relate an actual experience which happened in Johnson's decorating department. Mrs. X came in carrying a postage money order in her hand, made payable to one of the large mail order houses, and sat down in our show room. She expressed a desire to see some of our bedroom papers, stating that she had four rooms to paper and wanted to see what we had, after getting all of the data necessary to show her intelligently, size of the rooms, location etc., I began showing her what I thought would be suitable for her rooms. After she had selected the papers, she asked me what the four rooms would cost. I figured them up for her and told her the figure and this is what she said to me:

"Did you figure the border too?" When I told her that I had figured everything necessary to do the four rooms, she asked me if the post office would take back money orders and I told her that they certainly would. She told me to tie up the four rooms for her and informed me that I had saved her two dollars and ninety-three cents in the transaction for the money order which she carried was to

pay for four rooms of bedroom paper which she had selected from a little sample book which showed only a part of the pattern and for which she was compelled to send the money in advance and pay the parcel post in addition. When she came back for her paper, she told me that she would certainly tell her friends who considered buying from the mail order houses to shop at Johnson's first and I guess she must have told several by the amount of wall paper that we have been selling.

"I believe that there is a better

feeling existing among the business men on the farm and the business men in town and that they are co-operating with each other more each year.

The business men on the farm have come to learn that the business men in town are very essential to his business and the business men in town have also learned that the business men and women in the country

are just as essential to their business success, consequently they are coming to understand each other better and the result is bound to be greater success for both.

My opinion is that the small town merchant who stocks quality merchandise and styles that the people demand, will have no cause to complain about poor business.

Nine out of ten merchants whom you hear complaining about the other fellow buying merchandise outside of his home town—if you will watch him closely and also watch his family, you will find that he is doing that very thing himself and is trying to shield himself by criticizing the other fellow. If every business man in the country and every business man in town would make up his mind to buy merchandise in Rush county instead of outside of the county, what a wonderful county we would have.

Lets all pull together and make Great Rush County greater still.

BETTER HOMES For Rushville and Rush County

To insure real economy in your home decorations, first select Floor Coverings, Draperies and Window Shades of sound, artistic value, then be sure their construction is as sound as their art.

Quaker Curtains and Nets, Whittall Rugs and Brenlin Window Shades are Famous for Their Lasting Beauty.

THE NAME QUAKER, WHITTALL OR BRENLIN IS A QUALITY INDEX LIKE THE KARAT MARK ON SOLID GOLD.

Whenever a Manufacturer or Retailer earns a reputation for producing or selling the finest things in their line, some people assume that their prices must necessarily be high. Often they are referred to as "High Priced" lines. That's the penalty many Manufacturers and Retailers pay for leadership.

And so—because Whittalls have earned an enviable reputation for making the very finest of American Rugs some people imagine they must pay more for them. Yet

**THERE ARE NO RUGS IN AMERICA
OF SUCH HIGH QUALITY THAT
CAN BE BOUGHT SO REASONABLE.**

Another point which will appeal to you is the fact that the price on every rug in our store is marked in plain figures. That is the price to everyone, and no one buys for less. So—

A PERSON WHO KNOWS NOTHING AT ALL ABOUT RUG VALUES CAN BUY OF US AS ADVANTAGEOUSLY AS AN EXPERT

The next time you are in need of rugs, Carpets or Draperies—Look around, go into any worth-while store in Indiana—See what they offer in qualities and prices, then compare those values with ours. We know you will never again leave Rushville to make your purchases. And we are confident you will follow the example of hundreds of people who buy all of their Floor Coverings at Casady's.

Quaker Curtains and Nets for the Better Homes

An Extensive Array of Lovely Designs At Most Attractive Prices

We have featured Quaker Craft Laces for a period of 15 years, and as might be expected, this merchandise has continually improved in both texture and design. TODAY QUAKER CRAFT LACES STAND AT THE VERY TOP OF ALL LACE LINES—AS NONE ARE MADE BETTER.

Shadow Lace Curtains

Well named are these curtains, one of Quaker's favorite designs, with just the right amount of transparency. Their laundering qualities are quite an added feature of their popularity.

45c to 85c Yard

For Odd-Shaped Windows

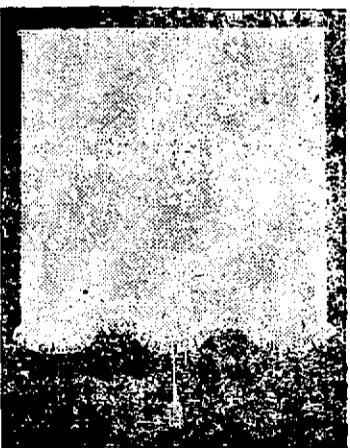

For the window which cannot be readily fitted with a made curtain we have appropriate Quaker Nets and Laces—in many cases in patterns to match the Quaker Curtains at 35c. to 75c. yard.

Quaker Filet Always in Style

Curtain styles come and go but a neat filet net curtain is always in good taste. Quaker Filet Curtains are not only attractive and appropriate but give years of satisfactory service. At 35c to 59c yard.

Casement Lace

In Casement Lace a delightfully shadowy design seems to be insinuated rather than woven into the net ground. It is never obtrusive, yet it is there, giving personality to your window decorations. The right choice for any room in which dignity is the decorative note at 65c and 85c a yard.

Brenlin "AVONDALE"

The durability and beauty of the Brenlin window shade combined with the artistic lines of scallop and fringe, assure the last touch of distinctive charm and attractiveness to the home.

We invite your inspection.

Our records disclose the names of hundreds of people who have purchased Rugs, Carpets, Linoleums, Window Shades and Draperies here. Many of them purchased everything in that line from us. And every day people who have looked in every surrounding city come back here to buy.

This proves that people have confidence in our Floor Coverings and in our Prices. And it proves that Casady's values are not exceeded.

BUILDING TRADES ARE IN ANNUAL COMMENCEMENT

Unusual Exercises Held When 200 Apprentices Receive Diplomas at Cleveland, Following Courses

OHIO HAS A SPECIAL ACT

Probably the most unusual commencement ever held by any school took place in Cleveland, Ohio, on April 10, when some 200 students, apprentices graduating from the building trades schools of that city, made their bow to the business world. Conspicuous among the graduates were young, full-fledged carpenters, and a nice balance of representatives in the other building crafts stepped off. The feature that makes this commencement unique is the fact that each graduate received a diploma, this for the first time in the history of any similar enterprise.

Growth of the building trades apprentice schools in this country has been significantly fast and strong, finding its inception in Cleveland. They are supported in part by appropriation provided by the Smith, Hughes act.

The action unfolded at the graduation exercises in Cleveland is of still greater significance than the mere entry of young men into important life work. It proves conclusively that without cooperation, without associated effort, without a recognition that each individual is as important to every other individual as he is to himself, dead center may follow.

The lads who enter the building industry equipped to do their bit of life's work have obtained their equipment through recognition by building industry organizations that the industry will be just that much better off for their support. The members of these associations know that they have helped themselves when they have helped these craftsmen.

PROTECT PAINTED FLOOR

When painting mop boards or wainscoting or walls in general, lay a strip of paper on the floor, tight against the mop board to catch the drops of paint. The paper can be moved along as the work progresses and, with reasonable care, no paint will reach the floor.

BRICK, BEING FIRE MADE, IS BEST FOR THE FIRE PLACE

There is no one material thing in flame in their making, they defy the home that has so many varied in their use. The feeling that the aspects or so much meaning for us roaring fire on the hearth beats as the hearthstone Sidney Smith harmlessly against the enduring used to say: "The fire is a live thing brick, as the sea beats in vain in a dead room." And, indeed, it does seem to respond to and express every human mood. It crawls and runs, or leaps up, and dances to the stately rhythm of the minuet or to wild, unbridled, bacchanic measures; it rejoices and laughs with us, and, although it can not be said to weep, it at any rate darkens, cowards and sinks into seeming accord with out sad memories or melancholy reflections.

We never tire of watching its fair flames in mad pursuit of one another, playing tag over the burning logs, or sedately tripping along like timid maidens up the church aisle. We love to hear them purr and hum as they lull us to a delightful mood of indolent reverie, or crackle and roar as if sounding drums and trumpets to heroic action.

But aside from idle fancies, nothing equals the fireplace in making the room cozy and homelike. Modern heating systems may adequately solve the problem of regular and even temperatures, but there is nothing especially genial or inviting about them.

But around your genial fireplace, reminiscent as it is of human fellowship from before the days when history began, your friends find an inviting kindness that unlocks the heart and incites the fancy to all manner of happy thoughts, intimate confidences and friendly converse. And what can be more delightful than to see the happy children crowding around the glowing embers to toast marshmallows, pop corn, or roast chestnuts!

On the strictly practical side while the fireplace, except in very moderate climates, will make little effect on the winter's cold, it will be exceedingly welcome in the early days of spring and the late days of autumn. From every point of view, aesthetic, sentimental and practical, every house, no matter what it is built of, should have at least one good fireplace where family and friends may gather in happy converse.

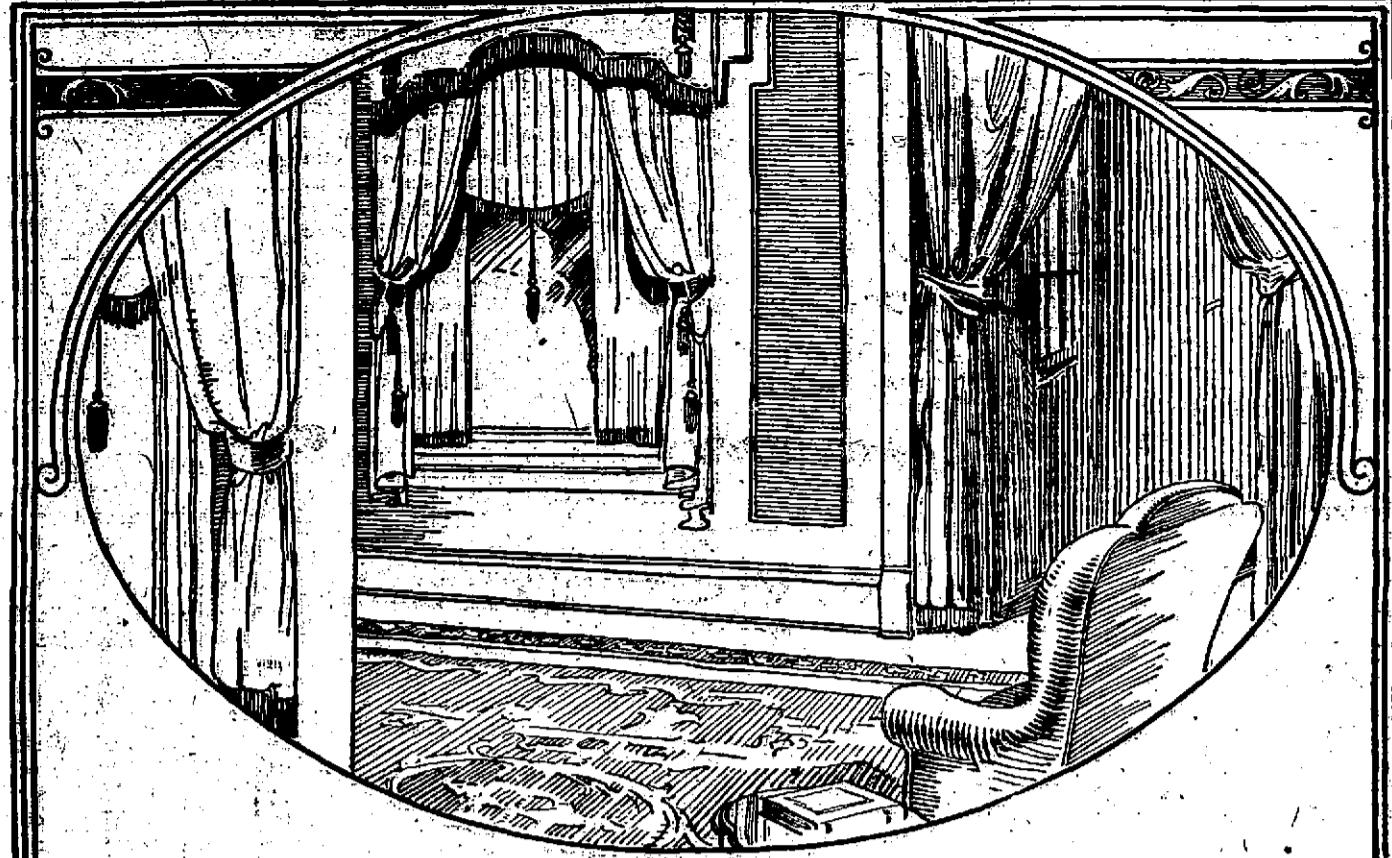

And what other material is there which is so good or appropriate for the construction of the fireplace as brick? Having stood the test of

Electric Installation

Providing proper and adequate electric lighting for the living room is one of the most important phases of residence lighting. But, just to have proper lighting is not enough if one desires to enjoy all the comfort and convenience that is inherent in present-day electric service.

In addition to lighting provided by ceiling and side-wall luminaries the living room of all rooms of the house should be so equipped that portable electric lamp may be used when and where wanted. Properly placed, electric convenience outlets will enable the whole family to enjoy the soft, localized light of such lamps, be it for reading, sewing, playing games or chatting. Further, these same convenient outlets can just as readily be used to serve the modern small electric cooking appliances such as the waffle iron, tea samovar, coffee percolator, toaster, grill and the like whenever whim dictates that an informal supper or Sunday night tea is to be served in the living room. This, by the way, is a most charming and delightful way of breaking the ordinary routine of life of which more people should avail themselves.

That you may make the greater use of portable lamps in the living room an adequate number of convenience outlets ought to be installed. From such a room of fair size there should be at least one such duplex outlet on each side of the room. Thus there is no point in the room where you cannot place and connect a portable lamp.

Do You Own a VACANT LOT?

Would you like to sell it and quit paying taxes on it?

Would you prefer to keep it if you had a house on it in which you could live and call it a REAL HOME?

You Can Do Either

We can show you that with a few hundred dollars you can build a house on your lot that will sell readily and make you a profit, or build yourself a home that you have longed for.

CLEANING PLANT IS A BUSY PLACE

It is an Industry That is Not Generally Understood, But is Based on Scientific Discoveries

RENOVATES AND KILLS GERMS

Great Progress is Being Made in the Business, Due to Demands of Patronage by the Women

The cleaning industry in Rushville as well as in this country, has grown with wonderful rapidity. It is a business, according to C. L. Beabout of the Twentieth Century Cleaners and Pressers, that is very little understood by the public, and to a great extent, misunderstood.

The modern cleaning plant is a very substantial institution, which requires a considerable investment, and its operation demands care, and skill. Yet, people still speak of sending their garments to a cleaner, as if the cleaning of garments was an individual matter. You don't speak of depositing your money with a banker, you deposit it in a bank. You don't speak of taking your linens to a laundress, but you send them to a laundry. Just so, when you send your outer garments to a cleaner, they don't go to a cleaner, but they go to a cleaning plant. This cleaning plant should have a name. Some day it will have a name. For the want of a better name, those who operate a power cleaning plant are called modern, scientific cleaners.

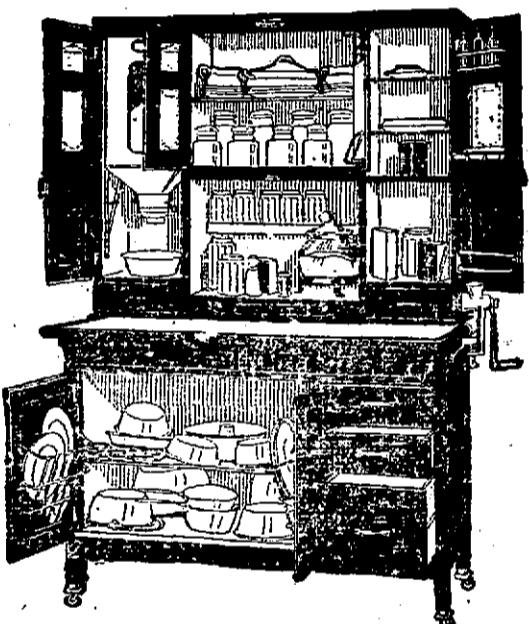

A woman of Hutchinson, Kan., said the other day, that she didn't care what was done to her garments when the cleaner got them, as all she was interested in was that they should come back looking fresh and beautiful, and then she added, "they usually do when I send them to a modern plant."

Now, the woman referred to is a writer on domestic science for the public press, and quite a diplomat, and she was talking for immediate home consumption, because she was speaking before a convention of nearby dyers and cleaners at the time. She like millions of other American women, is very much interested in what happens to her clothing at any time.

Nor is it just a fad for people to keep their outer clothing as clean as they insist their under clothing must be. It is the outer clothes that are

ENLARGING METAL HOLES

If you require a hole through metal of a certain size and do not have a drill of the right size, drill first with the largest drill available, then slip a small rat-tail file in the drill chuck. By turning the crank rapidly and moving the work in a circular fashion with the file in the hole, it can be enlarged to any desired size.

The New 1925 McDougall's the finest kitchen cabinets in the world

McDOUGALL means the FIRST and FINEST of Kitchen Cabinets. Yet they cost no more. For this reason those buyers who investigate carefully — who seek the best value—always decide on the McDougall.

The reasons are:

Construction: McDougall Kitchen Cabinets have always been famous for their rigidity — a sturdiness that comes only from honest materials honestly put together. Many records of McDougall being thirty years in service, and still in use, have come to our attention.

The Samson steel corner brace is one reason for McDougall's longer wear. 8 of these braces in the base make it strain or shock proof. Equal care is exercised in building the upper cupboard, or top section. You never hear of a McDougall becoming wobbly, or loose at the joints. They are made with the same care as fine furniture — which, indeed, they are!

Convenience: The final achievement of McDougall completeness is found in the surprising number of real conveniences in the new 1925 McDougall cabinet. Such features as the Simplex lowering flour bin; the non-chipping, sliding Porceliron worktable top; velvet-lined drawers for silver; ant-proof casters; handy helps inside the doors and attractive art panels outside; these, with many other features, make the McDougall an unequalled value.

Appearance: Into these cabinets are built the "lines" which bespeak accurate knowledge of good wood designing, and which lend cheerfulness to the kitchen. Nor does the attention to detail end there—for every cabinet is finished in Sherwin-Williams varnish or enamels. Using high-grade, high-price finishes on cabinets retailing at moderate prices, again emphasize the fact that McDougall gives most for your money.

USE FORCED AIR TO WARM HOMES

Automatic forced air warming and ventilating systems have been brought to high state of perfection, eliminating the trouble of heating remote parts of the home caused by climatic changes, and impossible to overcome with ordinary warm air heating systems. This is accomplished by the use of a fan "air force," which operates only when necessary, ceases operating when the required temperature is obtained. This is accomplished by the use of a thermostat with clock attachment. When the temperature in a given room falls below the desired degree the draft opens and the fan that forces the air through the air duct is set in operation, and uniform heat is circulated throughout every part of the home. This system has been found very effective in heating large hall and other edifices that are difficult to heat in any other manner.

One other thing you may remember when spring cleaning comes to mind. Moths do millions of dollars worth of damage and breed principally in soiled garments. Garments should not be hung away for the season without a thorough cleaning, which will protect them for several months. If they are not cleaned they should be brushed every thirty days and hung in the sun for three or four hours.

The moral of this dissertation is this—it is as old as the Scriptures: "Cleanliness is next to Godliness."

People of this vicinity who are interested in what takes place when their garments are cleaned, should visit the Twentieth Century Cleaners and Pressers, and have either Mr. Beabout, or Merrill S. Ball, members of the firm, show them through, and explain the machinery.

ENLARGING METAL HOLES

If you require a hole through metal of a certain size and do not have a drill of the right size, drill first with the largest drill available, then slip a small rat-tail file in the drill chuck. By turning the crank rapidly and moving the work in a circular fashion with the file in the hole, it can be enlarged to any desired size.

GOOD HARDWARE IMPORTANT ITEM

Good and at the Same Time Attractive Hardware Locks and Hinges Are Essential Things

SHOULD ALSO BE ARTISTIC

Pick Out Hardware for New Home That Harmonizes in Design and of Right Combination

Good and at the same time attractive hardware, locks, hinges, drawer pulls and window fasteners, are one of the most essential things in the new home—good locks for protection and artfully selected hardware for the blending beauty of the finish of the interior.

What equipment should you have in the way of hardware for your home? There should be fastenings at all doors and windows, and easement adjusters for windows of that type, and the doors will have to be hung on hinges, or as they are more properly known, butts. Of course you will have a cylinder lock at the front door. Now, as a matter of fact, you need a good lock more at the back door than at the front. It will be a great convenience and a real protection to have such a lock on the back door. If you can order your hardware in advance, the contractor will get back and front door lock sets so that they can be operated by the same key.

Pick out the hardware for the front door, and elsewhere for that matter, that harmonizes in design with your home. Do not be carried away by a set of hardware that is attractive for itself alone. It is the right combination that counts. Get the carpenter to place the hardware on the various doors, drawers and windows where it will harmonize with the design of these things. He must realize that this must be done without cutting into the tenons that hold the parts of the door together. It takes a real workman to do a good job of hardware setting.

For the front door and perhaps for the communicating doors on the first floor, it will be desirable to have the hinges or butts of the hall

bearing type. For closet and bedroom doors and other doors which will have light usage, the ordinary friction butt will serve very well. It is very important to have three butts on every communicating door. For the slightly increased expense the doors will swing much more true. The closet doors can get along very well with one pair of butts.

It has long been a question with architects why people should have doors throughout the house so completely equipped with locks. Why, for example, should all the closet and bedroom doors have locks? Did you ever lock your bedroom door? Probably not. It may be more desirable to put locks on closet doors. Do not put a lock on the door just because it is a door. Perhaps after all you will never lock it. In any event, a bolt or a thumb turn will

serve all the purposes of a lock and you will not have a key to look after. However, it should be said that a mortised latch will usually cost more than a bit key lock. Of course if you have a small boy in the house you will want a lock on the pantry door. Some people have thought it desirable to have one closet in the house equipped with a good cylinder lock. Such a closet may come in very handy at certain times, perhaps, if for nothing else, as a place in which to store the family skeleton.

Perhaps one of the places where especially good hardware is necessary is at easement windows. There

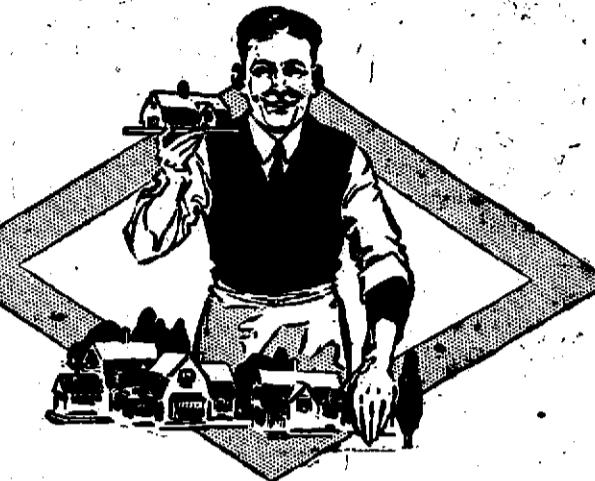

are numerous types of easement adjusters. The very cheap ones will not give you much satisfaction for very long.

Practicable Suggestions Offered by Handy Man

A hole bored in the end of the hammer handle will form a good place to keep beeswax. When driving nails into hard wood or wood which splits easily, coat the point of the nail with this wax and the tendency to split will be minimized.

A leaking gutter can be repaired at least temporarily by coating the inside of the gutter around the hole and laying in a strip of tar roofing paper and pressing it to shape.

Old doors, which have settled until they scrape the floor, can be improved by pulling out the hinge bolts and setting between the halves a small washer. The door will be raised the thickness of the washer.

A Savings Account

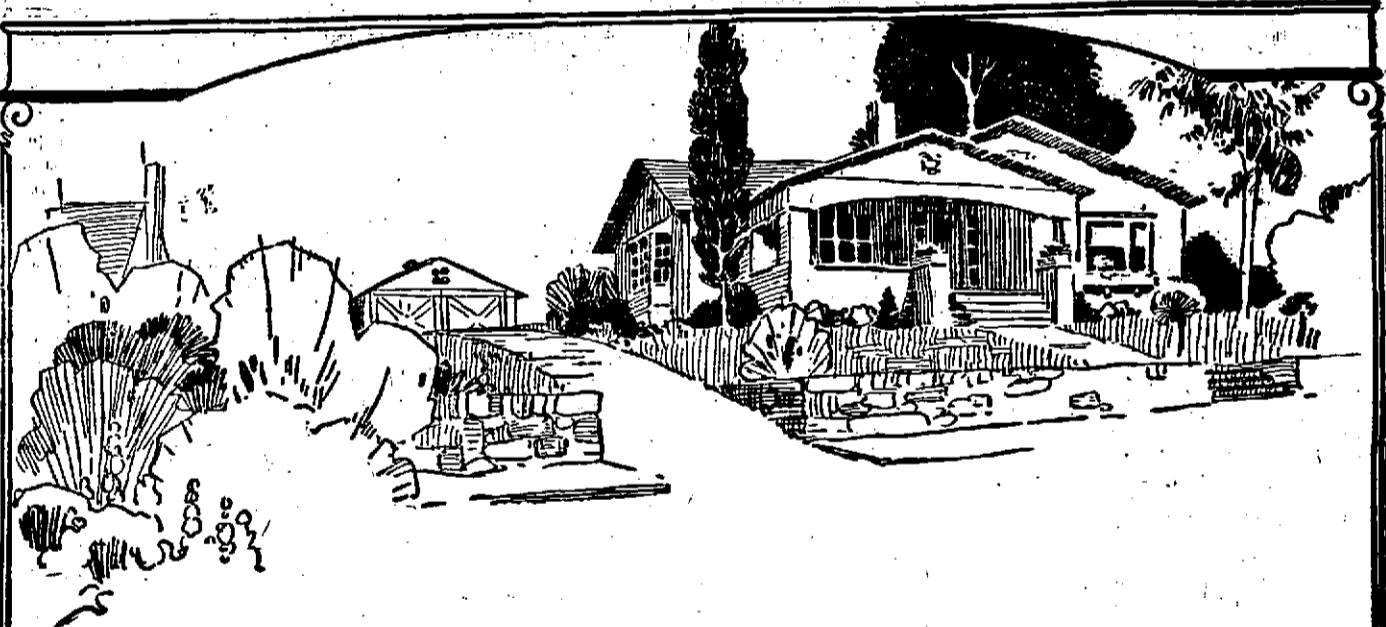

Is More Conducive to Success Than a Charge Account

If you have saved or are saving for a home, you are making the best and safest investment possible—that will pay the largest dividends.

Let Us Assist You With Your Plans
Interest on Savings Liberal Terms on Loans.

Rushville National Bank

The First Bank in Rush County.
Capital Investment, \$235,000.00

A DESIRABLE LOCATION

Your home can be ideal in every way, yet if it has been improperly located, you will never be satisfied with it. Consider carefully your own needs and select a site which has all the requirements for a model and satisfactory home.

Memorial Park Addition fills all these requirements. The surroundings are the best in town. A future school site has been provided adjacent and grade schools are within a few blocks. The lots are all large and properly drained. It is moderately restricted for the family of modest means. Sewers, streets, trees and a beautiful park are there and ornamental lights and a new gymnasium joining are assured.

These are some of the matters you must look into. Don't worry too much about which side of the street you are on—north, south, east or west. Every house has four sides and you can plan your home to take advantage of any direction it faces.

Easy methods of payment have been provided. Many are taking advantage of them, not only for homes but for investment, realizing that these lots are priced low and that they must advance in value.

Stewart & Stewart

BUILDING A HOME VERY IMPORTANT

Not Only Is Home Center and Symbol of Family Life But Involves Considerable Investment

NEEDS CAREFUL DESIGNING

Must Build Right For Once House is Built it is Too Late to Change it if Dissatisfied

The building of a home is one of the most important undertakings in your life. Not only is the home the center and symbol of the family life, but from the practical point of view, it involves a considerable investment. You don't build a home every year or every decade. You are going to live in it, or, so to speak, with it, a long period of years. It must, therefore, satisfy in every way; you can't afford to make a mistake, or fool yourself when you build. You must build right, for once the house is built, it is too late to change if you are dissatisfied. Even if a change of fortune leads you to move away, it is very important that the house is good enough to appeal strongly to the renter or purchaser. Your only wisdom, therefore, in building a home, is to make it a valuable permanent investment, thoroughly satisfactory to yourself and to others, if circumstances require the taking it off your hands.

Before building a home the plan or design must receive careful attention. Not all houses are arranged for the convenience of the occupant. For example, there are houses in which the dining room and kitchen are separated from each other by another room, not a service pantry. This means that as long as that house is used, the housewife must walk back and forth, taking a large number of unnecessary steps. In some houses it would seem that no attempt has been made to make the housework easy. Each room should have ample light, and there should be wall space for the owners beds, bureaus, piano and other furniture.

The living room will be the most used of all the rooms, and should, therefore, be well lighted and large enough for the family needs. If the front door opens directly into the living room there is danger of drafts in the winter and in a cold climate, difficulty in keeping the living room heated. A vestibule or storm door may prevent this.

A large dining room is a matter of choice. In the home where it is used three times a day it is the most expensive room in the house. In many small houses a dining alcove in the living room or kitchen has proved satisfactory.

Until recently little attention has been given to the arrangement of the kitchen. For the woman who does her own housework, the location of the sink, drain boards, ice box or refrigerator and stove, with reference to natural and artificial light and to each other, is most essential.

There should be some provision for carrying off the fumes from the gas range and gas oven. To lessen fatigue it has been found that the front of the sink should be thirty-four to thirty-six inches from the floor. A corner kitchen with windows in both outside walls, providing cross ventilation, has many advantages. Convenient closets, or cupboards, are also desirable.

Bedrooms need not be very large, but should have plenty of light and air, and should allow beds, dressers, chests of drawers and chair to be placed without interfering with doors windows, or heating outlets. Cross ventilation is most desirable. It is not best to have bedrooms opening directly into the living room. If possible entrance should be from a passage or hallway. Ample clothes chests are most necessary, particularly in small houses where there is little room for storage.

The bathroom should have a window large enough to keep it well aired. Sole access to the only bathroom in the house should not be through a bedroom; shawdy walls and floors are less necessary than substantial, convenient fixtures and plumbing.

One should make sure that the stairways are easy to climb, have plenty of head room and enough space for easy moving furniture.

If there is a cellar or basement with a heating plant or a laundry in it, this should be easy to enter, both from the inside of the house and from the outside. Concrete or smooth masonry floors are desirable and there should be attention to convenient fuel storage and openings for receiving coal and removing ashes and refuse. The basement should be damp proof and have drain tile laid outside the foundation walls if necessary to insure dryness. Screening

HOME — THE MOST BEAUTIFUL WORD

(From a Sermon by Dr. T. Dewitt Talmage)

Home! It is a charmed word. Through that one syllable thrills untold melody, and the laughter of children. The sound of well-known footsteps and the voices of undying affection. Home! I hear in the word the ripple of muddy brooks, in which knee-deep, we waded, the lowing of cattle coming up from the pasture; the sharp hiss of the scythe amid the thick grass, the creaking of the hay-rick where we trampled down the load.

Home! Upon that word there drops the sunshine of beauty and the shadow of tender sorrows, the reflection of ten thousand voices and fond memories.

Home! When I see that word in a newspaper or book, the word seems to rise and whisper and chant and pray and weep. It glitters like a diamond; it springs up like a fountain; it thrills like a singing bird; it twinkles like a star; it leaps like a flame; it glows like a sunset; it sings like an angel. And if some lexicographer, urged on by the spirit of evil, should seek to cast forth that word from the language, the children would come forth and hide it in the grass and wild flowers, and the wealthy would go forth and cover it with diamonds and pearls, and kings would conceal it under their crowns; and after Herod had hunted its life from Bethlehem to Egypt, and utterly given up the search, some bright, warm day it would flash from among the gems, and breathe from among the flowers and shine from among the coronets; and the world would read it, bright and fair and beautiful and resonant as before.

Plan now to build a home of your own.

PRINCIPAL AIM IS THE HOUSE FOR COMFORT

In Building a Home, The Thought in Construction Should be For Satisfaction in all Details

VENTILATION IS IMPORTANT

All of the thought and time that you devote to the preliminaries in the construction of a new house will be amply justified if the result is a success, namely, a comfortably built home.

You are the one who will have to live in it, consequently your dwelling should embody every possible feature that will contribute to your health and happiness, both mentally and physically.

The factors necessary to a comfortable home, are convenience in arrangement, warmth in winter and airiness in summer. The first requirement may be secured by careful planning. The second may be effected by the proper insulation of the walls, and good workmanship in the construction of the building itself, particularly in the fitting of the doors and windows. The use of the right kind of lumber plays an important part in the accomplishment of your purpose as it insures permanently tight joints.

Of late years, the subject of insulation for the small house has been given much attention by architects and building experts, with the consequence that prospective home owners are taking advantage of the knowledge gained, and are insulating their new houses to a greater extent than ever before. Insulating a medium size dwelling, costs a surprisingly small amount, only a fractional percentage of the total cost, while the benefit derived is enormous. In fact, the saving in coal pays the cost of the insulating material many times over.

The more comfort that you build into your home, the more you will get out of your investment.

of the cellar windows and other precautions to prevent rats and mice from entering are desirable.

Builders of a home frequently make the mistake of selecting some very nice man, assuming that he will build the house at the lowest possible figure. As a rule it is best to obtain the names of several dependable contractors whose financial standing is good and take bids from these, in order to check against excessive costs. It is not necessary to accept the lowest bid, and it may be well worth while to pay a little more to a contractor who is dependable and has a reputation for good construction work in back of him. But it is not fair to ask bids from a contractor unless it is truly intended to give his bid reasonable consideration.

MILLWORK AIDS MODERN BUILDER

Difficult for Artisan on Job, Un-equipped as He is, to Accomplish Expert Work

GOOD STOCK IS ESSENTIAL

For One Who Must Watch Every Penny Should be no Question About Using Good Stock

Modern practice has made it more economical and more practical for most of the millwork going into the home to be made in the mill, instead of on the job as formerly. Bookcases, kitchen cabinets, china closets and breakfast sets are assembled in the mill, the joints glued and blocked together extremely difficult for the artisan on the job, unequipped as he is, to accomplish.

Of course, some mills do vastly better work than others. There is as much difference between products of wood working mills as there is between products of automobile factories. The difference goes all the way from the selection of the materials to the workmanship that is put upon them. The highest grade of materials and workmanship, of course, cost the most, and often is beyond the purse of the small house builder. Even so, the small home builder may insist upon quality materials and workmanship. He has a right to expect these things if he pays a fair price.

Millwork is sometimes especially designed for the building. Moldings are struck off to follow special profiles prepared by the architect. The fittings, mantelpiece, bookcases and cupboards are all specially designed by him for particular places they are to occupy and to meet particular requirements of the home builder. This is called special millwork. Of course there is a special price for this also.

However, moldings and fittings can be obtained from ready made stock designs with resulting decreases in cost that often are very acceptable to the person who must build at the least expense. Happily these stock details quite often are of the finest character, having been carefully designed and proportioned so that they present an appearance that is not second to much of the specially designed millwork.

For one who must save every penny, there should be no question about the desirability of using good stock millwork. If the moldings are carefully selected, of the right size and proportion for the places they are to fill, and if the fittings are all of the proper size and accommodation to make the house comfortable and fine appearing, there seems to be no reason why they should not be just as satisfactory for the small inexpensive home as the specially designed things of this kind.

The tendency right along is to improve stock millwork, and we recently have seen some very finely developed standard designs worked out by certain woodworking companies.

Don't think from this that all stock millwork is well designed. The woodworking companies have been forced to produce a wide range of forms to suit individual tastes and needs. By going over these designs carefully, you should be able to find what you want among the simpler forms, so that your millwork will be in harmony with your home and your particular sense of satisfaction.

HINTS FOR PIPE REPAIR IN CASE OF EMERGENCY

A kitty on a hot stove has nothing on you when a pipe suddenly bursts in the house. Ten things to do at once and no idea which one to do first. There are really only two things that can be done: First, shut off the water, then call a plumber. But if said plumber can not come for some time, disconnect the pipe as near back of the break as possible and plug with a rubber stopper.

The right kind can be purchased at any hardware store for a nickel. Get a small stove bolt and two washers and after boring a hole through the stopper, place the bolt and washers and turn the nut down tight. This repair will withstand all ordinary water pressure and permits the use of the rest of the plumbing until the plumber can come.

BUY AT HOME

The furniture being made in America today is better in every way than ever before, but the wise homemaker buys only from an established dealer with a reputation at stake.

Colonial Drapery Fabrics Date Back to the Eighteenth Century

No Other Textile Has Found Such General Favor For Decorative Purposes and With Such a Varied Field For Expression, Than Cretonnes of Soft, Blending Colors

and sensing the call for wide usage in Rush County, the Mauzy Company of this city are fortunate in having patterns, designs and colors for all occasions.

Here has been achieved, for the first time, the charm of hand-done materials—at moderate cost. Beautiful in their soft blending of colors and their profusion of fresh designs, Colonial Town and Country Cretonnes reveal the artistic workmanship that one ordinarily expects to find only in the most costly fabrics.

In patterns vibrant and colorful, or in rich, time-mellowed tones, they provide a range of selection suitable to almost any decorative need. And the exceptional permanence of their colorings assures enduring charm to the effects secured through their use.

Here in America particularly, no other textile has found such general favor for decorative purposes, for none presents so broad a field for the expression of individual ideas.

For all types of houses and all types of rooms Colonial cretonnes are produced in special designs and colorings that are appropriate.

With the art of interior decoration taking on more and more importance, with our homes reflecting more and more the refined taste of their owners, new needs for fabrics of colorful individuality have lately arisen.

It is just those special needs of the modern household that are met by the Town and Country cretonnes group of Colonial drapery fabrics.

HANDY FOOT SCRAPER

The blade of an old shovel, upturned and set in the edge of the concrete step will make a dandy foot scraper. It should lean slightly outward so that falling dirt will clear the step.

SCREENED PORCH SHOULD POSSESS DROP CORD

A screened and glassed porch literally adds one room to the home. An ordinary open porch can be screened without much trouble by running 2x4 horizontally between the posts at the sill height and then fitting the openings between with sash or screen, depending upon the season.

A drop cord should, by all means, be installed. In summer the ironing can be done there, breakfasts served with toaster and percolator within reach, and in winter—well, if necessary there is no reason why an electric heater could not be used here and thus turn it into a sun room.

Home Found Too Small Can Be Easily Enlarged

If a hole has been bored through wood and later found to be a little too small, it can be easily enlarged in the following way:

Whittle out a hardwood plug perfectly round and a sash (but not tight) fit for the hole. Bore a small hole through this the full length.

Then with the brace and the larger bit start to bore out the hole again. When the threaded tip of the bit bites into the hard wood, the whole plug turns in the hole, thus guiding the bit and keeping the new hole true and straight.

COMMERCIAL VALUE IN HOME OF BEAUTY

Beauty of Design Combined With Carefully Planned Utility Makes Buildings Desirable

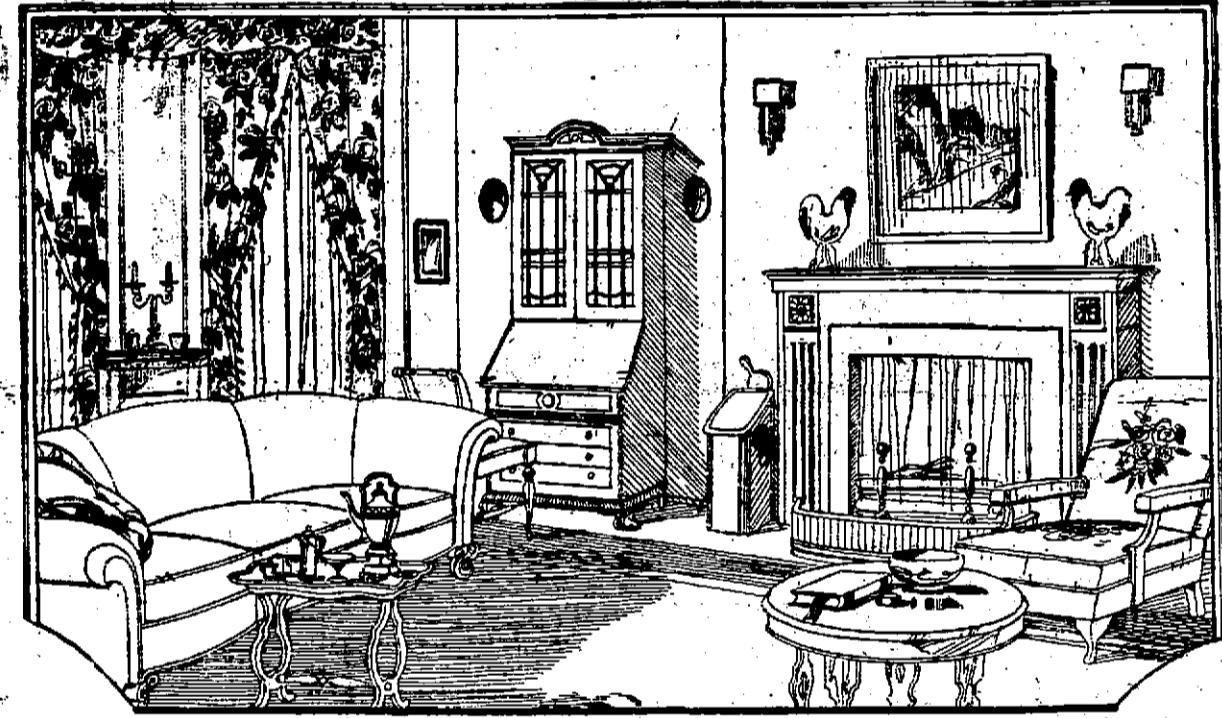

REFLECTS STATION OF LIFE

Architectural beauty has as real commercial value as structural strength or material excellence. Over the rugged sinews of steel and concrete, the architect evolves an adornment of beauty expressing fittingly the character desired.

It is this beauty of design, combined with a carefully planned utility which makes buildings desirable, not only in the eyes of the owner, but in the regard, as well, of those upon whose opinion the commercial value of a building depends.

Men pride themselves upon homes which, in their quiet beauty reflect their owner's station in life. The building of commerce, designed along lines of refined prosperity, is, for the very character and beauty of its design, a desirable place in which to locate. The hotel which best expresses an inviting and generous hospitality, wins patronage through the appeal of attractive appearance. The architect, by virtue of his training and talents, understands the meaning and application of architectural design. Only he can bring out the beauty so much desired.

MAUZY'S--A Boon to the Home

To Those Soon To Wed

This store in its 70 years' existence has had the honor and pleasure of furnishing multitudes of newly made homes. We court that same honor and pleasure for you, and shall render you every service possible.

What would the most elaborately furnished home be without tasteful floorcoverings and draperies? Without question they make or mar the home. They need not necessarily be expensive but they should be discriminatingly selected. This store keeps abreast of modern trends in offering the newest, and affords the opportunity of selection from assortments that compare favorably in size with those in larger cities with the assurance that the cost will be appreciably smaller.

RUGS

Every size from the smallest scatter rugs to 11x15. There are so many kinds and so many patterns to choose from, you will be delighted. You can see everyone as you would in your own home.

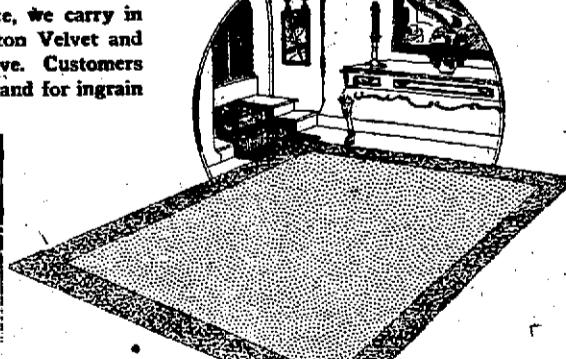

CARPETS

In order to give you a better quality for a less price, we carry in stock, direct from the mills, several patterns of Wilton Velvet and Wool Velvet Carpets. The patterns are most attractive. Customers from surrounding counties are coming to us for these and for ingrain carpets.

Linoleums

New and pretty designs in 6 ft., 7 1/2 ft., 9 ft. and 12 ft. widths. Linoleum and Felt Back Rugs in several sizes too.

9x12 Axminster Rugs \$29.50

The Drapery Section

is aglow with many new colorings and weaves. You will be delighted with the audacity of the patterns.

LOVELY DAMASKS, SILKS, VELOURS, CLOISTER CLOTHS, and all accessories to make the finished windows.

TOWN AND COUNTRY CRETONES — Dashingly different—upwards from 85c.

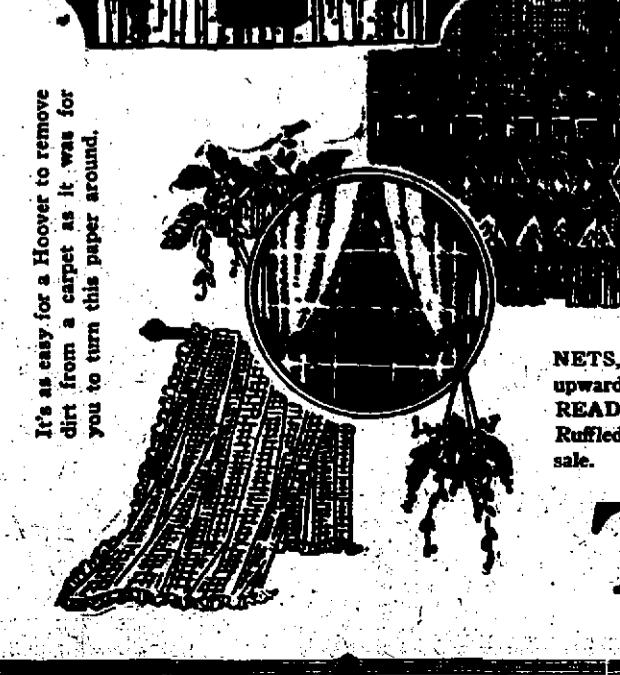

BEAUTIFUL CRETONNES — 25c to \$1.00.

NETS, CHINTZ, MARQUISSETTES and SWISSES — upwards from 19c.

READY MADE CURTAINS — fringed panels and pair goods. Ruffled curtains with valances and tie-backs are finding a ready sale.

The Porch

becomes a summer living room when fitted with our grass rugs and runners. A dashing bit of color supplied by pillows and covers from our Town and Country Cretonnes lend real atmosphere.

The Mauzy Co.

CHEAP VARNISH FALSE ECONOMY

Inferior Grades are Made of Poor Resin Gum and Oils, and is Waste of Money in Homes

FINISH SOON WEARS OUT

Undercoating for Varnish is also Important, and Reputable Dealers Should First be Consulted

Of all the places in the house under construction to economize, the varnish is the poorest, for inferior varnishes wear out, lose their gloss and stain readily and the surface of a good varnish can never be obtained without laboriously and tediously cutting the original stain and varnish from the wood and replacing it with varnish of good quality.

Inferior varnishes are made of cheap resin gum and oils, but this is not the only sort of poor varnish which will prove unsatisfactory. Expensive materials used in compounds out of balance give results equally as disastrous.

For example, chemists show that an excessive amount of China wood oil used in varnish will make it highly resistant to water staining, but that this property is gained at the expense of durability. It requires expert manufacturing and compounding to keep the proper balance between these things.

On account of the different requirements that are made of varnish, such as for floor coverings, furniture, trim, outside work, varnish that is to be subjected to hot water, acid, and so on, manufacturers have produced a great many

Simple Method to Test Glass For Perforations

Here is a trick for putting holes through glass. Build a small circular dam of putty, with the inside diameter equal to the diameter of the hole wanted. A good way is to set a rod on end and pinch the putty in place about it, then remove the rod.

Melt a small quantity of lead and pour some in the depression. A round piece of glass will drop out, leaving just the hole you want.

kinds, each one of which has qualities which especially fit it for particular uses. You will see that the kind of varnish that would be suitable for a chair would not generally be best for a floor, and so on.

Since this varnish matter is such a closed book to everybody but the manufacturers, the only recourse that the layman has is to use the produce of a manufacturer who bears a reputation which has stood the test of time. When a manufacturer thinks enough of his product to print his name upon the label and then stand behind that product, guaranteeing absolute satisfaction, and when that manufacturer remains in business a long term of years and has a continuous reputation for superior products, you have a right to expect satisfactory results.

It must be said that certain conditions other than those of the varnish must be right if the varnish work is to turn out well. It will not do, for example, to put varnish on damp wood, or even to apply it in a room where the air is excessively damp. We want moderately cool, dry air and clean, dry materials before we start, and then there should be no hurry after the work has begun. Leave time for the successive coatings to harden—a day's delay to make sure of this may return large

America Is Now Producing The Best Rugs And Carpets

Home Furnisher Has Wide Variety of Fabrics From Which to Select When Choosing Floor Covering Important That Quality be Considered in Making Purchases.

In the variety manufactured in quality, and in the art displayed in both design and color the United States leads the world in the production of floor coverings. To such an extent is this so that it is extremely rare to find in the stores rugs and carpets other than those of our own manufacture. In making this statement we are referring to goods woven by machinery—not to oriental rugs, each of which is an

profit to you in a good and durable job.

Don't begin your fine varnish floor finishes with a cheap undercoating. Shellac is a very valuable material for certain finishes on wood trim and furniture; but it wears out quickly on the floor. Build up your floor varnish with two, or, much better, three coats of the best varnish you can get. Don't let the varnish chill—keep it out of drafts—make a mighty effort to keep down the dust.

We have not said much about the workman—the painter. He is as necessary an element in this part of the work as he has been all through building operations. It is easy to distinguish between a good job and one that is poorly done. There are ways in which workmen can slight this part of the work, as there are in everything else through the building. Your guarantee of satisfaction lies largely in having an expert reliable painter do the work.

individual piece, woven by hand and frequently taking years to produce. This situation, of which the manufacturers of rugs and carpets in this country may justly be proud, is not the result of any accident. It is to American invention that the world owes the modern Jacquard carpet and rug loom, while the conception, designing, and construction of the rugs themselves, now in use in countless homes, had both their origin and successful development in this country.

The home furnisher of today has a wide variety of fabrics from which to select, when choosing a floor covering. To mention some of the most prominent, there are tapestries, velvets, Axminsters and Wiltons, with several grades in each. Of these the Wilton fabric is the only one woven by the Jacquard process. As the Jacquard principle, named for its inventor in 1801, is perhaps not known to the average reader, it may be briefly described as a mechanism by which certain strands of wool or other materials are either raised or depressed, bringing the proper colors to the surface and thus forming the design. It is used not only in carpets and rugs but in silks and other fine woven fabrics with patterns. In Jacquard woven goods the color on the surface always has one or more colors underneath it, creating a wear-resisting cushion which prolongs the life of the fabric.

No other article of furnishing in the home receives any such wear as the floor covering. It must withstand the pressure of many feet and, though thus down-trodden, must and should preserve its freshness of appearance for a long time. In the old days—and in fact now—the visitors to mosques, and other buildings in the Far East containing fine rugs, are required to remove their shoes before entering. As such a regulation is hardly possible with us it is of the utmost importance to the purchaser of a rug or carpet for the home that she obtain a quality which will withstand the wear caused by the many shoes which will tread upon it.

A prominent engineer who has made an exhaustive study of floor coverings for use in hotels—where

Hints on Iceboxes

Are there little beads of glistening moisture on the outside of your icebox? Even in a well-made refrigerator it is almost impossible to prevent "sweating." It is quite impossible to prevent difference in temperature between the outside casing and that of the room. Consequently any moisture held in the room atmosphere is bound to condense on the outside of the box. If the refrigerator is kept well finished with varnish or shellac, this moisture is prevented from seeping into the box, causing the panels to warp, seams to open, wood to rot. This condition offers germs an opportunity to develop and causes ice to melt more rapidly. In time an icebox will become useless. See that your refrigerator has two coats of good varnish before warm weather sets in.

good wearing qualities are of course paramount—has written an article in "The Hotel World," going very carefully into the question of the best fabrics. Here are a few extracts:

"No economy in cheap carpets." "American makes equal importance."

"After a careful study I have concluded that the Wilton carpet is preferable."

"In a Wilton carpet the process of manufacturing is such that a certain grade of quality is essential."

What applies to hotels applies to an extent to the private home. Particularly for the "down-stairs" rooms, the living room, hall, library, or dining room, Wilton rugs or carpets are much to be preferred and will more than pay—in satisfactory service—for the greatest cost in the beginning.

A word in closing as to Oriental or Chinese rugs. The possessor of a fine Oriental rug has every right to be proud of his ownership. However, an intending purchaser should be very careful not to be misled by offers of cheap Orientals, of which unfortunately, quite a number come into this country. Such rugs are not to be compared with good American-made Wilton rugs, either for permanent beauty or durability. Therefore, such a purchaser should be cautioned against being too easily tempted by the glamour of the words Oriental or Chinese.

I Will Build You This Home and Furnish the Lot for

\$1550

This house will be 24 feet by 30 feet, with four rooms and 2 closets, with 8x14 veranda; solid foundation; well built house; painted; varnished; papered; electric lights and water; front and back steps; and ready to move into.

This house will be built less than one-half square from cement street.

This offer is open for immediate acceptance.

SOFT WATER WOULD BE SOURCE OF JOY

Installation of Softener or Piping From Cistern Would Add to Comfort of Home.

HARD WATER HAS OBJECTIONS

From Every Standpoint Soft Water in Home Bespeaks Both Efficiency and Economy

While not an essential part of the house proper, soft water, running and obtainable in the kitchen and the bathroom of the new home, will prove a source of joy as long as the house is tenable. Both hard and soft water have their distinct use and to attempt the use of one where the other should be used is discouraging to say the least.

The condition known as hardness in water is caused by the absorption of certain mineral constituents as the water passes through the earth or flows over its surface.

There are two mineral elements in particular which are easily absorbed by both ground and surface water. These elements, calcium and magnesium, are chiefly responsible for the hardness in water whether it be pumped from wells, lakes, springs or streams.

Even small amounts of lime and magnesium in water can always be recognized by the difficulty in securing a lather with soap. Similarly in the laundry, the bath and all cleaning operations, this hardness is very unsatisfactory.

This same lime and magnesium

CHEAP ROOF IS MOST EXPENSIVE

Among the Things That Enter Into a Good Roof Are Material, Workmanship and Appearance.

SLANT OF ROOF IMPORTANT

Pitch Should be Steep Enough to Permit Water to be Carried Off Quickly as Possible.

One of the most expensive items to attach to a new home is a cheap roof, while a good roof is one of the real essentials in economical upkeep of a house. Many things enter into the determination of a good roof—material, pitch, workmanship and last and least, appearance.

Primarily a roof is the protection that we put over the house to keep off the elements, and it must be especially designed to carry off water. This means that the surface have to be inclined or "pitched." The pitch is very important, for the steeper the roof the more quickly it will clear itself of water, which is just another way of saying that fewer leaks will occur.

For example, a roof covered with shingles that is not steep enough will become wet all through. Water will be carried up between the shingles and through the roof covering, and so find its way into the house. As a matter of fact, any kind of roof that is made of overlapping units, such as slate, tile, or shingles of wood, cement, asbestos or asphalt should be "pitched" at least 30 per cent.

If the roof is covered with sheet metal like tin or copper, or with layers of felt set in hot tar, it does not have to be steep for water runs off this kind of material very quickly. In any event, there is no chance for it to creep back underneath the roofing. These materials are, therefore, especially valuable for flat roofs. On the other hand, the color, texture, and generally superior appearances of overlapping units make these coverings more desirable for pitched roofs—those which can be easily seen.

The simplest kind of a pitched roof is one which slopes both ways from the ridge. This is called a gable roof because of the gables thus formed at each end of the house. If the roof pitches up from all four sides you have a "hip" roof. If the house plan is a combination of rectangles such as an L-shaped plan the planes of the roof come into contact with each other at one or more places to make a valley. Valleys are the most vulnerable places of all in a roof. This is true because the roof covering must be broken to make the angle. There is more water in the valley than elsewhere on the roof surface. Snow and ice lie in this intersection. Any break in the roof plane increase the difficulty of making the roof absolutely water tight. Wherever the roof is broken with a dormer window or a chimney stack or a vent pipe there is a place for water to work down into the house.

WHY WALNUT LEADS

This generation has a higher regard and appreciation of beautiful furniture than our fathers and mothers. All over the land the fundamentals of proper interior decoration are being taught in magazines and in schools. We demand more in design, materials, workmanship and finish of the furniture manufacturer than ever before. At the same time we have so many interests and so many things to do that we drown on anything that makes "more work." Cost of upkeep in time or money is a matter of prime consideration.

In furniture we do not want anything that requires continual work or the services of an expert to keep up its appearance. This is one of the reasons why American walnut is a popular furniture wood today. Finished natural it does not show dirt or finger marks. Walnut furniture that has been "wiped up" does not become "cloudy" before the guests arrive. If the busy housekeeper hasn't had time to slick things up or the guests arrive unexpectedly, she can welcome them without the horrible suspicion that they will think she is careless of appearances.

PAINT HEATING PLANT

Now that the heating plant is about to go on a vacation, all pipes, doors and other portions which are liable to rust should be protected with a paint coating. Such action may forestall inconvenience and a repair bill next fall. There are special paint products made for such surfaces, because the proper materials are used.

GREAT PROGRESS IN FURNISHINGS

Manufacturers Show Immensity in Beauty and Variety and Appreciation of Home.

MAKE WHAT PUBLIC WANTS

Their Products Anticipate Existing Desire For Attractive And Harmonious Environment.

"A Little Down on a Big Bill Will Do." "Come visit our display room, or write for twenty-page handsomely illustrated booklet." In our stereotyped, fit 'em all, three-room or twelve, cottage or palace, furnishings, we have just the thing you desire. Guaranteed to suit each and every temperament, each and every dimension, we have at last standardized the requirements for all those seeking a home. Satisfaction guaranteed." So an advertisement might have read a few years ago, when the difference between the furniture for a cottage dining room and a dignified, paneled one would be one foot and two leaves added to the table, and four extra chairs. Then, too, it was thought that only the standardized things could go into a house and that the requirements for a three-room home were the same in a flat in Harlem as for a bungalow in Gardenia, Kansas, and the woman who did want to make her home different met with no co-operation for all the furniture was built upon the same old set designs with no more thought about individuality than is given to a loaf of bread.

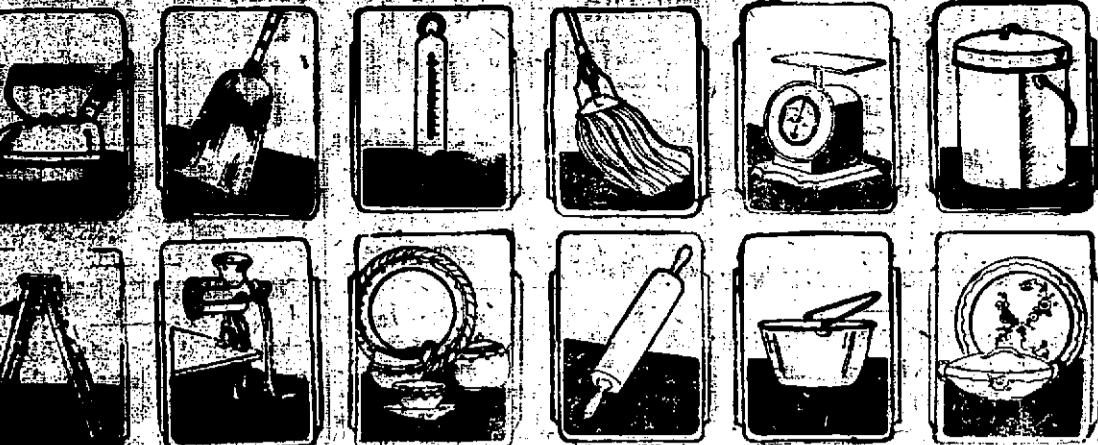

The manufacture of furniture was a reaction from the hand wrought pieces of early days and a catering to the pioneer period in which the main object was to make a living. But since then American taste has been greatly refined and people are no longer satisfied with a dining room that looks like every other dining room on the street, or a living room that might be described from imagination as well as sight, so little individuality was shown.

There must always be demand before supply, if that supply-demand theory will work, and in this case as soon as the people really began to resent having their furniture all fashioned from the same designs, or those practically the same, the manufacturers woke up to the idea that some change must be made. Consequently, no effort was spared to give the public what it wanted—furniture with distinction and individuality. The designers realize that greater care and taste is shown by people every day in their selection of and their demands for furniture, and they are catering to this refinement and good taste.

For instance, take a small, occasional table for the living room. Think of the number of styles, woods and finishes one has to choose from. First, he may use the old stand-by, the gateleg table, and the variations of this are enough to interest the looker for a day; or a tilt-top table, with a round, oval or octagonal top with the edges burled, grooved or "pie-crusted;" or perhaps the person wants a long, narrow davenport table, and one equally as narrow in the shorter end table which may be merely a tiny one for the bookends and maybe a lamp, or may have racks below for magazines, or may be converted into a sewing table on a moment's notice. Besides these, there are tall, thin nests of tables that fit into each other like clockwork, and short side the davenport and without half side the davenport and without half looking, one may find many others.

Moreover, these tables are not made only of the woods that one finds in the heavier pieces of furniture, but the small table is often in a contrasting wood to give a touch of variety to the room. A very effective variation is found in the Chinese lacquer, so often in red, that is being used extensively at the present time.

It is not in tables alone that one finds his distinction by any means—this was merely used as an example. In the larger pieces of furniture which must of necessity conform to certain lines more than the smaller, the variety in the finishes plays as great a part as the changes in design. Combination of two different kinds of wood adds interest to any piece of furniture if the combination is well done, and the contrast of the grains of the wood running in opposite direction is particularly effective.

CHANGE IN PLANS MAY CAUSE DELAY

Home Builders Should Know What They Want Before Construction Work is Started

"EXTRAS" ALSO COST MONEY

Carpenters and Architects Required to Draw New Plans if Changes Are Very Radical

Home builders often gain the impression that because contractors and architects oppose "extras" and changes in the construction of the house and advise against it, this advice is given because of the added work, or that the owner is "getting something for nothing."

Nothing could be farther from the truth, for the architect or contractor when he advises against the change is attempting to save the builder money. Delays cost money.

And if there were no other cost to the changes, this would run into a sum large enough to justify more careful consideration before work is started. But there are many other costs which must be paid by the owner changing the original plans, more disastrous than the delay cost.

New drawings must be made, if the change for "extras" involve considerable work, orders for materials already placed must be countermanded, new and different material must be obtained. When you consider that the contractor usually has a force of bricklayers, carpenters, plasterers, electricians and other skilled workmen on the job, you can understand how delays occasioned because of changes and "extras" hold up these workmen and cause the contractor sleepless nights. His whole building program has been disrupted and you must pay the bills.

If special millwork or other special manufactured details for your new home already are completed, and if you decide you want a change or an "extra" it may mean a complete loss of the finished work. Don't forget that the mill or manufacturer will expect you to pay for the original order.

When the bills for all of this work are finally presented to you for payment, the contractor may realize full well that you may think him to be an accomplished robber, holding you up with a bill instead of a gun, but what is he going to do about it, provided you order the "extras?" Contractors are in business to make a legitimate profit, and can not be expected to pay out his own money for changes and "extras" that you order—too late.

MODERN KITCHEN IS A FEATURE IN NEW HOMES

Noticeable Fact That Most Indiana Builders Give Kitchen Most Careful Attention

OPEN PLUMBING ESSENTIAL

It has come to be a trite saying that the kitchen is the most important room in the house—particularly the small house without servants. Since this is true, it is the room which deserves the most careful attention. It is a noticeable fact that most Indiana builders give it that attention. Nowhere else is the standard so high.

The margin between a good kitchen and a poor one is very small. It is not a question of size so much as of completeness and arrangement.

Mme. Housewife, do you agree with us on the essentials of a good kitchen?

Plenty of light and cross-ventilation.

Good open plumbing, every service of which light and air can get to. A sizeable enameled-iron drain-board.

Plenty of cupboard sections; liberal room for food storage and dish storage; pots and pans and the bulkier groceries; a place for the broom and the mop.

Work table space—lots of it, preferably porcelain.

A well-insulated modern ice box and an enameled stove.

However, a kitchen can have all these things, and still be a poor kitchen to work in. If these essentials are not properly grouped and arranged, it means unnecessary steps, dirt-catching corners and everything looking awkward and out of balance.

Mme. Housewife, don't let yourself be imposed upon: You are entitled to a good kitchen and it won't cost any one one dollar more than a poor one. Insist on your rights. Talk kitchens to your builder.

tras?" Is it possible to decide upon the plan for your home and stick religiously to it until the house is completed? It can be done, provided the three most interested parties in every building operation, namely, the owner, architect and builder, set themselves definitely and in a logical way to do so and provided all three are honest.

Tipton—A hen put it over on Marschand of Tipton. Marschand purchased a pair of white guineas and saved the eggs carefully. Three weeks ago, he put them under a hen. They hatched Buff Orpington chickens.

TEXTURE OF WALL PAPER IMPORTANT

Most Difficult Point for Untrained Artistic Sense to Decide Upon and For Adviser

NEED SUITABLE BACKGROUND

Paper Should Provide Atmosphere and Bind all Articles in Room in to One Effect

Modern interiors are constructed and furnished in one of three manners, viz: (1) in some pure period style, in which may be included the so-called colonial, or (2) architecturally plain, of no particular style with real or reproduced period furniture, or (3) with everything modern, uttering no predominant note as far as either architecture or furniture are concerned. This latter class is by far the most numerous, and in such houses it will be the wall paper which will give the rooms their real distinction giving a place to the characterless furniture in the general scheme.

The whole question of wall coverings lies in the appropriateness of texture, color and design—in this order of precedence—of whatever material you may choose for the purpose. Texture is perhaps the most difficult point of the three for laymen with an untrained artistic sense to decide upon, and certainly is the most difficult for the adviser to explain verbally. But certain general lines may be laid down for you to follow.

Every wall paper manufactured today is a reproduction of some type of textile or leather, or other material, and therefore possesses, artistically speaking, a feeling similar to that of the original. To cite an extreme example: You would never think of using a paper imitating decorated and polished tiles, in a dining room, for the simple reason that real tiles would quite obviously be out of place in such a room. Again, a bathroom would be badly decorated, if you used a paper facsimile of a Louis XVI alternate silk and satin stripe, for you would never employ such fragile material in a room where it would speedily become spotted and stained. In a room constructed along dainty, delicious lines, heavy-textured papers are not correct, for you would not hang such apartments with cumbersome velvets or tapestries if you were able to afford the expense of these materials. In short, let your guiding principle be: Decide upon what kind of textile or other material would be best suited to the rooms you wish to decorate and then choose your paper

from among those which reproduce that same texture and feeling.

The next rule is to choose a paper which will be a suitable background for your furniture, pictures and hangings. It should provide an atmosphere and bind all the different articles in your room into one homogeneous effect. One of the faults of plain, painted walls is that their very simplicity makes them "stand out of the picture," instead of remaining unobtrusively in their proper place. Like the self-conscious woman who went to church after she would not be noticed!

WATER EQUIPMENT IS AN AID TO HOUSEWIFE

To Have Abundant Hot Water Always on Hand is as Necessary as Heat and Good Lighting

GIVES PRIDE TO HOME

Modern invention has converted the old tasks into pleasures. At every turn the modern housewife can employ some labor-saving device to do her work quickly and give her the freedom to enjoy her home and the companionship of her family.

Power washers, vacuum cleaners, electric irons, etc., are now recognized as essential appliances in every well conducted home. But even preceding these in importance is plentiful hot water at the turn of the faucet.

This prime requirement enables the home manager to better organize her work and realize the full benefit of her mechanical equipment. It completely rounds out her establishment and makes her home equal to the demands of her family and the needs of her friends.

In brief, it gives her a home in which she can take an abounding pride and to which she can invite her guests with assured confidence that her hospitality will be complete in every respect.

To have abundant hot water always on hand is as necessary as heat and good lighting in every well managed home. As the first and last essential of the day, hot water is indispensable for all personal comfort. And in laundering, cooking and cleaning it is the primary requisite.

The white, crisp table cloth you spread—the gleaming silverware and dishes that you set upon it, and your many other articles of elegance demand the use of pure hot water to keep them in perfect readiness.

The magic response of the automatic gas water heater provides this prompt and bountiful hot water service.

from among those which reproduce that same texture and feeling.

The next rule is to choose a paper which will be a suitable background for your furniture, pictures and hangings. It should provide an atmosphere and bind all the different articles in your room into one homogeneous effect. One of the faults of plain, painted walls is that their very simplicity makes them "stand out of the picture," instead of remaining unobtrusively in their proper place. Like the self-conscious woman who went to church after she would not be noticed!

Hoover Comments on Aims of Better Homes in America

Everyone is in accord with the aims of Better Homes in America. The function of that educational organization is to correlate these wishes, through local Better Homes demonstrations, into tangible, beneficial results. Herbert Hoover, Secretary of Commerce and President of Better Homes in America, writing of the movement, said:

"In the crowded life of today there is danger that we may lose sight of high standards for the home and the stimulus they afford. We all do better when we have a high ideal to live up to. The Better Homes in America movement aims to give practical demonstrations of comfortable, healthful and attractive homes, to direct attention to the means by which family life may be elevated. It recognizes, however, that it is not the wish but the will; not sentimental desire, but vigorous, well-judged leadership, that moves our national life forward. The campaigns provide means by which the men and women and children of our cities and our farms may cooperate to encourage and facilitate home building, reduce needless drudgery in household operations, increase good sense or balance in furnishing or decorating the home, raise standards where necessary, in housing and family life, and, especially, foster the fine ideals of the American home."

"The 1924 campaign for Better Homes in America was greater than ever before. It reached every state in the Union; it penetrated rural districts, and towns and cities. Fifteen hundred local committees worked with the most inspiring zeal for public service, to protect and raise the standards not only of the home but of the community and the nation as well.

"As we enter the 1925 campaign for better homes, I hope that every American community will consider participation. The movement concerns every householder, every home maker, every citizen. I bespeak active cooperation with the local chairmen on the part of all persons or groups interested in the home—public officials, schools, churches, local civic associations, trade associations, and clubs. The home is the concern of all, and everyone should welcome the opportunity to contribute to its welfare."

NOVEL KITCHEN DRAPES

New and interesting are kitchen curtains of oilcloth in solid colors in blue, scarlet, orange, lemon and gray. The curtains are the length of the window and hang flat and even against side of sash; they vary in width according to preference, at bottom a hem is turned and weights inserted. The curtains, painted, in bright harmonizing colors or decorated by stenciling, are finished with a valance of shelf oilcloth, scalloped, pointed or plaited. Still another effect is secured if the colored oilcloth is given a two-tone effect, by applying paint of a lighter tint or darker shade of the color of the material, to the surface with a sponge.

PRESERVE PAINT

When you set a pail of opened paint away for a few days, some step should be taken to prevent the forming of "skin" upon the surface. One of the good methods is to soak a large crock flowerpot in water and turn this, upside down, over the pail. The film that forms is a result of drying and the porous sides of the flowerpot will, when thoroughly wet, keep the interior air moist for several days.

ARCHITECTS FAVOR ORNAMENTAL GLASS

New Glass Differ From Ordinary Plate in Having Slightly Wrinkled Semisolid Surface

DIFFUSES THE LIGHT RAYS

A new sort of building and ornamental glass that was discovered by the Pittsburgh Plate Glass Company through a slight variation in the process of manufacturing polished plate glass is in increasing favor with architects and builders. Before the new glass was made available through dealers it was tested directly by the main organization of the Pittsburgh company. Several installations were made in office buildings, stores, public buildings and religious edifices.

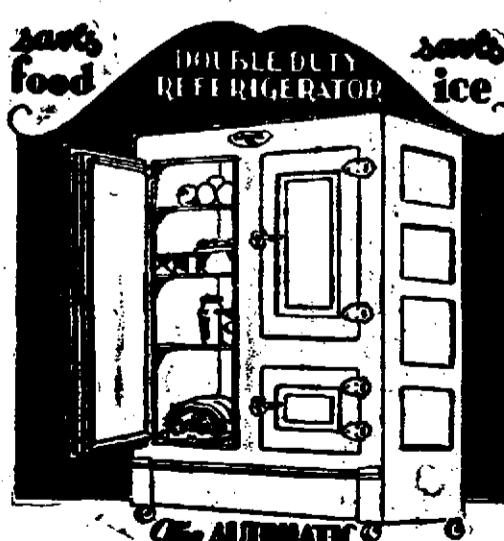

The new glass differs from ordinary plate in having a slightly wrinkled semisolid surface. It breaks up and diffuses light rays, spreading illumination even more than polished plate. Its chief use is in office partitions and doors and in opaque but translucent screens. In decoration it has turned a new leaf in the book of glass possibilities. Designs can be etched, mitred or sand-blasted on it with excellent effect, the natural appearance of the glass affording the finest of backgrounds.

A peculiar property is that while the glass obscures the view of anything or any one three or four feet away, as seen through an office door, when it is placed directly against an object, as against a framed painting, or objects on a desk top, it is perfectly transparent.

DELIVERS THIS AUTOMATIC

TO YOUR HOME

Pays for Itself While in Use in Your Home

Automatic - Thrift

The question of saving is an important one and one that is receiving much consideration in homes. Both food and ice cost money and the Automatic saves both, consequently it will save money for you. This Automatic is made with an ash case in golden oak finish. White enameled steel lining. Very specially priced.

Your Automatic will save untold amounts of food that otherwise is spoiled or thrown out. Food costs money. Your Automatic will reduce your ice consumption—it's really surprising what an improvement the Automatic is over the old ice box. Ice costs money. The money you save on food and ice will pay for your Automatic.

NOTHING ADDS MORE TO THE APPEARANCE OF THE HOME THAN

Correct Wall Decorations

And Properly Finished Wood Work and Floors

Anyone may be able to select Wall Paper for a room—but the selecting of Wall Paper for a room and selecting the proper DECORATION for that particular room are distinctly different.

Inexpensive Wall Decorations should be harmoniously combined as well as the more expensive ones.

We have made the Art of Interior Decorating a study and we feel that we can be of real service to you when you are ready to decorate that new home or to redecorate the old one.

Our SERVICE Department is at your disposal at all times. Call on us when you want advice regarding your decorating problems.
